PREFACE.

Or the two original works forming the subject of the present volume, and of which an English translation is now for the first time submitted to the public, the Mijut Amil or that comprising the text, contains a brief but comprehensive view of the first division of Arabic Syntax, or of that part, which treats of the government exercised by nouns, verbs and particles. The second, or Shurh, is a commentary on the former, and illustrates by a more minute and detailed analysis, the various rules recorded in the text, and the general acceptations of the several governing powers.

The first Book is entitled Miut Amil, or the Hundred Governing Powers, because the Author has contrived to reduce to that precise number, the whole of those powers in Arabic construction, which are found to affect the terminations of nouns and verbs. A synopsis of this system may be seen in the commencement of the work, and a brief explanation of its leading divisions will be found in the concluding remarks to the translation; it is unnecessary therefore to enter into any further detail, and I shall merely observe of the title, that although it appears in some degree affected, and is not I imagine altogether strictly correct, yet the general design of the treatise, displays so much skill and ingenuity, and combines at the same time so many excellencies of brevity, order, perspicuity and precision, that it may be fairly considered, on the whole, as the most judicious compendium of Arabic regimen, that has yet appeared in the language.

Those indeed who are fond of simple abstracts of science, will have no reason to complain of the length or difficulty of the Miut Amil. It contains in something less than five quarto pages, the most important department of Arabic Syntax, and is almost entirely free from those little verbal quibbles and philological fopperies, which tend more or less to disgrace almost every work on Arabic grammar. The title to be sure carries with it an appearance of superfluous exactness, and some little grammatical finesse will no doubt be discovered in the author's mode of supporting it,* but this is too petty an objection to merit any remark, it is in truth a mere systematic capriccio: a solitary particle out of the great arabian desert of metaphysical refinement, where subtilties,

Swarm populous, un-numbered as the sands, Of Barca or Cyrene's torrid soil.

^{*} His method is as follows. He divides regimen into two general classes or departments, termed verbal and absolute. By the first is simply understood the effect that one word has upon the termination of another. By the second is meant that specific mark of case assumed by a noun when used absolutely as the nominative to a sentence. The government in the first instance is termed verbal, because, the change of termination is occasioned by some word either expressed or understood. In the second it is called absolute, because the word thus governed is considered independent of all verbal agency, and acquires this peculiar form of construction from its nominative situation alone. Verbal government he then subdivides into two distinct classes. The first, comprehends ninety-one specific words, which are termed from their nature, Prescriptive governors. The second, contains seven distinct classes of words, such as verbs, adjectives, participles, infinitives &c. &c. each of which necessarily includes all the words of its own species, and each of these classes he considers numerically as one, and terms the whole Analogous governors; here then are all the verbal governors in the language reduced to ninety-eight, viz. ninety-one in the prescriptive, and seven in the analogous class, to which if we add two in the absolute, we shall have an exact centenary of governing powers.

I know not well what the votaries of the eastern oracles will say to this comparison. I fear they will rise indignant against me for venturing an expression that may tend to degrade the literary eminence of the Arabs: but this is not my intention: I would rather support than lessen their importance. I consider myself in some measure as one of their disciples, and certainly feel respect for their language and literature. But although I freely acknowledge their merits, I will not acknowledge the infallibility of their doctrines, nor voluntarily subscribe to all their grammatical dogmas; their superlunar speculations; their metaphysical distinctions 'twixt south and south-west side;' and the whole host of fallacies and fictions, with which they perplex and embarrass the most simple subjects of literature. Undoubtedly their works discover both genius and learning, and in the minute cultivation of many sciences, particularly grammar and rhetoric, it may be doubted whether they have been surpassed by the learned of any other nation, but their literary affectation by disfiguring their works, diminishes in a considerable degree the real merit of their labours, and throws so many unnecessary impediments in the way of the student, that it is not very surprising we should find them almost entirely neglected.

One specimen of their solemn mode of trifling in literary works may be worth inserting. The Author of the grammatical treatise termed the Kafeea, for some reason best known to himself, neglected to prefix to his grammar the usual auspicatory formula of praise to the deity, the omission of which is considered by the sober Moosulmans as a serious mark of impiety. It was therefore necessary to defend this omission, and accordingly his commentator Moolla Jamee, in the true spirit of casuistical sophistry, settles the point of conscience as follows: "It is observable, 'says he' that the Author

Shuckh Ibnool Hajib, has not commenced his work with the prescribed ceremonial of praise to the deity. This omission however must not be attributed to negligence or contumely—'then to what must it be attributed?' why, to a proper sense of modest humility to be sure, which led him to depreciate his own merit as a grammarian, in comparison with those who preceded him, (the grace of God be upon them!) and consequently he thought himself unworthy to imitate their works in any respect! but although, continues the commentator, he has omitted the actual insertion of the words, it cannot therefore be inferred, that in direct opposition to the positive injunction of the sacred ritual, he has neglected the ceremony altogether. 'Oh no!—that would be an unreasonable and unnecessary supposition,' particularly as we know 'adds he,' that it is not restricted to verbal forms alone, but may be virtually discharged in secret, mental aspirations!' Now this is considered a very conclusive piece of reasoning, and completely exculpates the grammarian from all manner of censure.*

In speculations of this nature the Arabian grammarians seem to take peculiar delight. One third of the commentary on the Kafeea by Moolla Jamee, consists of subtilties and sophisms, which have very often no more connexion with the science of grammar, than with the science of palmistry. Every trifle gives occasion for an episode, and every episode is 'conglutinated or made up' to f as much recondite erudition, as the learned commentator can well muster together. After defining a word, he ascends synthetically to language as a compound, which comprises he says the language of Gop, of man, of angels, and

of Genii.* Lest any one however should be puzzled to find out the true nature of this latter dialect, a learned scholiast comes forward with a specimen, and another gravely adds, as an infallible proof of its demoniac originality, that no human being can pronounce it three times successively at one breathing.

Through this commentary however, this xáspa péya of syntax, or some other, of equally 'crude consistence,' every student is obliged to 'swim, or sink, or wade, or creep, or fly,' who would aspire to any thing

'Words so debas'd and hard, no stone, Is hard enough to touch them on.'

Which the reader may compare with the well known line in Homer,

Πολλά δάνανία, κάτανία, πάρανίά τε δοχμιά τ', ἤλθον.

So happily paraphrased by Pope,

O'er hills, o'er dales, o'er crags, o'er rocks, they go; Jumping, high o'er the shrubs of the rough ground, Rattle the clatt'ring cars, and the shockt axles bound.

^{*} An analogous division of language prevails among the Hindoos—" The gods speak Sanscrita; benevolent genii Pracrita; wicked demons Pisachi, and men of low tribes and the rest Magad'hi." Colebrooke on Sans. and Pracrit. A. R. 7. 199.

[†] It is also given in the Tulkhees-ool-Miftah, a treatise on Arabic Rhetoric, as a specimen of verbal harshness, and is supposed to have been uttered by a Jin after having killed a traveller in the Arabian desert, whose name was Hurb. It turns out however to be very intelligible Arabic, though in—

like literary distinction. Moolla Jamee is indeed the Priscian of the East, and his comment is considered the very ne plus ultrà of grammatical knowledge. Not to have read it, argues absolute ignorance; read it, and you are dubbed at once a Moolla, and a man of learning: such is the wonder-working efficacy of Arabic grammar. It supercedes in a great degree the knowledge of every other art, and every other science, being in fact, if we may credit some of the learned Arabian doctors, the very essence of all the arts and sciences.

But grammar after all in its obvious and natural sense, is truly a simple art, the art of teaching the rules of inflexion and syntax, or the various relations of words to one another in discourse. The rules necessary for this knowledge are neither very numerous nor difficult, and perhaps not more so in Arabic than in other languages, but the Arabian philologists by blending them with the abstract speculations of logic, have effected a new and complex system of grammar, a system which comprises not merely the various relations, but the exact significations and definitions of words; their divisions into genera or classes; their combinations into propositions, and these again into reasoning or dicourse. Now all this is the proper business of logic, which is surely a distinct science, yet all this they have in some measure confounded with the simple rules of government and concord, so that a student looking into their works for a plain rule of syntax, finds himself entangled in all the mysteries of metaphysics.

There are some men, says Johnson, who seem to think nothing so much the characteristic of genius, as to do common things in an uncommon manner, like *Hudibras*, to tell the clock by algebra, or like the lady in Dr. Young's Satires, to drink tea by stratagem; to quit the beaten track only because it is known, and take a new path, however crooked

the case with the Arabian grammarians: they are always employed in raising straws with levers, in illustrating what cannot be misunderstood, in devising difficulties where none ever existed, and in perplexing the simplest rules of regimen and concord with useless subtilties and logical definitions: but if grammar be a particular art, what has it to do with general and abstract speculations? A disquisition on symbols and conventional signs, or the origin of general terms,* will not facilitate a student's progress in the laws of syntax. These may be important enquiries, but they are not the more so, because conducted in Arabic: they have in truth no more connexion with the language of the Arabs, than with the language of the Troglodytes.

It is indeed amusing to observe the very opposite opinions of learned men on the subject of grammar. Some will have it a science, which views language only as significant of thought, and this is philosophical or general grammar. Others consider it as a simple art, which teaches the inflexion of words, and their due disposition into sentences and phrases, and this is particular grammar. A third race of philologists will neither allow it to be general nor particular, but a mixture of both, and this may be properly called mixed, or Arabic grammar.

The modern grammarians of Europe consider grammar and etymology as synonymous terms, and with them all languages go upon wheels, † but those of Arabia who have no acquaintance with verbal antiquities, reject etymology altogether, and substitute in its place a dash of dialectics, with

^{*} See the Shurhoo Moolla and Shurhoo Ruzee.

⁺ In days of yore they were dragged about like sledges! Diversions of Purley. Vol. 1. p. 25.

which they are acquainted. Here then, are two opposite roads to the same end, and the student may take his choice. Either to adopt the plan of Horne Tooke and his followers, and set about digging for grammar through some dozen or fifteen collateral dialects, or getting boldly on the back of Synthesis with Mr. Harris and the Arabian grammarians, gallop circuitously to it, through the whole region of science.*

In order to learn any language with accuracy and facility, we must first endeavour to learn its rules, or the customary application of its words; these in their simple state, disencumbered of all technical formalities, are seldom difficult and may be easily acquired, but when once perplexed with obscure etymologies and logical definitions, and when every Dyche and Dilworth, who writes a twopenny-halfpenny guide to the eight parts of speech, deems it his duty to work them up into what he calls a new grammatical system, then indeed they assume a different character, or rather a variety of different characters, and are not easily acquired at all; the student, finding himself bewildered in the wordy labyrinth, abandons the study altogether, and willingly consigns to the Fates, the whole race of miserable grammarians with their miserable canons.

Felix grammaticus non est, sed nec fuit unquam,
Nec quisquam est felix nomine grammaticus:
Aut siquis felix præter fatum exstitit unquam,
Is demum excessit grammaticos canones.

As far however as relates to the present system of Arabic grammar, at least to the technical and speculative part of it, as distinct from the practical, my own opinion is, that it is chiefly, if not entirely derived from

^{*} Hermes p. 3.

[†] Ausonius Ep. 126.

the philosophical writings of the Greeks, and particularly from those of Aristotle, with which the Arabs had been long and familiarly acquainted. They have certainly adopted his analysis of language,* his definition of the parts of speech,† his reasoning on substance and accident, or Mode,‡ which they have applied to words, under the grammatical denominations of Nouns and Infinitives, and his whole theory of the elements of language as significant of ideas. These are some of the principal topics, which the Arabian grammarians take delight in discussing, and to which, they not improperly attach a high degree of importance, but the merit of originality must be transfered to the Stagyrite, whose dialectics, if I am not much mistaken, will be found to contain the most remarkable facts that distinguish the philosophical grammar of the Arabs.

[‡] Accidents vero sive Modus est rei proprietas, quæ in aliqua substantia inhæret, nec sine ipså potest existere. Element. Logicæ. By Accident here, and in Arabic grammar, as applied to an Infinitive, or is not meant as has been erroneously supposed, any thing casual or fortuitous: but as this is a point of some importance to the true understanding of an Arabic Musdun, (for an explanation of which I refer the student to my Annotations on the Commentary, p. 195.) I shall lay before him Dr. Gillies' note on the subject, which will certainly corroborate one material point of my argument. "The Greek word συμβεβημος is, as far as I know universally translated, "accident;" συμβεβημοτα in the plural, "accidents," from which, "Accidence," denoting the little book, that explains the properties of the eight parts of speech, is generally held to be a corruption. But accident, in its proper sense of what is casual or fortuitous, has nothing to do with the one or the other; and Aristotle's meaning of συμβεβημος ought to be expressed by a Latin or English word derived, not from 'accide,' but from, 'accēdo.' See p. 65.

