

In the name of Allah

Thanks only to Allah ,may peace be up on the seal of the prophets , after that :

This is an outline of the thesis entitled (Al-Razi's position on Al-M'utazila sect {critical study} ) . In this thesis I tackled : the attitude of one of the Asha'ri doctrine's greatest figures , although he reserved away from it , and also this sect's thoughts and fundamentals are still alive , some people are trying to join it and make it rise again , It's followers are still clinging to Al-Razi's books , while denying his position on it . all of this in an introduction , in which I tackled the importance of the subject , why I chose it , how I studied it , an introduction in which I introduced Al-Razi and Al-M'utazila , followed by six chapters , each of them tackles his position on a single matter of the Islamic dogma including : names and attributes of Allah almighty , fate , angels , jinn , prophet hood and doomsday . In addition to conclusion in which I mentioned the most important points I realized from the results of this research . the most remarkable ones are :

- 1 – Al-Razi declared his position on an issue according to what appeared to him at the time and he might contradict with it in other situation .
- 2 – He might agree or disagree with his dissenter in the sect of Asha'ri , as it is with his other Asha'ri's fellows and Al-M'utazila .
- 3 – Al-Razi had agreed with the Sunnites in some positions and disagreed with them in other ones , but if we studied carefully , we will be able to see their disagreements .

Moreover , May Allah grant me success and rightness .