Indeed the whole philosophy of the Arabs may be traced to the Greeks,* whose language and literature they seem to have studied with uncommon ardour, for upwards of five centuries, that is, from A. D. 754 to the taking of Bagdad in 1258. Rhetoric and logic were their favorite pursuits. Averröes, the great commentator, as he is generally called, is known to have paraphrased Aristotle's rhetoric, and Alfarabius is said to have written no less than sixty distinct treatises on the Aristotelian philosophy, which was publicly taught in Bagdad, Bussurah, Koofah, Bocharia, Alexandria, Cairo, Morocco and Fez, as well as in sereval parts of Spain and Italy; but

^{* &}quot;See Abulfarag. per Pocock, Dynast. p. 160. Greek was a familiar language to the Arabians. The accompts of the Caliph's treasury were always written in Greek till the year of Christ 715. They were then ordered to be drawn in Arabic. Many proofs of this might be mentioned. Greek was a familiar language in Mahomet's houshold. particularly in the celebrated Schola Salernitana?* For a detailed account however of the origin and progress of Grecian literature among the Arabs, I refer the student to Warton's 2d Dissertation on the History of English paetry, and Enfield's History of philosophy, from Brucker's Historia Critica Philosophia, a work of considerable merit, though Dr. Gillies is of opinion, that his account of Aristotle's philosophy, is in many parts erroneous, and in some even unintelligible; while others go still farther, and hint that he did not understand Greek! It will there be seen, that the acroatic works of the Stagyrite, were translated, studied and taught by the learned of Arabia, and that to these works in particular, the Arabians seem indebted for all their notions of the philosophical sciences.

It must not be forgot, that they translated Aristotle's Poetics. There is extant "Averroys Summa in Aristotelis poetriam ex Arabico sermone in Latinum traducta ab "Hermano Alemanno; Præmittitur determinatio Ibinrosdin in poetria Aristotelis Venet. "1515." There is a translation of the Poetics into Arabic by Abou Muscharmetta, entitled, ABOTIKA. See Herbel. Bibl. Oriental. p. 18. col. a. p. 971. b. p. 40. col. 2. p. 337. col. 2. Farabi, who studied at Bagdad about the year 930, one of the translator's of Aristotle's ANALYTICS, wrote sixty books on that philosopher's Rhetoric; declaring that he had read it over two hundred times, and yet was equally desirous of reading it again, Fabric Bibl. Gr. xiii. 265. D'Herbelot mentions Aristotle's Monals, translated by Honain Bibl. Oriental. p. 963, a. See also p. 971. a. 973. p. 974. b. Compare Mosheim. Hist. ch. i. p. 217. 288. Note-C. p. 2, ch. l. Averroys also paraphrased Aristotle's Rue-TORIC. There are also translations into Arabic of Aristotle's ANALYTICS, and his treatise of Interpretation. The first they called Analuthica, and the second, Bari Armenias. But Aristotle's logic, metaphysics, and physics pleased them most; particularly the eight books of his physics, which exhibits a general view of that science. Some of our countrymen were translators of these Arabic hooks into Latin. Athelard, a monk of Bath, translated the Arabic Euclid into Latin, about 1000." Leland. Script. Brit. p. 200. There

^{* &}quot;Their learning, but especially their medical knowledge, flourished most in Salerno, a city of Italy, where it formed the famous Schola Salernitana."

It must not indeed be denied, that there are many subjects connected with the arts and sciences, for which the modern nations of Europe are supposed to be indebted to the Arabs. Bossut attributes to them our present system of arithmetical numeration, as well as the first notions of Algebra which are found in Diophantus.* He gives them the credit of several important discoveries on trigonometrical calculation, and many ingenious improvements and alterations in astronomy.† An Arab in Spain was the first who attempted a theory of refraction and the twilight, which doctrine Malbranch is said to have enlarged upon, but as he does not quote the author, Bossut presumes he was unacquainted with his works. In truth the Arabs seem to have arrived at eminence in almost every science, and even in mechanics, the clepsydra or water clock sent by Haroon Al Rushced in 799 to Charlemagne, is said to have astonished by its ingenuity the whole of Europe.‡

- * "Cardan considers the Arabs as the real inventors of Algebra. Practical geometry and astronomy owe the Arabs eternal gratitude, for having given to trigonometrical calculation the simple and commodious form which it has at present. Bossut, p. 157.
- + Of all the mathematical siences astronomy is that which the Arabs have most cultivated, and in which they have made the most remarkable discoveries. p. 159.
- ‡ In the dial of this Clepsydra, were twelve small doors, forming the divisions of the hours, and each of these doors opened in succession at the hour it marked, and let out little balls, which, falling on a brazen bell, struck the hour. The doors continued open till twelve o'clock, when twelve little knights mounted on horseback, came out together, paraded round the dial, and shut all the doors. This machine astonished all Europe, when men's minds were employed chiefly on futile questions of Theology and Grammar." Bossut. p. 161.

All this must indeed be granted to the Arabs, but it appears from the united testimony of the learned,* that their philosophy was entirely Grecian. 'They did not form, says Brucker, a new system, but merely revived the Peripatetic doctrine.' Their logic was the logic of Aristotle, and the common introduction to that science, which is now current in Arabia and India, is a simple translation of the Isagoge of Porphyry. Aristotle's rhetoric probably led the way to their own, and his logic, when applied to the rudiments of their language, produced that ingenious but intricate and elaborate elementary system, which has perhaps not improperly, been termed philosophical or transcendental grammar.

This then is the origin of the philosophical sciences among the Arabs. Grammar, Rhetoric and Logic or Dialectics, formed the basis, to which if we add Arithmetic, Geometry and Astronomy, which they also

cultivated with success, we shall find them pursue (with the exception perhaps of music,)* the exact course of studies, as practiced by the Christian philosophers in the middle age.

* I say with the exception of Music, because I am inclined to think that Music as a science, was not regularly cultivated in Arabia, though some examples may be produced to prove the contrary. The learned Farabi already mentioned as the translator of Aristotle's Analytics, and who was styled the Coryphaus of Philosophers, deserves perhaps to be recorded as the Timotheus of Arabian Musicians, for his performance on the Lute before Sooltan Syf-ood-Doula, was not inferior to that of the Theban before Alexander. "Il tira. says D'Herbelot,' de sa poche une piece avec toutes ses parties qu'il distribua aux Musiciens, & continuant à soûtenir leur voix de son luth, il mit toute l'assemblée en si belle humeur, qu'ils se mirent tous à rire à gorge deployée; aprés quoy faisant chanter une autre de ses pieces, il les fit tous pleurer; & en dernier lieu changeant de registre, il endormit agreablement tous les assistans." vid. Art. Farabi. Bibliotheque, Farabi is said also to have written an introduction to the science of Music, which is mentioned in the BILIOTECHE DE TURCHI of TODERINI. " Nell' accennata clusse di Scienze, che contiene cento e venti due 66 volume, l'ottantesimo secondo scritto nell' Indice è un Trattato di Musica del Furabi inti-66 tolato Medchidul Musiki, ossia Introduzione alla Musica." This valuable work of Toderini's, which seems very little known in India, contains a full account of the Arts and Sciences as known to, or cultivated by the Turks and Arabians, including, their Grammar, Logic, Rhetoric, Moral Philosophy, Arithmetic, Algebra, Geometry, Physics and Natural History, Medicine, Chemistry, Astronomy, Navigation, (Nautica, e Nuova Accademia di Marina.) Astrology, Poetry and Music. The work is entitled, Letteratura Turches ca, Studj, Accademie, Biblioteche e Tipografia in Costantinopli. Opera, dell' Ab. Gio. Battista Toderini. Tomo I, II, e III, in Venezia, 1786. The following extract from this work, relating to the Logic of the Arabs, as copied from the Greeks, will corroborate what I have before stated regarding that science.

La Logica, che studiano i Turchi è opera di Aristotele, il quale, come notò Gezali nel suo tibro Monked presso Herbelot, e l'inventore, dell'arte del ragionare, ed il primo, ch' abbia ridotto a metodo questa scienza. Oltre il Ketab Alvias le Aristothelu, ossia trattato del Sillogismo d'Aristotele, tradotto nell'Arabo, e diviso in due libri annoverati nel Catalogo

I have now to offer a few words on the grammatical works here translated, but of their authors unfortunately I know little or nothing. The commentator indeed attributes the Mijut Amil to Abdoolqahiribno Abdirrihman of Goorgan,* whom he styles the most excellent of the learned, but he does not say in what age he lived, nor in what his excellence consisted, and we are left to form our own opinion of his merits, from five pages of Arabic syntax! I find his name however in the Mirat-ool-Junan,† with a few particulars, which as we have nothing better, we must substitute for a biographical memoir.

Abdoolqahir, surnamed from eminence, Alnuhwee, or the grammarian, was of the sect of Shafei, and one of the followers of Abool Hussun al Asharee. Besides the Miut Amil and Joomul, (another introduction to Arabic Syntax,) he wrote a learned commentary termed Almooghnee, in three volumes, upon the Eezah, besides several other celebrated works on grammar and rhetoric, and died in the four hundred and seventy-fourth year of the Hejira, or about the middle of the eleventh century of the Christian era. These facts though a little mutilated, and with some addi-

tions, are given in the Preface to Meninski,* on the authority of Shums-ood-Deen, the author of a commentary on the Joomul, and both these works (the former with a Latin translation,) are said to be deposited in the Escurial in Spain.

Abdoolqahir appears to be the first grammarian, who reduced the governing powers of the Arabic language to a definite number, † and as he lived at a time when Grecian literature of every kind was ardently cultivated in Arabia, and when in fact almost every learned Arab made a merit of studying and copying the philosophical writings of the Greeks, it is not very improbable that the Centiloquium of Ptolemy, ‡ a work, on Astrology, which must have been popular at that period in Arabia, gave him the first hint for the title of his treatise on regimen, and produced the Miut Amil, or Hundred governing powers.

The extreme brevity of the text has occasioned many commentaries on the Mi ut Amil, but that which usually accompanies it in this country, and which I have here translated, is generally supposed I believe to be written by a native of India. D'Herbelot mentions but one commentary

by Ebn Hescham, whose name as a grammarian, he probably confounds with Hoosam-ood-Deen, who is stated in the Kushf-ooz-Zoonoon, to be one of the commentators on the Mijut Amil:* it is possible however, that D'Herbelot alludes to Shuekh Jumal-ood-Deen Aboo-Moohummud Yoosoof, who was also known by the name of Ibn Hisham, but as no such commentary is attributed to him, in either of the Biographical works above alluded to, I feel some hesitation in allowing him to be the author of the Shurhoo Mijut Amil. D'Herbelot however was certainly but very little acquainted

† He calls the Miut Amil, the Hundred Particles! "Abdalcaher, Grammairien celebre Auteur des Aouamel. Ce livre a été commenté par Ebn Hescham; Il se trouve manuscrit dans la Bibliotheque du Roy Nº. 1086, & a été imprimé à Rome avec la traduction Latine sous le titre de Centum Regentes, c'est-à-dire, les cent Particules Arabiques, qui regissent aprés elles des noms de differens cas dans la construction de cette Langue. with Abdoolqahir and his writings, and the account he gives of the Mijut Amil in particular, is a demonstrative proof that he was ignorant of the simplest principles of Arabic grammar.

This is all the information I have been able to collect of the author of the Miut Amil and his commentators. Something more might perhaps have been found had I been more industrious, but I confess I did not think it necessary to toss over half the manuscripts in the College Library, for the purpose of adding one or two obscure annecdotes to the life of Shuekh Abdoolqahir. Neither would the search have rewarded my pains, for Biography is a very different thing in Asia from what it is in Europe. There are no Pater Noster Rows, nor Cadell and Davies's in Arabia, and consequently there are no Boswells nor Piozzis. A grammarian may write five pages of Syntax there, without having five quarto volumes of Memorabilia recorded of him: for who could copy them, or who would read them? The life of an Arabian worthy indeed, is frequently dispatched in a line, and is seldom more entertaining or instructive, than a hic jacet, or a village epitaph. 'His name, his years,' with a ruzeeullaho anho,* or a 'holy text' from the Qooran, supply the place, "of fame and elegy," and constitute the brief memorials of a literary career.+

^{*} رُضِيَ اللهُ عَنْهُ May God be satisfied with him, a pious petition, which almost invariably follows the name of the defunct, in Oriental Biography.

[†] I ought perhaps to apologize for venturing this opinion of Arabian biography, for Sir Wm. Jones, whose authority will doubtless be considered decisive, has given a very different account of the matter. He prefers the biography of Ibn Khalikán, not only to that of Nepos and Laertius, but even to that of Plutarch himself; nay he seems inclined to rank the historian above all the biographers of ancient and modern times. 'Nescio an hic omnibus vitarum scriptoribus sit anteponendus. Est certè copiosior Nepote, clegantior Plutarcho, Laertio jucundior, and so on.—To all of which I can only answer, consult the Biography of Ibn Khalika´n.

Such is the life of Abdoolqahir, as handed down to us by two very popular historians, and the amount of the whole is simply this, that he was an eminent grammarian, that he wrote the Mooghnee, the Joomul, and the Miut Amil, and that he died in the year 474 of the Hejira.

There is no date to the Commentary, nor can I pretend to settle one, I suspect however that it is comparatively modern. The author, at the conclusion of it, speaks of Ibn Malik the grammarian, who died A. H. 672, but if D'Herbelot's information be correct, it will probably give an antiquity of 500 years to the work, as Ibn Hisham is known to have died in 762.

The Mijut Amil must be considered as a mere text-book, in which the governing powers of the Arabic language are arranged into appropriate classes, their grammatical offices defined, and their primitive senses illustrated by easy familiar examples. The commentary is an enlarged exposition of the governing powers, after the precise order laid down in the text, for it preserves the same arrangement of the parts, the same definitions of the rules, and the same examples illustrative of the original force of the terms, adding however to the primitive or current senses, the more immediately consequential or secondary acceptations:—Let us explain by an example.

The Preposition which is the first, in the first class of grammatical agents, is stated simply in the text, to be a Genitive Particle, and one example is subjoined to illustrate its force. The commentator repeats the rule regarding its regimen, but adds its primitive acceptation, which he states to be Union, and this he considers as two-fold: either absolute, as denoting actual coalition or cohesion of parts, or relative, as implying proximity or contiguity of person or place. The first he exemplifies by the phrase which is sick, or sickness is inherent in him. The latter, by the

sentence مرت بزيد 'I passed by Zued.' Hethen goes on to define the collateral and accidental significations of this particle, under the various relations of instrumentality, causality or causation, concomitance or association, substitution or exchange, inclusion or comprehension, with some others, which may be seen by refering to the translation, and each of these senses he elucidates by one familiar example.

This is the general mode of analysis, as adopted in the commentary. The words are all considered either separately or in classes, their original and accidental significations defined and illustrated, and their analogous and anomalous syntactical structures pointed out and determined. The etymological formation of some words are occasionally explained, but this is but seldom, and only in particular cases, where words apparently simple, are shewn to be compound, as its formed from the particle is of similitude and the Pronoun is.

The commentary in short, is a simple introduction, comprising a distinct general view of the essential parts of Arabic regimen and nothing more. To render it however as extensively useful as possible, I have transcribed from the works of several of the most eminent Arabian grammarians, whatever appeared to me best calculated to illustrate the force and application of the several governing powers, and these with my own observations and remarks subjoined to the translation, form a perpetual commentary on the text, which I trust will be found useful.

To these annotations sometimes critical and sometimes explanatory, I have occasionally added others of a more light and miscellaneous nature. They are not indeed of much importance to the work, and might well enough have been omitted, but they amused me at the time of

writing, and may probably amuse others. To extract mirth or humour however out of Arabic grammar, must I am persuaded be looked upon as a hopeless attempt, an attempt perhaps not altogether dissimilar to that on record of certain ingenious people in the Island of Mateotechny, who are said to have employed themselves, in gathering grapes from thorns, and figs from thistles; or of others, who pitched nets to catch the wind, and caught—cock lobsters!*

The original works from which I have selected the materials for the notes are as follow: Shurhoo Wafeea, Shurhoo Moolla, Shurhoo Ruzee, Shurhoo Misbah, Shurhoo Alfeea, Qutr-oon-Nuda, Moofusel, and the Mooghnee-ool-Lubeeb, Of these, the three first are commentaries on the Kafeea; the first by Ibnool Hajib, the author of

the text; the second by Moolla Jamee the Poet, and the third by Ruzeeood-Deen Moohummud of Astrabad. The Wafeea though a very
valuable work, is perhaps but little read; the Shurhoo Moolla, as it is
generally called, is a logical and argumentative comment on the text,
and is every where studied in India, but the commentary by Ruzee (from
which indeed the greater part of Jamee's is supposed to be borrowed) is
the most voluminous and elaborate of all, and is justly considered a
chef d'œuvre of grammatical science,

Moohummud of Asferan; the Qutr-oon-Nuda, by Aboo Abdoolla Moohummud Bin Yoosoof Hisham, and the Shurhoo Alfeea, by Shuekh Aboo Moohummud Abdoolla Bin Abdoorruhman, more generally known by the name of Ibn Uqeel, I have nothing particular to offer. They are all popular works in Arabia, and the latter in particular, seems to possess the same rank in Bagdad, as the Shurhoo Moolla does in India, a fact which is certainly somewhat remarkable, as the former is as a much famed for simplicity, as the latter is for subtilty. The same may be observed of the Mooghnee-ool-Lubeeb, by far the most useful work on Arabic grammar with which I am acquainted. It has supplied me with almost every thing valuable on the particles,

In order to illustrate with greater effect, the practical applications of these most subtle parts of speech, as they are sometimes called, I have added at the conclusion of the annotations on each, an Arabic story, in which the particle will be found to occur under all the senses ascribed to it in the commentary. The natural and popular use of the word will, by this means be better understood, its lighter and more evanescent shades of meaning, rendered more obvious and determinate, and the whole series

of primitive, derivative and metaphorical acceptations exhibited at one view, in an easy and regular scheme of explication.

I have pursued this plan throughout the volume. A story is appropriated to every preposition, and afterwards to every class of governors consecutively. The words thus explained, are distinguished by figures in the original, that the student may be enabled to compare their use with the explanations given in the commentary, and the whole is accompanied with an easy English version.

The stories thus given, are partly original and partly extracted from books, either printed or in manuscript. Those at the commencement of the commentary, were prepared by Suevid Uhmud, a learned Arab, of the College of Huneefu, who accompanied me from Bagdad in the year 1812. The sudden and unexpected death however of this most excellent scholar, a few months after his arrival in Calcutta, deprived me, at an early period, of the benefit of his services, and forced me, reluctantly to relinquish the extensive plan of illustration, which he had himself originally proposed, and by which I had hoped to diversify and enliven my commentary, with much curious and intersting matter. This pleasing scheme however was in a great measure prevented by his death. I had no choice of materials, and was frequently obliged to adopt a number of insipid stories, which under other circumstances, I should certainly have rejected. The most entertaining portion of them were supplied me by an ingenious native of Yemen in Arabia, Nathaniel Sabat,* whose literary talents and acquirements, are well known in India, and for whose useful assistance in this department of my work, I am under considerable obligations.

^{*} At present employed by the Reverend T. Thomason, on a translation of the New Testament into Arabic.

My constant guide and companion in almost every stage of this translation, was Mouluvee Umanut-Oollah, a learned native of India, formerly on the establishment of the College of Fort William, and a more able guide or skilful and judicious instructor, I know not well where I could have found.

For the poetical versions of sundry passages from the Arabian poets, which will be found occasionally interspersed through the notes, I am entirely* indebted to the kindness of my friend Mr. Wilson, the learned and elegant translator of the Megha Duta,† and to Captain Roebuck of the College, who afforded me his assistance in conducting the work through the press, I beg leave to offer my best thanks.

I have no further observations to make on the works here translated, and of the translation itself any observation on my part must be useless; I shall therefore offer none: it may speak for itself or be silent. The typographical errors are indeed rather numerous, and require some apology. I believe they were occasioned in a considerable degree, by the rapidity with which a large portion of the work was hurried through the press, for it is certain, that the greater part of the commentary, with all its appendages of extracts, stories, annotations, &c. were prepared, translated and printed off in something less than five months. I have endeavoured however to rectify these mistakes as well as I could, by a table of errata, which will be found in general to consist of little more than transpositions in the Vowel points. The errors in the English part, are not likely to embarrass the student, and I have accordingly omitted to record them.

^{*} With the exception of the paraphrase in page 48.

⁺ Or CLOUD MESSENGER, a Poem in the Sanscrit language by CALIDASA.

If to the two elementary works contained in this volume, be added the first and fifth Chapters of the Misban,* or rather perhaps a portion of the Hidayut-oon-Nuho, a body of syntax will be formed sufficiently comprehensive for every practicable purpose whatever; but if the student aspires to a higher and more accurate knowledge of the subject, and would understand not only the rules, but the reasons of the rules, with all the delicacies, refinements and peculiarities of this admirable system of speech, I would recommend to him a Grammar of the Arabic Language, by Mr. Lumsden, the Persian and Arabic Professor in the College of Fort William, a work which I am persuaded will be found to exhibit, the most profound and masterly analysis of the language, that has ever been presented to the public.

OF THE

MEEUT AAMIL.

BOOK I.

OF THE HUNDRED GOVERNING POWERS.

ARABIC SYNTAX comprehends AN HUNDRED GOVERNING POWERS, of which some are, ففظي or (verbal;) and some, معنوي or (absolute.)

Of those termed الفظي or verbal, there are two classes: The first, سَاعِي, or the prescriptive government; the second, وسَاعِي or the analogous, which with two of the معتبوي or absolute, comprise the hundred governing powers.*

^{*} A summary view of the whole MEEUT AAMIL is here annexed.

There are an hundred governing powers in Arabic syntax, of which some are verbal and some Absolute. The verbal is divided in two classes, the 1st prescriptive, the 2d analogous. The prescriptive, contains 91; the analogous 7, and the absolute 2, in all 100.

The , or prescriptive government, is divided into thirteen classes.

CLASS FIRST.

The first class contains seventeen particles, or prepositions, which govern the noun alone in the GENITIVE or RELATIVE case. viz.

The PRESCRIPTIVE is divided into 13 CLASSES. The 1st class contains 17 Prepositions which govern the noun alone in the GEN. or RELATIVE (Particles, govern the NOUN in the ACC. or OBJECTIVE and the PREDI-2d CATE in the NOMINATIVE. (Particles, govern the NOUN in the NOM. and the PREDICATE in the OBJECTIVE CASE. 7 Particles, govern the Noun in the objective CASE. (Particles, prefixed to the agrist tense of verbs, change the ruffa of the final letter into nusub. Particles, prefixed to the agrist render the final letter quiescent. (Words, prefixed to the agrist render the final letter quiescent-they possess a conditional or subjunctive meaning, like the particle. (Nouns, govern an indefinite noun in the genitive or relative case, when employed as the TUMEEZ or noun of specification. (Words, called VERBAL NOUNS, of which 6 govern the OBJECTIVE 9 case, and have an imperative meaning; and 3 the NOMINATIVE and (have a preterite signification. (Defective veres, govern the noun in the now. and predicate 10th in the ACCUSATIVE. 4 VERBS OF PROPINQUITY, govern the noun in the NOMINATIVE CASE. (Verbs of PRAISE AND CENSURE, govern generic nouns, with the definite article, in the NOMINATIVE CASE. (VERBS OF DOUBT AND CERTAINTY, govern a double accusative, or 7 two nouns in the objective case, the second explaining or announ-13th (cing some thing regarding the first.

The ANALOGOUS GOVERNORS, are 7, and are as follow; 1st a verb whether active or neuter.

2d A derivative adjective—3d a participle active. 4th A participle passive. 5th An infinitive.

6th A noun governing another in the genitive case. 7th An isme tamm.

The Absolute is of 2 sorts. 1st The Non. Absolute. 2d The Aorist.

CLASS SECOND.

اَ لَنُوعُ الثَّمَا بِنِي حُرُونٌ تَنْصِبُ الإِسْمَ وَتَرْفَعُ الْخَبُّرَ

The second class contains six particles, that govern the noun in the ACCUSATIVE or OBJECTIVE CASE, and the predicate of the proposition in the NOMINATIVE. viz.

إِنَّ أَنَّ , كَأَنَّ , لَكِنَّ , لَيْتُ , لَيْتُ , لَعَلَّ

The ninth class contains nine words, termed or VERBAL NOUNS, viz. nouns having a verbal signification: of these six have an imperative sense, and govern the noun in the Accusative or objective case: viz.

The cardinal number (eleven) for instance, as exemplified in the text, is the mere name of a certain species of quantity, and therefore incapable of conveying to the mind any other idea than a certain aggregate of units. 'There came to me eleven'—eleven what?—men, horses, or dogs? Some word is evidently required to expel the obscurity, or in other words, to separate some specific object from the mass of possibles, in order to give a determinate character to the sentence: this word the Arabian Grammarians have therfore with analogical propriety termed the int or as it may be rendered in English, the noun of specification.

CLASS TENTH.

The tenth class contains thirteen words, termed أَفْعاَلُ فَا قَصِمُ or DEFECTIVE verbs, which govern the noun in the nominative, and the predicate in the objective case. viz.

The class termed قيا سى or analogous, has seven governors, and consists of the following parts of speech, viz.

م الناعل A PARTICIPLE ACTIVE. A PARTICIPLE PASSIVE. ألْمُصْنُ رُ An Infinitive.

ا دُمان (A noun governing another in the genitive case.

A PERFECT OF COMPLETIVE noun; viz. a noun terminating either in تنوين or, what is considered as a substitute for the tunween, namely the noon of the dual or plural number:—or, a noun followed by another in the genitive case: in all which cases it requires the Tumecz, or NOUN OF SPECIFICATION.*

^{*} The government of the above parts of speech will be exemplified in the second book.

OF THE ABSOLUTE GOVERNMENT.

THE CLASS termed (S) or AESOLUTE, has two peculiarities of regimen. Of these, the first requires, in the absence of any verbal governor, the subject and predicate in the nominative case: the second is the Aorist tense of a verb, which, in the absence of certain governing particles, receives the vowel Zummu; or in other words, the final letter of the tense is marked (S).

End of the Meeut Aamil,

At the conclusion of the first book, it may not be unnecessary to offer a few general observations, on the nature, divisions and peculiar distinctions of THE HUNDRED GOVERNING POWERS, a clear and comprehensive conception of which will tend to facilitate, in a considerable degree, the future progress of the student.

The subject of the MEEUT AAMIL, is grammatical regimen, or government; and is defined to be that part of Syntax, which regulates the dependency of words, and the alterations which one occasions in another.

This is divided into two general classes or divisions: the first termed verbal, or the relative or dependent government; in contradistinction to the second, which flows from the sense, and is therefore properly absolute or independent.

In the VERBAL or relative, the word governed necessarily depends on, or is influenced by, some other word in construction: the Absolute is totally independent of all such influence, having the intrinsic power of assuming a certain grammatical character, or indication of case, which in the Arabic language is invariably NOMINATIVE.

the reader is referred to the commutary on this look.

For it must be remembered, that in this language, there is a state in whick nouns are found to exist, before they are distinguished by any marks of annexation, or indications of case, such for instance as the word (deprived of the tunwcen,) which is considered the primary, or radical form of the noun, and must necessarily be connected with some other word in construction, before it can assume any grammatical character, indicative of case. The nominative therefore, which always denotes a certain specific relation, is distinguished by a termination or mark of inflection, significant and peculiar to itself, superscribed over the final letter of the noun in its radical form, as

Under the first species of government, namely the VERBAL, or relative, are included two distinct classes, or the PRESCRIPTIVE, and ANALOGOUS. Of these, the first relates to a certain specific number of words, the government of which is settled and authorized by long usage and custom; while the latter is restricted to the government of a certain class of words, in which you reason by analogy from one to another, and consequently, determine their influence in speech to be every where regular and uniform.

The above remarks will perhaps be sufficient to convey a general idea of Arabic government. For a more minute and particular analysis of the subject, together with the various significations and peculiarities of the hundred governing powers, the reader is referred to the commentary on this book.

HUNDRED GOVERNING POWERS.

BOOK II.

INTRODUCTION.

THE author of the MIUT AMIL* enumerates in Arabic syntax one hundred governing powers, of which some are is or verbal, t and some or absolute.

^{*} The grammatical treatise termed Is is a Commentary, contains agreeably to the literal meaning of the title, one hundred governing powers: these are divided into co-ordinate and subordinate classes, with reference to their general and particular offices, and the author with an ingenuity characteristic of the systematic refinement of an Arabian grammarian has reduced the whole to an exact centenary of governing powers: in this he was doubtless as much influenced by numerical symmetry, as logical or grammatical precision, but the arrangement is convenient and sufficiently accurate for all useful purposes.

⁺ Jai and signification, meaning. The first signifies literally, verbal, and denotes that the government to

The verbal government is subdivided into two general classes, the first named prescriptive "the second analogous". The prescriptive includes ninety-one, the analogous seven, and the absolute two, forming on the whole, one hundred grammatical agents or governing powers.

OF THE GOVERNMENT TERMED OR PRESCRIPTIVE.

THE PRESCRIPTIVE GOVERNMENT IS DIVIDED INTO thirteen CLASSES.

CLASS FIRST.

The first class contains seventeen particles or prepositions, which simply go-

which it is applicable is influenced by words. The second on the contrary as its name imports has, no reference to words, but relates merely to sense: the one is extraneous, the other intrinsic, and both seem properly enough designated by our own grammatical terms, versal and Absolute.

* From the infinitives whearing, and which, as applicable to all irregular grammatical relative nouns and which as applicable to all irregular grammatical agents, may be termed preserriptive, or as this class of irregular governors are more literally denominated by Agaritia Valle, audinitia, quia à magistro audienda.* They may properly be considered as exceptions to the general class of regular governors, and are accordingly restricted in number to ninety-one. The analogous classes will be illustrated in their proper place, and it therefore only remains to be remarked, that the government of the particles extend to all the cases, while some of them possess the peculiar properly of changing the of the final letter of verbs, into which and others that of affecting the sound of the terminating letter, with the mark of the cases and should therefore agreeably to our notions of grammar, be rather included in the rules of presody than inflexion.

vern a noun in the AORIST CASE. They are called 3" or PARTI-

* They are called PARTICLES OF ATTRACTION, because they are said to attract the souse of the antecedent word to the consequent, pointing out at the same time the relation subsisting between both, and for a similar reason are also termed is is significant or connexive particles. They are applied like the prepositions of other languages in a two-fold capacity; Κατὰ παξάθισιν by may of juxta position, and Kara observ by way of composition; viz. some of them are seperable, and some inseperable. They invariably render the governed word , mujkoon, which some grammarians have rendered the Genitive case, but what it may be asked in the genitive case? ' le fils aîné du nomanitif,' says Du Marsais, *-the eldest son of the nominative! ' and is formed to express all relutions commencing FROM it itself,' says Harris, in contradistinction to the dative, which expresses all relations tending to itself.' If this be the true character of the genitive, it is obvious it cannot be applicable to the term mujroor, as the prepositions of from and ill to, govern the same case, though the relations they are formed to denote, are directly opposed to each other. If the metaphorical or rather whimsical language of the French grammarian be admissible, it must be allowed that the claims of this CASE to hereditary pre-eminence are much superior to those of tho fils ulne, as it may be said to inherit a sort of trinal consanguinity, or triplicity of filiation possessing in itself a complex cognation, with its progenitor the nominative, which includes not only the rank and powers of the eldest son, the genitive, but of the two younger also, the dative and ablative.

It might perhaps be called the RELATIVE CASE, if it were not that every case is strictly speaking relative, a case being generally defined by grammarians—the special difference in a noun, according to the different relations that things beer to one another; yet the Messieurs De Port Royal who copied this definition from Sanctius, thave strangely enough, and almost in the same page restricted the term relative to the dative. On a question however merely nominal it is not necessary to be eaptious:—in relevi noluimus esse morosi;—the arbitrary distinctions of language have no essential connexion with he operations of words; the name is seldom found significant of the office. But although 'the equality of words to things be often neglected,' it seems necessary in technical appellations to be as precise as possible:—to the two first terminations or cases of an Arabic noun, the terms nominative and accusative are sufficiently applicable, but the compre-

perties. CASE they say comes from casus à cadere to fall, like the Greek Hràois from Harro—words following (as it were) from the mind or discursive faculty.* This is fanciful enough, and worthy the ingenuity of Harris, and his friends the Peripatetics. But what authority is advanced for supposing, that words when first applied as terms of art, were applied in their primitive rather than in their consequential or metaphorical significations? There is no authority for such a supposition, but authority directly against if. The word casus in Latin is considered synonymous with eventus and exitus, and has many other senses besides its literal one:—case in English is never used in its original import, and Aristotle+ himself applies Ilters, to the variatious of the noun and verb, not only to what we term declension and conjugation, but even to the singular and plural number. But this is not a work for minute discussions on grammatical subtelties and verbal peculiarities, I shall therefore conclude with observing that the

same idea is expressed in Arabic by the word xi, meaning familiarly state, care, &c. which a fanciful grammarian after the usual mode of etymological retrogradation might trace to the verb Ji he turned, inverted or declined, and hence argue that the term was thus significantly applied in grammar, to express the variations, or declensions,* " of a noun from its upright form ()) through its various declining forms." () This is quite as plausible a derivation as the other, but I am persuaded it never entered the mind of an Arabian Grammarian. Who would not smile to hear a physician etymologize on the word case, and inform his Patient, that it signified literally falling, implying as it were the decline or fall of his health from its upright form?—Yet the physician's etymology is every way as good as the grammarian's; or rather they are both good for nothing.

Annotation,

Grammarians have assigned various other relations to the particles , i, besides those enumerated in the text, but they seem all correlative and may be traced to the primary signification or generic idea denoted by the term,

The radical import of this particle is therefore union, whether absolute or relative.

Absolutely, it denotes possitive or immediate union or co-alescence.

Relatively, it implies simple relation of vicinity or proximity of place.

From the generic idea of union flow several specific relations, which may be translated by the following English prepositions.

- 1. With, denoting the instrument or agent, which is expressed in Latin by the ablative case as
- 2. By, or on account of, denoting the efficient or final cause, the means by which any thing is performed; also in swearing.
 - 5. Along with, association, society, or connexion.
 - 4. For, in exchange of.
 - 5. In, denoting the relation between the object contained and that containing it.

It corresponds very nearly in all its relations with the English preposition by.

The various uses of this particle, together with the Cacus amor sui, or tympany of self-conceit are illustrated in the following Story.—The Figures point out their application as explained in the Text.

STORY

A silly fellow observing one morning that his house was ready to tumble about his ears from decay, and being destitute of the means of repairing it, went with a long face of rueful cogitation to his wife, and informed her of his miseries. Now the wife was just as great a noodle as himself,—so says she, why, my dear distress yourself about a trifle? You know you have got a cow worth thirty dirhums, take her to the market and sell her for that sum, I have also some thread which I will dispose of to-day, (and between us both we shall raise the wind I warrant it.)

The man instantly rose up, drove the cow to the market, and delivered her over for sale to the public appraiser of cattle. The salesman shewed her to the by standers; directed their attention to all her excellent points,—expatiated on her numerous good qualities, and in short puffed her off as a cow of inestimable

value:—to all this the wiseacre listened with delight and astonishment;—he heard her praised for qualities that he thought no other cow could possess, and determined in his own mind not to lose so rare a bargain, but purchase her himself and baulk the chapmen; he therefore called out to the appraiser, and asked him at what she was going, he replied at fifteen dirhums and upwards. By the head of our Prophet says the Cappochia, had I known before that my cow was such a prodigy of excellence, you would not have caught me in the market offering her for sale. Now it happened that he had just fifteen dirhums, and no more;—these he thrust upon the broker, exclaiming—the cow is mine—I have the best claim to her! He then seized her, and drove her home, exulting all the way, as if he had found a treasure. On reaching home he enquired eagerly after his wife to inform her of his adventure, but was told she had not returned from market. (There was no remedy but patience, which he despised, so he sat biting his nails in the last stage of the Fidgels.)—At length she appeared, and he sprung up to meet her exclaiming,-wife I have done something to-day, that I believe will astonish you!-I have performed an exploit, that would do honor to the first genius of the age. Patience says his wife; - perhaps I have done something myself to match it; -however hear my story first and afterwards talk of genius if you please. The husband desired her to proceed. When I went to market, says she, I found a man in want of thread; - I shewed him mine, which he approved of, and having bargained for it, he agreed to pay me according to the weight. I told him it weighed so much, which he seemed to discredit, and weighed it himself:observing it fall short of the weight I had mentioned, and fearing I should lose the price I at first expected, I requested him to weigh it over again and be certain:-in the mean time taking an opportunity unobserved, I slipt off my bracelets, and put them slily into the scale with my thread.—The scale of course preponderated and I received the full price demanded. Having finished her story. she cryed out-What think you now of the genius of your wife!* (It must be

^{*} Literally the daughter of your uncle.

recollected says the historian, that the bracelets were of silver and double the value of the thread.) Amazing, amazing, says, the Booby, your capacity is truly supernatural!* and now, if you please, I will give you a specimen of mine, and he related the adventure as above.—Oh husband says the woman, the almighty has favored us in this affair—had we not possessed such consummate wisdom and address, how could we have contrived means to repair our old house? In future therefore annoy yourself no more about domestic concerns; for the Lord is merciful. On my part I shall continue to exert my abilities, and do you the same, and by our mutual talents and dexterity, it is impossible we can want for any thing.

^{*} Frail a sort of encomiastic exclamation of very frequent occurrence in Arabic, and much casier to comprehend than translate. The word signifies literally flowing out exuberantly, as milk from the udder, &c. and was hence transferred to denote bounty, or liberality, as your bounty flows liberally, and laterally to signify natural capacity, indoles &c. The phrase means literally—your flow of milk is by or through God. i. e. your capacity is divine or supernatural.

The few liberties taken with the original will be readily pardoned by the Arabic Scholar, and to any other class of readers it would be useless to offer explanations. The extreme brevity, simplicity, and terseness of the original diction cannot I believe be preserved in our English Idiom; but the solemn gravity of the dialogue defies all power of imitation.

OF THE PREPOSITION.

I. The Preposition is used to denote the Commencement of Interval (ابتدارالغایة)* as applicable to time and space.

EXAMPLES.

I travelled from Busruh to Koofuh.

i slept the whole night, lit. from the beginning المُعْرَةُ مِنْ أَوَّلِ اللَّيْلِ الْيَ آخِرِةِ السَّيْلِ الْي

2. It is used in the sense of partage, or participation, (تَبَعِيْض)

EXAMPLE.

ا كَذُ تُ مِنَ اللَّهُ را هم I took some of the Dirhums.

Annotation.

* The phrase \ddot{z}_{1} would signify literally the beginning of the end, a sort of phrase ology not likely to convey much information; but the Commentators explain this oxymoron, by asserting that the word \ddot{z}_{1} by a* synecdoche is here synonymous with \ddot{z}_{2} space or interval.

The word interval which was originally applied to space, is considered by Dugald Stewart in his Philosophical Essays, as now exclusively restricted to time;—whatever may be the case now (which by the by is a very indefinite term,) it certainly was not so restricted by writers in the two last centuries. It is useless to multiply examples, but with following one from Milton, every reader is acquainted.

"Twixt host and host a narrow space was left,

A dreadful interval,"

يَكُو اللَّهُ اللّهُ اللَّهُ اللَّاللَّهُ اللَّهُ اللّهُ اللَّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ ا

3. It denotes explication, or elucidation, (تبييث)

EXAMPLE

Abstain from abomination, (namely) the aboالْكُوْتَانَ اللَّهُ الرَّجُسَ اللَّهُ الْكُوْتَانَ اللَّهُ اللّهُ اللَّهُ اللّّهُ اللّهُ ا

Annotation.

Besides the above applications of the particle of there are a great variety of others, the whole of which the Arabian Grammarians deduce from the primitive idea Beginning.

The present work will not admit a detail of these various senses; I shall therefore merely notice those of most frequent occurrence:

The particle denotes Causation, as in the following lines of the Poet Furuzouo, in praise of Zuen-ool-Abideen.

Through modesty he bends his looks on the ground; دیشنی حماء و یخنی من ۱۰ با بته الله و در الله الله و با بته الله و در الله و با بته الله و در ا

It is used for مَا عَلَى as مِنْ الْقَوْمِ :- We assisted him against the tribe.

It is used in a peculiar sense to denote termination, bound, or limit, the very opposite of its original signification;—example, I saw him from that place, or I saw him to that place; viz. to the very extent of vision, as we say in English, I saw him from afar. The correspondent preposition DE, in the French language is used in a similar manner to denote opposite relations, as

Approchez-vous De ce poêle, vous vous chaufferez. Eloignez-vous De ce poêle vous vous, bruleriez.

^{*} In the Latin translation of this example, the preposition ex has the same force as e.g. Recedite ab abminatione ex idolis.

4. It is redundant, (زیاک تا)

EXAMPLE.

He (God) will pardon your sins.

Annotation.

The particle as illustrated in the Text, may be translated as follows:

- 1. By the prepositon from, denoting commencement.
- 2. Some, part, &c. denoting partage and also by of;—as we say in English I took of, or from them; viz. I took some of them. In this sense it is always synonymous with
- 3. Namely, to wit, &c. in the sense of Elucidation: in such examples the relative pronoun in Arabic may be substituted for the particle. The above senses will be found illustrated in the following Story:

STORY,

The Calif Haroon Rusheed and his minister Giaffar the barmecide, intent one day on a frolic, strolled out of Bagdad together in disguise. A little way out of the city, they happened to meet an old man with sore eyes, driving along an ass. The Calif gave a wink to Giaffar to smoke him. Where are you bound, my old man says Giaffar? That is no concern of yours replied the other—What says Giaffar, not allow me to prescribe something for your eyes?—I want none of your prescriptions, rejoined the old fellow. Nay, don't say so, says Giaffar, you do require it, and this is the recipe. Take a little wind-wood, a quantity of the dust of water, and some mushroom leaves,* these having well mixed up together in a nut-shell, apply to your eyes, and you will find immediate relief. Upon this, the old man reclined backwards upon his ass, and—\(\beta_{\text{COVTA}} \text{NOPLOSTA} \t

^{*} This is nearly as fanciful a collection of heterogenious ingredients as those in the thunderbolts of Jupiter—" Three rays of twisted showers, three of watery clouds, three of red fire, and three of winged south winds; with terrific lightnings, sound, fear, anger, and pursuing flames, mixed up in the work."

[†] This may perhaps he called an obscure paraphase, but I found it difficult to express the bathos of the original, without descending to the oracular language of Giacoma Rodogina, the engastrymythian prophetess. The French Nuns in the scrupulous chastity of their dialect, have prettily termed it sonnet, but our language admits of no such happy refinement, I was therefore compelled to have recourse to the words of Strepsiades in the Clouds. Vid. Aristophanis Nunes.

OF THE PREPOSITION,

عن

THE PREPOSITION & denotes distance and transition, ()

EXAMPLE.

I shot the arrow from the bow.

Annotation.

The prepositions of and which seem formed to denote ideas radically distinct and inconvertible, do notwithstanding very frequently occur as synonymous terms, and as such act reciprocally in composition without any injury to sense or idiom. Of these, the preposition of, is certainly represented in our language by from, which in common with its prototype is said to refer to beginning, and to nothing else; but for denoting distance and transition, where shall we find an adequate representative? This question has already been considered by Mr. Lumsden in his Persian Grammar, and after an attentive examination of the subject, he decides with his usual judgment and discrimination in favor of the preposition off. The particle of as explained in the Text, is unquestionably represented by off, for both are said to denote distance, and separation,* but the former is used in a multiplicity of relations, widely differing from the radical sense and from each other, and the latter seems restricted in its application to the two significations above mentioned, namely distance and separation, + so that the parity seems merely of an etymological nature, and will it is feared tend little to illustrate the singular powers of the Arabic preposition.

in Arabic is used in a threefold capacity.

^{*} Orr seperationem significat, ut aliquando Latinorum abs, ex; ut abscindo, exuo; cui opponitur on continuationem innuens, (exuo to put off, induo to put or.) Ioannis Wallisii Gram. Linguæ Anglicanæ.

Ore signifies separation and distance. Royal Eng. Gram. by Greenway,

⁺ Ore in truth appears the most uscless preposition in the English Language and might perhaps be entirely dispensed with: 2s an Adverbindeed it is of greater importance and signifying in this character, Disjunction, absence, privation and distance, may perhaps approximate nearer to the various powers attributed to see.

Annotaion.

- 1. It is placed before verbs in construction, and is termed عن مصرية bestowing on the
 - 2. It occurs as a noun, and in this sense is considered synonymous with .; (side, &c.
- 3. It is a preposition, and in this character has ten different applications; at least this is the opinion of the Grammarians of Busruh, for the rival schools of Koofuh allow it no other signification, than that of غناه المستخدة والمستخدة والمست
- 1. The preposition denotes distance and transition, (s;) and may be then translated off, out of, from, from out.
 - 2. It denotes exchange, (15.) answering to _____ for, in exchange of, &c.
- 3. It denotes exaltation, (Jain !) on, above, over,
- 4. It denotes causation, (Jales) through, by, from, &c,
- 5. It is synonymous with Sz,, _____ after.
- 6. It denotes inclusion or comprehension, (ظرفية) in.
- 7. It is synonymous with from.
- 8. It denotes instrumentality, (ai land) with, by.
- 9. It is synonymous with , &c.
- 10. It is redundant, (Esle ;)

To the whole of these various senses, with the exception of the first, the preposition off seems totally inapplicable. The extensive character of from may render it a more general substitute in translation, but it will be found defective in several of the examples and must call in the assistance of other particles.

Annotation.

The radical distinction therefore between o, and o, with their occasional correspondence, and idiomatic peculiarity, do not appear sufficiently illustrated by any two particles in our language:

The Greek however will afford a nicor paradel, on which though a matter of mere curiosity, I may be permitted to offer a few remarks.

The preposition and and in are radically distinct in signification, and like of and of are occasionally substituted for each other. In composition and as well as of is said to denote source or origin, and in from time, cede, is analogous to transition. The first will be found applicable to every use of o, the latter will be illustrated by the following examples.

- ะัน, like ัฐะ is synonymous with after, as
 ะัน บันรับสาร์เลรุ i. e. post consulatura.
- 2. έμ, like the 9th sense of we means with, as,

 έμ πολλε τε περιουτος i. c. cum ingenti excessu. or as the French say, avec beaucoup d'avantage.
- 3. έκ resombles 😅 in its 4th signification, as, έκ τέτεν i. e. propterea, ob eas causas.
- א. fx like ge is frequently used adverbially, as,
- 5. έκ is sometimes explained by the ablative, as,
 έκ θαλάσσης i. e. per mare. έκ τέτε τε λόγε hac ratione.

This sense though peculiar will be found frequently to occur in Arabic: the following example he wever from the law case proposed to Aboo Zued in the fifteenth Muqum of Hureener may be sufficient.

المات في Which would be translated by the ablative absolute in Latin, thus,—

Homo obiit relicto fratre. (A man died leaving a brother &c.)

The parallel if necessary, might be extended, but the above will doubtless be deemed sufficient.

^{*} VIGERUS de Idiotismis,

Annotacion.

It very frequently resembles hors in French and fuor in Italian and in such cases will be translated out of: Take one example out of many from the Live I IKUWAN-OOS-SUFA, where the Dolphin in enumerating his disqualifications for the office of an Embassador says to the King of the fish.

"And I have neither legs to walk with, nor tongue to speak with, nor can I live out of the water even for an hour; but I think the Tortoise is qualified for the task, for he can live out of the water."

The various applications of us as enumerated in page 34, will be found illustrated in the following Story.

فَاوِ تَعَهُ اللهُ نَهِمُ اللهُ نَهِمُ اللهُ نَهُمُ فَهُ اللهُ نَهُمُ اللهُ نَهُمُ اللهُ نَهُمُ اللهُ نَهُمُ اللهُ الله

An Arab presented himself one day before the Calif Mooatusim Billah, Commander of the Faithful. The Calif made trial of his abilities, and finding him in every respect intelligent and accomplished, appointed him one of his suite, and preferred his society to that of all his other counsellors. Now the Calif had a minister excessively envious whose jealousy was excited by the Arab's promotion, but dreading the anger of the Calif if he attempted anything against him openly, he continued to keep up a shew of friendship, determing to effect his ruin by some secret wile or artifice. He continued therefore daily to encrease in civility towards him, and at length invited him to his house to dinner, and mixed up in his food a large

^{*} It is here used as a noun, and means side.

portion of Garlic. After dinner he said to the Arab,-" when you attend the Calif's assembly, take care to sit a distance f.om him, for the smell of the Garlie may offend him." The minister then waited on the Calif and said,-" The Arab whom you made your favorite, and whose company you prefer to ours, has spread about a report that you have a stinking breath." The Arab a little while after made his appearance, and seated himself at a distance from the Calif. The Calif desired him to come near him, which he obeyed, but covered his mouth as he approached with his sleeve. This action confirmed in the Calif's mind the truth of his minister's story and the treachery of the Arab. He thereupon wrote a letter to one of his governors to the following purport.—" On receipt of this letter, let the bearer be immediately put to death." He then sealed it, and delivered it to the Arab saying, convey this to such a one and return to me speedily with the answer. The Arab took it, and in going out happened to meet the minister at the door, who enquired where he was going. He replied the Calif has employed me to carry a letter to one of his governors. The minister immediately conjectured, that the Arab would receive some very considerable present from the governor, and he determined in his own mind, to possess it himself,-" what say you, says he, if I release you from the annoyance and fatigue of the journey, and present you at the same time with two thousand Deenars? Most certainly says the Arab, you speak with judgment and in so doing will free me from a very unpleasant em-. bassy.- "You have shot the arrow of your judgment, with" the bow of unerring direction." So accept the letter. He then delivered it to the minister and received in return two thousand Deenars. The minister proceeded to the house of the governor and shewed him the Calif's letter. The governor read it, and in conformity to the injunction it contained, ordered the minister to be beheaded. After

^{*} It is evident that this example is similar to the one adduced in the text to denote distance and transition; It might therefore be naturally asked why the particle should not have a similar interpretation; I confess I see no good reason for it, but as the Arabian Grammarians think proper to allow it both applications, I have no wish to dispute the point with them.

some days had elaysed, the Calif remembered the affair with the Arab, and said to some of his attendants, enquire after the Arab who was formerly with me, and desire the minister to attend. They told him, the Arab was in the city, but that the minister had gone on a message to a certain governor, and had not returned. The Calif desired the Arab to be called before him, and asked him the particulars of the matter, which be related from begining to end. But did you not says the Calif spread a report among the people, that I had a stinking breath? God forbid says the Arab I should report that of which I am ignorant. Your minister could have only told you this from treachery and deceit towards me;—he dug a pit for my destruction, in to which God has caused him to fall himself,—do not therefore grieve for his fate, for the proverb says, "he who digs a pit for his companion, will full into it himself." Grieve not, for in grief there is no advantage. Unable

And in the psalms IX. 15.

Also in psalms XXXV. 7.

To which may be added the two following from the Persian,

^{*} The same idea it has been observed seems common in every language; Good has produced the following examples, in his notes on Lucretius,

yourself to avoid the occurrence of contingent evils, how do you expect to ward them off others, as the Poet says,

You lament at the untimely fate of another?

But say can you extricate jourself from the power of death!

The Calif was astonished at this marvellous adventure, and saw that the almighty from the purity of the Arab's intentions had rescued him from an untimely end—He exclaimed—Vengeance on the head of the envious man!—Envy where it originates, will surely destroy its possessor. He then bestowed a dress of honor on the Arab, appointed him to the vacant office of his minister, and seated him at the head of the assembly on his right hand.

OF THE PREPOSITION,

الی

1. The preposition را is used to denote the bound or termination of interval, (القاءالية) as applicable to time and space.

EXAMPLE.

I travelled to Koofuh.

Annotation.

There is nothing particular to be remarked of the preposition [1]: it is the correlate of and as applicable to time and place, is properly rendered in English by To, and Till. The senses attributed to it in the text are doubtless those of most frequent occurrence, but there are a few others, which may be probably worthy of a place.

FABLE XVI.

^{[&}quot;You have shot the arrow of your judgment from (or with) the bow of unerring direction." See page 40.] It may perhaps be worth remarking that the same idea is expressed nearly in the same words by Gay.

⁶⁶ Go child, and when your grown maturer,

[&]quot; You'll shoot your next opinion surer."

with with

EXAMPLE,

Annotacion.

1. 31) After words expressive of love, esteem, &c. and their opposites hatred, aversion, and the like, serves to discriminate the agent in the sentence, which in such cases it immediately governs: as in the following example from the Quoran, where the BLOOMING HEBREW BOY in resisting the threats and blandishments of the Chiste Egyptian Dame, exclaims.

66 O Lord, a prison is more desireable to me, than that which (these women) invite me to."

Here the first personal affix, is governed by [1] following the word is more desirable,

2. [1] Is sometimes found in a sense directly opposite to its radical one, namely or beginning, and is consequently in this case synonymous with

EXAMPLE.

6: She says, (i. e. the camel) while I am placing the saddle on her back;—has Inno-Unmura drank of me, and is yet unsatisfied?"

The camel juded and harassed by incessant travel is supposed to exclaim as above, on seeing her master about to remount her, but whether Inno-Unmura was the name of the master, who relates the occurrence, or of some other whose conduct had passed into a proverb, I confess I am unable to decide,—these detached and frequently mutilated passages from the Poets which are constantly brought forward by the Arabian Grammarians in emergency, seem as often to

3. When that which follows (3) happens to be of the same general nature, or genus as that which precedes it, the preposition will then have an inclusive signification.

EXAMPLE.

Wash your hands and your faces to the elbows inclusive.)

Annotation.

require illustration themselves as the points which they are intended to illustrate; and without the aid of comment or context the sense must be often guessed at.

It seems worthy of remark that Till, like [1], in our old authors is found some times to denote with, and from.

EXAMPLES.

Till, denoting, with, in addition to.

The emptyce than oure story sayie.

Come in Ingland in tha dayis,

In that land to ger be dwne,

And to be mad kyng hyr swne,

Henry, the quhilk oure kyng dawy.

And til hym serdis rycht mony,

Keud hyme nerrest ayre to be,

Than of all that reawte,

Wyntown, vii. 6. 230 ...

Till denoting from.

Swa h! saynt margret eftyre syne, a As h! malcolme in ewyn lyne, All our kyngis of Scotland, Ware in-til success yowne discendand.

Wyntown, vi. 19. 139.

See Jamieson's Diet.

In the latter example Jamieson remarks that till is used impreperly for from, and if the impropriety consist in the infrequency of its occurrence, the same may perhaps he said of Uf.

They are both however found in this sense and should therefore be recorded.

4. When that which follows I happens to be of a different class or genus to that which precedes it, the preposition will then have an exclusive signification.

EXAMPLE.

Then continue the fast till night.

Annotation.

3. Ill Is occasionally synonymous with &

EXAMPLE.

"And do not desert me in society, under your threats, as if I were a scabby camel besmeared with pitch."

4. It is synonymous with ain.

EXAMPLE.

"But there is no return to youth, the very remembrance of which is dearer to me, than the most delicious wine."

This preposition may therefore be occasionally translated by, to, till, with, and from. The senses enumerated by the Commentator in the text, will be found in the following little Jeu d'esprit.

STORY.

I never says Furuzduq* experienced so severe a retort, as I did once from a certain Nabathæan. Are you the Furuzduq, says he, whose constant employment it is, to lampoon and flatter the people, for mercenary purposes? The same I replied. Than said he you are sunk in a privy to the very nose. But why exclude the eyes said I?—To enable you to behold, replied he, the abject state, into which your sordid passions have reduced you.

The name is sometimes written Khulikan and the Arabian Etymologists ascribe a reason for each. They say is compounded of it a friend and was; and was; and dismiss, let go, &c. and which in the current dialect signifies enough. This phrase the authous was frequently in the habit of making use of and at length it superceded his real name.

^{*} Furuzouq one of the most ancient Arabian Poets celebrated alike for his extravagance of praise, and bitterness of censure. Some extracts from his writings will be found in the biography of Ibno-Khilukan, 2 work that has been eulogized by Sir William Jones in a strain of amplification, not much inferior perhaps to that of Funuzouq himself:—The passage is so remarkable, that I think it should be laid before the reader. "Porrò scriptoris politissimi Ebn-1-Khalican, opus historicum non magis verborum elegantiú et ubertate commendatur, quam illustriorum poetarum versibus, quibus conspergitur. Ac nescio an hic omnibus vitarum scriptoribus sit anteponendus. Est certè copiosior Nepote, elegantior Plutarcho, Laertio jucundior, et dignus est profectò liber, qui in omnes Europæ linguas conversus produat." A very correct and elegant copy of this work which I procured at Bagdad is now in my possession; it consists of 1266 octavo pages, and \$26 lives, and is considered I believe by the Arabs in general as an impartial compendium of biography, but as to copiousness, jucuadity, elegance, and such other pleasing epithets ascribed to it by Sir William, I fear we must attribute them rather to the partiality than candour of the learned orientalist.

OF THE PREPOSITION,

3

1. The Preposition فرفية denotes inclusion, (ظرفية)

EXAMPLE

ت کال کی الکیس The money is in the purse.

2. It denotes exaltation, or elevation, (Drin!)

EXAMPLE.

And I will certainly crucify you on the trunks ولأصلبتكم في جنوع النّخل of palmtrees.

Annetation.

Besides the above senses, the particle & is found accisionally synonymous with , , , , , , , , , , and , , with some others which are detailed at large in the (). Moognage on Lubers. The example produced by the Commentator from the Queran to illustrate the 2d use of the particle, in the sense of exultation or elevation may perhaps be considered equivocal, the following however will doubtless be deemed satisfactory.

6: A servant informed his master that his Ass was stolen:—thank God says he, that I was not on his back !"

The correspondent prepositions in Latin and Italian have a similar application, as

Equitare in arundine longo, Mittere un anello in dito.

The original sense of the preposition, namely inclusion, is either real or metaphorical—the first has already been illustrated in the example in the text, the latter occurs repeatedly in the following

Sitting down by my side thus address'd me the Devil.

Come Friend speak your mind, what shall I procure you? Would you like a tit-bit from the purlicus of Drury?—
I shew'd by my looks, that I relish'd the bliss,
So I smil'd approbation, and answer'd him yes.

Then he added,—perhaps it will highten your sport,

If I bring with the Doxy some mellow old Port?

Some mellow old Port, I exclaim'd with delight!

Ay, order it straight, and we'll tope it all night.

And Songsters, said he, with such notes as of old,

Made Mrs. Eurydice 'scape from my hold?

Yes, yes, bring us Songsters, said I by the score,

'Till the Welkin in rapture reecho encore!—

But the sooner you bring her, the better you'll please me.

Then up jump'd the tempter and grin'd in my face,

Crying, sink of iniquity, lust and disgrace,

I've prov'd you a scoundrel,— and thus having spoke,

He made me a congè, and vanish'd in smoke.

They relate that AMUR-OOL-QUES, before his decease, delivered over his armour and inilitary weapons to the care of Sumuwwul Bini Adeea. After his death, the

king of Kinduh sent an ambassador to Sumuwwul, to solicit the arms of the deceased, but he refused, and said, I will not deliver up any part of what has been entrusted to me, to any but the lawful proprietor. The king repeated his demand, but he persisted in his refusal, swearing, by the Almighty Gop, I will not abuse the trust reposed in me, nor act treacherously to gratify the king. When the ambassador reported the determination of Sumuwwul to the king, he marched against him with his army; but Sumuwwul retreated into his fortress, and there secured himself. Then the king besieged it, and the son of Sumuwwul happened to be out of the fort at the time, and the king seized him and made him prisoner, and carried him round the fortress, proclaiming to Sumuwwul: I have taken your son captive, behold he is with me—then he shewed him to him, and said, if you will deliver to me the arms and weapons, I will restore to you your son; if not, I will slay him before your face; so choose which you like.—And Sumuwwur said, do as you please, for I will not violate my faith and promise. Then the king put the son to death in the sight of his father. And the king was baffled in his attempts against the fortress, and obliged to raise the siege and retreat in disgrace; but Sumuwwul bore his misfortune with patience, conscious of having performed his duty with integrity; and when the lawful heirs of Amur-oot-Ques arrived, he delivered to them the armour and weapons in his charge, preferring the observance of his promise and good faith, to the life of his own son; and the faith of Sumuwwul became afterwards proverbial.

OF THE PREPOSITION,

1. The preposition أَ denotes paucity, (عَالَيْل) and requires in construction an indefinite noun which it immediately governs, qualified by an adjective or epithet, and a verb in the past tense.

EXAMPLE.

ا رُبِّرُجِل کے یم لقیتنه I visited a few liberal or generous men.

2. It sometimes precedes a or indeterminate pronoun, and in this case governs an indefinite noun as its in the accusative or objective case.

EXAMPLE.

ا رَبَّهُ رِجِلًا لَقَيْنُهُ I visited a few men.

Annotation.

Neither the true character nor meaning of this word seems properly ascertained by Gramma-rians. By some it is considered a noun, by others a particle:—one will have it to signify paucity, another abundance, and for both opinions numerous examples are produced. Moola James, the celebrated Commentator on the Kafeeu, says the word was originally formed to denote paucity, but the author of the Miognee-col-Lubeeb, authority still higher, contends that its proper signification is abundance. From this 'chaos of mingled purposes,' how shall we extricate truth? The task would indeed belong and tedious, and provoke discussions unsuitable to the nature of this work, I shall therefore confine myself to a few observations on its practical application to the purposes of speech.

or ربي in the following sentence from the Qooran, is adduced by the author of the Moognee-col-Lubech, as an example of its use in the sense of

Sale however has adopted the opinion of other Commentators, and renders it thus. "The time may come, when the unbelievers shall wish that they had been Moslims,"—instead of,—' the unbelievers shall frequently wish,' &c. In this he seems to have followed Maracci. "Aliquando, desiderabunt, qui infideles fuerunt, ut fuissent Moslemi." Who justifies this version by the following note. Particula ("") significat tâm [[[]] multiplicitatem; quâm [[]] paucitatem. Potest itaque verti multoties, vel aliquando, vel fortasse. Hoe autem desiderium erit, juxta Gelalem [[]] Die resurrectionis, quando infideles videbunt statum suum & statum fidelium.

In the following verse from رَبِّ , the word رَبِّ, is undoubtedly used in the sense of or paucity.

Annotation.

"There are few Children to whom nature has denied a father, and few parents, who noverthemselves had parents."

The poet in the first hemistich is supposed to allude to Christ, and in the latter to Adam.

after the particle (; is very often understood, also frequently after of and occasionally.

*" There are few men from whose countenance the clouds can drink splendour, as they de from him who is, the proceeder of the orphan, and the support of the poor."

"There are few Cities containing men of exalted prowess and bravery."

When قالان or the prohibitive particle is affixed to با المافق it destroys its gevernment, example, وما المافق أو المافق المافق والمافق المافق الماف

This particle assumes no less than sixteen various forms, the following eight however are those of most frequent occurrence.

It may be translated occasionally, some, a. few, many, frequently, often &c. it occurs in both senses, namely and later in the following extract.

STORY.

A certain scholar called one day upon the learned lawyer ULIYU-BIN-SUEEDIN-ILRUO-KUBANEEYU, and after having paid his respects and taken his seat, said—pray benefit me by some of that knowledge, with which God has benefited you. Attend then said the lawyer to the two following useful maxims. First. There are many things in the acquisition of which men exert themselves, which when they have acquired, they will wish they had never acquired. Second. There are few stratagems more advantageous than alliance.* The man remembered the maxims, thanked him, and went about his business.

2. It is occasionally synonymous with

EXAMPLE.

alle in I passed by him.

Annstation.

The true character of its as well as is imperfectly understood: although I believe at present, it is generally considered as a particle yet the Grammarian & Seehuwuen, and others of high authority. contend that it is a noun, and no hing else. I shall as usual wave the discussion as unimportant, and content myself with offering a few examples of its practical application.

1. It is sometimes synonymous with Zo

EXAMPLE.

piety is of him who believes in God and the last day, and the Angels and the book (i. c. the Qooran) and the Prophets, and who gives money for the love of God, to his kindred, and to orphans, and the poor, and to travellers and beggars, &c." See Qooran. C. ii.

It must be observed however that the words the capable of a different meaning, as remarked by some of the Commentators on the Quoran, who interpret them thus "notwither standing his love of that money," &c.

^{*} Lit .- The son of the road.

Annotation.

It is sometimes synonymous with ex, example from the Quoran.

"That ye may glorify God for having directed you, and that ye may give thanks."

It is synonymous with

Woe to unjust measurers, who when they receive by measurement, from the people demand the full &c. See Qooran. C. Ixxxiii.

It is synonymous with , i as mentioned in the Text.

EXAMPLE

It is just that I speak not of God, any thing but the truth." See Qooran. C. vii.

It is evident from the above examples, that the preposition is capable of a variety of uses, besides those recorded in the Commentary, and there are several others of less importance which I have purposely omitted. The senses however in which it is most frequently found, are included in the following Story.

It is related, that Kisa e was sitting one day in his house, and heard some person call out in the street;—hear O ye people a wonder! the Ass upon which I am now riding is Kisa e the Grammarian, let those that are absent be called that they may behold him. The Grammarian ran out in a rage, to discover who it was that had made an ass of him, and saw a tall fellow with a large head, to whom he went up and said;—pray Sir, how comes it, that Kisa e whom we know to be a man, is turned into a brute? I will tell you says the man,—last night I offered up a

prayer to God for that purpose, in order to release 'Uma from the beating of Zued,' and getting up sometime afterwards to shut the door, I found this very Ass at the threshold, I therefore naturally enough concluded, that my prayer was granted, and that God had transformed him as you see. Kisalee laughed heartily at the supposed stupidity of the fellow, and returned to his house exclaiming.—" La huolu wu la qoowwutu illa billahi!"

OF THE PREPOSITION,

كاف

1. THE PREPOSITION ம்க, is used in the sense of anii, or Similitude.

EXAMPLE.

رَيْنُ كَالْسَانِ Zued is like a Lion.

Annotation.

The Grammarian Seebuwueh with several others believe this particle to be a nonn, synonymous with the word ja, and the reason adduced by them for this opinion is, that it occurs in this character in composition and is preceded by a preposition. Its nominal use however they say is restricted to poetry, but the author of the Moogner-ool-Lureer extends it to every sort of composition, and gives an instance of it in common conversation, and gives an instance of it in common conversation, who is like a Lion." Those who consider it a particle give the following reason, namely that it occurs as an expletive, which is never the case with a noun.

It has some other peculiar uses besides those mentioned by the Commentator.

^{*} בُولَقَة or בُولَقة a verb in the third congugation of increased Triliterals corresponding to the Quadriliteral radicals, possessing the peculiar power termed or abreviating—it signifies " or abreviating—it signifies "There is no power, and no strength but in God."

2. It is sometimes redundant, (زيادي),

EXAMPLE.

آیس کیشا There is nothing like him, (i. e. God)

Annotation.

1. It is used to denote , viz. mutual celerity, or the instantaneous occurrence of

EXAMPLE.

الْوُقْتُ " Pray as soon as the time comes."

It denotes causation and is synonymous with

EXAMPLES.

الله عنه ال

"And remember him for directing you in the right path." (It is here used with the ما مفدرية, or infinitive part.

Some Grammarians however believe that the particle is never found in this sense, but when joined with the sible, or so but the author of the Moognee offers the following example from the Qooran, to prove the contrary. "And therefore certainly the unbelievers shall not prosper." It is not easy to translate the " or particle of astonishment in the above example, without losing the peculiar force of the particle —Maracci renders it—" Papè! certè non prosperabuntur infideles." Sale—" Ahal the unbelievers shall not prosper."

It is used in the sense of the, in answer to the question "How are you?"

Ans. i. e. alle " in health." Several of the above uses are illustrated in the following Story.

حكاية

STO RY

A man of learning was sitting one day at the door of his house, and observed a damsel passing by whose extreme beauty attracted his notice. He called out to her and said,—O incomparable pearl, surpassing in beauty all the women of this world, pray stop for a moment, that I may make known to you something that his come into my mind. The damsel upon this turned round, displaying her pearly teeth in a smile, when he addressed her and said. Truly my heart inclines towards you, and dictates the following verse.

Be bounteous of thy charms for beauty's power,
Boasts but a short and transitory hour.

She answered—How do you do, good Sir?—Here I am—why make any delay? and so saying she walked off and never returned. The poor man sickened in consequence of her absence, and continued till the hour of his death in the utmost grief and anxiety.

OF THE PREPOSITIONS,

is and is

1. The prepositions is and is are used to denote the commencement of an action with reference to past time.

EXAMPLE.

المان المان

" The beginning of my not seeing him was Friday."

Annotation.

In the explication of these particles, or rather particle (for they are but different forms of the same word,) Grammarians are very diffuse. They are compounded as some imagine of and if and if a greably to the authority of Akrush is peculiar to the people of Hajaz, and if to the tribe of Tunkem. By the tribe of Soolymee, they are pronounced in and if the grammatical character also, of if or if has given rise to much controversy; some contending that it is at all times a noun, others that it is at all times a particle; the author of the Moognee however seems inclined to favor the latter doctrine.

AS A PARTICLE.

As a particle it is employed in three different senses.

1. With reference to the past time, it is synonymous with , as exemplyfied in the Text.

*. They sometimes denote the whole time.

EXAMPLE.

I have not seen him these two days, in other ما رأ ينه منذ أو منذ يو ميس

66 The whole period of my not seeing him was two days."

Annotation.

2. When the present time is intended, it is equivalent to ____.

EXAMPLE.

I have not met him this day, or this month, or this year."

3. When a specific or determined period of time is intended it is synonymous with and it.

EXAMPLE.

I have not seen him these three days, or these five days."

AS A NOUN.

and sin considered as nouns, belong to that class of words termed of or nouns of time and place, and as such have a twofold signification, that is, they sometimes denote the commencement of time, and sometimes the whole of the period specified. In the first capacity, they are invariably followed by a definite noun in the singular number, significant of time, forming the answer to the question when? Ex. ** When did you see him?" Ansr.

nouns, take after them, sometimes an infinitive, as—x jan did not see him since his journey." Sometimes a verb in the past tense. Ex.

did not see him since he set out." But never the Futurs.

The Arabic preposition seems to correspond in almost every respect with the English since, which Minsueu derives from the old English sithence, and Skinner from the Latin exhinc; "e et h abjectis, et x facilima mutatione in s transcente." A process perhaps not more extraordinary than that recorded above of size. In like manner, the Latin preposition post, quasi pone est, and the Greek exerta, from êxi ta' post hoc, as well as the French depuis which is supposed to be corruped from post. Several of the above senses will be found illustrated in the following Story.

STORY.

A certain man had occasion once to be absent for sometime from his wife, who loved him with the most excessive tenderness and affection; on his return she said to him;—My dear you are certainly a promise-breaker, for I have not received a line from you since your departure, although you promised to write to me regularly, and 'correspondence they say is half an interview.' Now, I have heard nothing of you during the whole month, and you promised to return in fifteen days: the month you see is finished; this is the night of the new moon.

My soul, said he, you say right.—My intention was certainly to do so, on the day of my departure, but when I set out, my mind was so occupied, with the various

concerns of the journey that I entirely forgot my promise till this instant. On hearing this she repeated the following verses.

PARAPHRASE.

With fiercest flames by love enkindled, burns;
Who veil'd in Sorrow's cold and gloomy vest,
Affection scorn'd and unrequited, mourns?
Whose Passion wakes the wildness of despair,
And mad, accelerates the hand of fate:
Farewell—Eternity relieves my care;
Death breaks affection's bonds, and ends thy hate.

She then stabbed herself with a knife she had in her hand, and died on the spot!

OF THE PREPOSITION.

جني

is used to denote the bound or termination of interval, as applicable to time and place.

EXAMPLES.

الصَاحِ I slept last night till the morning.

I perambulated the town as far as the market
إسرت البلاحتى السّوق place.

Annotation.

This word is considered by all the Arabian Grammarians as a particle, and in this capacity has three distinct offices: these, as of little importance, I shall not here comment on, but content myself with a few observations on its practical application.

2. It is used in the sense of concomitance, or companionship.

EXAMPLE.

التعامِ [I read my portion of the liturgy, along with] قرات وردى حتى الدعامِ

3. It has sometimes an inclusive signification.

EXAMPLE.

ا اللت السيكة حتى رأسها I ate the fish even to the head, i. c. head and all.

Annotation.

STORY.

It is related that a certain Theologian saw the Devil one night in his sleep, and said to him, O accursed, how long will you continue to exercise your wiles on the understandings of mankind? Till the day of judgment, replied Satan, and I have so artfully arranged my plots as to secure success in all my schemes against them. But what is your opinion said the other with regard to Theologians, do you think they will be admitted into heaven unexamined? No, no, said the Devil, by no means, on the contrary, they shall be given to drink of purulent matter,* and shall taste the bitterness of the damned, after this life. He then spit in his face, and the divine roaring out, awoke in a fright.

OF THE PREPOSITION,

s. The preposition وأو , is used in swearing, (قرسم) but is restricted in its application to a noun apparent or expressed.

EXAMPLE.

By Gop, I will never drink wine.

Annotation.

The Grammarians of Koofuh believe that of, is occasionally synonymous with , as in the example adduced by the Commentator in the text; but the author of the Moognee, asserts that in all such cases it is invaciably a conjunctive particle, and that the government of the word immediately following it is occasioned by understood. The preposition of the word immediately following it is occasioned by understood. The preposition of the preposition of the word immediately following it is occasioned by understood.

The expression alludes to a passage in the 14th Chapter of the Qooran, thus rendered by Sale—" Hell lieth unseen before him, and he shall have filthy water given him to drink"—This filthy water, is supposed to issue from the bodies of the damned.

STORY.

The Devil, says a certain Devotee, appeared before me one day in my cell, and accosting me said, by God, you have strayed from the true path, having rejected the enjoyments of this life, for those of an (uncertain) futurity, and do not seem to know that you are squandering away your time in the performance of that of which God is altogether independent, for after this life you are nothing but clay—By God I will certainly deceive you.—By the Lord of the sacred Temple, I will most undoubtedly lead you astray. He then vanished from my sight, and I saw no more of him.—O Lord protect us from him!

Annotation.

The author of the 3 Zoo, (a well known Commentary on the Land Missau) believes that the particle; is, as used in forms of adjuring or obtesting, is exclusively appropriated to the word All, and the language of the text seems to favor this opinion; but the author of the Moognee, whose authority on all grammatical questions may be considered decisive, admits of no such restriction in its application, and says it may be prefixed not only to the word All, but also to the various epithets or attributes of God, as a considered decisive, acc.

The particles of swearing are (,), (), (), and but the three first are of most frequent occurrence. EXAMPLES.

By God Zued most certainly stood. والله لَعَدُ قَامَ زَيْدٌ By God I will certainly do so.

5. If the sentence be negative, (iii) and the verb in the past time, it will be preceded by the particle Lo.

EXAMPLE.

By God Zued did not stand.

6. But should the verb be in the acrist tense, it will require one of the three following particles, namely, L., Y, J.

Besides the above particles there are some nouns, such as sellife, age, &c. size duration, continuation; the book, i. e. Quoran; the temple; an eath; and happiness, or the pl. of care, an oath, which are used in solemn forms of swearing.

The Arabic word games a tunic, xerwe, is found with little variation in several languages; thus in French, chemise; Italian, camiscia; Spanish and Portuguese, camisa; Hinden kumeez, and Bengalee kamiz. Like its Synonymes in English and Latin, namely shift, and procletta, it seems to have an equivocal meaning, and was a dress peculiar to Arabian devotees.

[I made religious admonition a net.] This will remind the reader of a similar metaphorical expression in the new Testament (See Math. Chap. 4. v. 19. and Mark Chap. 1. and v. 17.) καὶ ποιήσω ὑμᾶς ἀλιεῖ; ἀνθρώπων, and I will make you fishers of men.

CONCLUDING REMARKS ON THE PREPOSITIONS.

The preceding view of the Arabic prepositions, will be found to contain almost every thing essentially useful. The Annotations are intended to convey a more precise and accurate notion of their extensive force, and the Stories and Extracts will illustrate their practical application to the purposes of speech. Minute discussions on their orgin and grammatical character, I have purposely omitted, not that I consider such discussions, as either useless or uninveresting, but that I am disposed to believe they are unsuitable to the nature of the present work. Theoretical disquisitions are good in their proper place, but they are not in their proper place in an elementary treatise, which should aim rather at the illustration of specific rules, than the discovery or examination of abstract principles.

CLASS SECOND.

1. The second class contains six words, termed proposition, governing the Subject in the Accusative or objective case, and the predicate in the Nominative, viz.

لَعَلَّ , لَيْتَ , لَكِنَّ , كَأَنَّ , إَنَّ أَلِيْ

Annotation.

The particle of governs generally the subject of a proposition in the accusative or objective case, I say generally, for examples are produced in which it is supposed to govern both terms in the accusative. The following examples may be sufficient to illustrate this.

Approach at night when darkness spreads her sable wings,

But let your steps be silent and cautious, for our centinels are truly Lions.

And in the following example from the in a or traditionary records of the Prophet.

" Verily the depth of Hell is equal to a seventy years Journey."

MILTON in like manner measures space by time.

46 Nine times the space that measures day and night To mortal men."

It is worth remarking that the three great Poets, Homen, Vingil and Milton, have all exerted themselves in extending the idea of the depth of hell. Homen makes it as far beneath the deepest pit of earth, as the heaven is above the earth. II. viii. 16. Vingil twice as far, Aln. vi. 578, and Milton thrice as far; their efforts are commendable no doubt, but not to be compared with the more magnanimous flights of a modern Bard.

2. Of these, the two first, namely in and if, are used, to verify, or corre-

See the new THEATRUM POETARUM.

It must be remembered that instances of the above government are by no means numerous, and that grammarians have accounted for the anomaly on other principles, which however I do not deem of sufficient importance to repeat:

The word governed by , is sometimes a pronoun understood.

EXAMPLE.

384

أَنْ مَنْ يَدُ خُلِ الْكُنْمِسَةَ يُومًا وَالْكَنْمِسَةَ يُومًا وَالْكَنْمِسَةَ يُومًا

"Whoever enters the Synagogue, will certainly find in it beautiful youths of both sexes."

The Arabian Grammarians will not allow the pronoun in the above verse, to be the word governed by the particle, but a understood, viz. of for in the above verse, to be the word governed by the particle, but a understood, viz. of for in the above verse, to be the word governed by the particle, but a understood, viz.

The particle is sometimes written without the Tushdeed with the Noon Sakin, or quiescent; and in this form has seldom any government, but the grammarians of Koofuh believe that in all.

3. The third is of in the sense of similitude, or comparison.

EXAMPLE.

عُنْ الْسَدُ " Zued is like a lion."

Annotation.

such instances it must be translated negatively, example "Lidition," Zued is not but going." But this it may be presumed is a distinction, without a difference, for, "Zued is not but going," and "Zued is certainly going," convey in fact the same meaning.

OF THE PLACE OF SIN COMPOSITION:

Grammarians have assigned the following five places to in composition.

- 1. It commences a sentence, as (3) (3) "Zued is certainly standing."
- 2. It follows the various tenses derived from Jos as Tislas in Jose .
- - 4. It is found in that sentence the predicate of which is preceded by the gy of corroboration.

5. It precedes the _____ as already explained.

EXAMPLE.

"By God Zued is certainly standing." وَاللَّهُ إِنَّ يُدَّاقًا وَمِ

OF THE DERIVATION OF

The Arabian Grammarians have amused themselves in tracing the origin of this word, but have produced nothing satisfactory. Their principles of derivation, if indeed they can be sald to have any such principles, are so whimsical and extravagant, that it may be doubted, whether they can be matched by those of our most funciful European Etymologists. They seem to pay little regard to the original sense of the term, from which a word may be derived, and make no scruple to refer it to any word, or indeed to any phrase, provided.

4. The fourth is in the grammatical sense of in the first branch of a compound to explain some uncertainty supposed to exist in the first branch of a compound proposition, it can therefore only occur between two sentences, distinguished from, and constrasted with each other, by reason of some opposition contained in them, or denied by one of them.

EXAMPLES.

"Zued is absent but Bukur is present." غَابَ زَيْدٌ لَكَنَّ بَكُرًا حَاضِرُ (مَاجَاءَنِيْ زَيْدُ لَكِنَّ بَكُرًا حَاضِرَ "Zued did not come to me but Oma did."

Annotation.

they are able to point out by the laws of permutation, the causes by which such a change may be legitimately effected:—for instance they derive the word [6], (but,) from the sentence [6], i. e.—" whatever may happen,"—or,—" in whatever state things may be," by rejecting the last three words and subjecting the remaining one, (1,40) to all the evolutions of grammatical change.* By some grammarians [6] is supposed to be compounded of the negative particle [6] and the first personal pronoun [6], as the Arabs are known occasionally to mke use of the expression, [6] [7], equivalent to [6], "I am not standing."

j is also a verb and its derivation is accounted for in seven different ways.

- 1. It may be the 3d pers. plur. fem. of wif lassitude, weariness, as in the example will, i. e. with "The women were fuligued," the original form of the word will having undergone the necessary changes established by the laws of permutation.
 - 2. It may be referred to originally originally.
- 3. Or the 3d pers. mas. pret. pass. from si i complaining: being originally in the pass.

^{*} This is pe haps as happy an Etymology as King Perin, from the Greek δοπες. Thus, δοπες - έπες - δπες - Diaper - Napkin-Pipkin-Pippin-King-King Perin. See Div. Purky. Vol. 1, p. 130.

5. The fifth is شناً, and is used to denote supplication, or wishing, (دُنْهَانَيْ).

EXAMPLE.

الیک زیل آ قام equivalent to, "I wish Zued were standing, or, I desire اَ اَتَهَمَّنَى قِيمًا هَمَّا اللهُ اللّهُ اللهُ اللهُ

Annotation.

4. Or the 2d pers. imp. act. voice, from the same verb. being originally

5. The 3d. pers. plur. f m. imp., act. voice derived from وراً. Synonymous with تربية عند vicinity. The imper. being originally

7. And lastly it may be 3d pers. sing. imp. fem. with the Noon of corroboration, from the root promising, stipulating, &c.

The rules of permutation by which the above changes are authorised, I have purposely omitted; they would have swelled out these notes to a disproportionate size, and can not be necessary to the regularly instructed Student.

Grammarians have discovered another use of which they term concessive, or responsive, and as such it is Synonymous with it; to illustrate which they produce the following

EXAMPLE.

 6. The sixth is فَكُو denoting hope, or expectation, (عَرَ الْعَرَاقِ).

EXAMPLE.

نَّا السَّلْطَانَ عَالَ لَ " Would that the king were just."

"Annotation.

"It is related that Foozalun Isni Shureek, waited once upon Isnooz Zoobuer, for the purpose of soliciting his assistance on some emergency, and addressing him said; truly my camel is wearied. Then let her rest herself replied Zoobuer: but the fatigue of the road rejoined the other has made her thirsty. You had better give her something to drink continued Zoobuer—I am not come to you exclaimed the other (in a passion), to solicit medical advice, but to ask for assistance.—The curse of Goo on the camel that brought me to you! Yes replied Zoobuer, (coolly) and her rider into the bargain."

The particle with the Humza Mustoohu, or marked with the vowel Fut hu is properly a derivative, or different form of governing the subject in the objective, and the predicate in the nominative case. When joined with the zille it acquires a restrictive sense, termed by Arabian Grammarians if it is, the restriction or limitation of the opening of the opening in this respect with the particle liss. Example from the Qoorage.

" Say (O MOOHUMMUD)! no other has been revealed to me, than that your Gon is one Gon."

is considered occasionally Synonymous with Jul.

EXAMPLE.

" Come to the market, perhaps you may purchase something from use"

The particle of is never found to commence a discourse.

7. The distinction between بَيْتَ and الْعَلَى is this: نَيْتُ is used to express a wish either possible, or impossible of attainment, as in the example already recorded, and the following.

" Would to God that youth would return."

Amedation.

OF THE WORD E'S.

The true origin of this word seems little understood, though I believe it is generally considered by the Arabian Grammurians as compounded of the speaker on all such occasions being similitude or comparison, he would naturally commence the seatence with a word expressive of such similitude, thus word hence with the slight change of Kusruh into Fuths, would evontually be produced the word uncompounded particle.

OF THE VARIOUS SENSES OF THE WORD 5.

has four different significations.

First. It denotes Similitude, (x,) and this no doubt is its most general acceptation, though some grammarians have discovered, or think they have discovered a very subtile condition attending it in this character. The Predicate of , in the sense of similitude, say they, must belong to the class of primitive nouns, termed , is as if if if , &c. but if to that of derivative nouns, (x,) or to nouns of time and place, (if) the word will assume the sense of doubt or uncertainty.

8. But ican only be used to express the hope, or expectation of some event of possible occurrence.

Annotation.

EXAMPLES:

3. It occurs also in the sense of verification, (agreeably to the opinion of the grammarians of Koofub.

EXAMPLE.

"He entered Mukku in the morning horror struck, (at its deserted appearance).
For Hoosham was no longer in the country."

In the above verse & & is supposed Synonymous with & x.

4. In the sense of approximation, (تقریب).

EXAMPLES.

الشَّمَاءِ مَقْبُلُ The winter season will soon, or is about to visit you.

You will shortly enjoy pleasure, or pleasure is about to visit you.

Is a verb of the 3d class of increased quadriliterals, and signifies also, his hair stood upright; also he shrunk from fear, See.

9. The above six particles, when joined with the asies, or prohibitive particle Lo, lose their governing power.

EXAMPLE.

Verily there is no God but one God."

Annotation.

The time approaches when you must depart this world,

for an everlasting residence hereafter.

OF THE WORD

Furnal is of opinion that is is compounded of is (with the Noon quiescent,) and the particle is particle is the Hunzu being removed, cuphonize gratia, and the Noon rejected in consequence of the junction of two homogeneous letters under the sign Idgham. This however is contrary to the doctrine of the schools of Edstuh, who consider it an uncompounded primitive. On the other hand the grammarians of Koofah, maintain that it is a compound of the negative X, and is transferred to Kaf, being an explotive;—thus,—with the Kusruh, of Hunzu, is transferred to Kaf, after rejecting the vowel point of the Hunzu, and the pleonastic letter being omitted leaves is a that in the sentence rejects the etymology on the plea that by this change, the sense of the sentence would be entirely altered, converting a discretice or adversative proposition into a conjunctive, both members of the compound being thereby rendered negative.

The word is also written with a single Noon, quiescent thus in but grammarians seem divided in opinion, whether it should be considered merely as a different form of independent primitive; it is frequently accompanied by the conjunctive particle, the insertion or omission of which is guided by sundry conditions which I omit recording, as unprofitably minute.

OF THE WORD CALL

It occurs in the following beautiful verse of Sucern Supune in the 19th Story, and Sin Chapter of his Goolistap.

Sir William Jones, has quoted these lines in his history of the Persian language, in a manner that destroys the versification, and embarrasses the sense, by the introduction of the conjunction, in the second, and of in the commencement of the fourth line; as the measure terminates on the penultima of the word in the final syllable of which, (i. e. 15), by the figure Dialysis,* must in reading be made to commence the following line, thus:

me has also mistaken the sense of the two first lines, taking the relative to for a negative particle, and the word to for a turtle dove. The word to with the first letter Muksoor and the second Muftooh, signifies properly a meadow, the resort of funns, and is hence transferred to denote the abode of beautiful damsels, () and in the second line, with the Muftoohu and Meem Muksooru, is a contraction of the first line generic term for pigeon, of which the first line delicium, and in the second campestris, thus:

Illud quod do mentione delicit ad auras meas pervenit,
Si turtur quoque campestris, audiret, mili congemeret."

OF THE WORD J.

The word Je denotes contingency in some event, in a twofold manner.

First. Hope or expectation, (عُو قَعَ) of some contingent good.

Second. Fear or dread, (isis) of some contingent evil.

CONCLUSION.

The above six words are termed find letter three or four. 2. Having their similarity in the number of letters composing them, being either three or four. 2. Having their final letter like the preterite of verbs, marked Mastoch, i. c. with the vowel point Futhu; and lastly from

their taking after them two nouns which they immediately govern, tike transitive verbs, the sense of which they respectively assume.

EXAMPLES.

The word signifies in the past time: 1. He followed, comprehended.

2. Intransitively, he arrived or reached the age of puberty, as a boy, signifies. 1. He wished to follow. 2. He comprehended. 3. He restored, amended or repaired, as in the phrase signifies. 1. He wished to follow. 2. He comprehended. 3. He restored, amended or repaired, as in the phrase signifies. 1. He wished to but in English by Horne Tooke,—namely to boot, superadd, &c. The latter sense namely reparation, or restoration, appears most saitable to the grammatical term of a sampled to the conjunction whose office is properly the restoring or amending as it were, of some doubt or uncertainty originating in the first branch of a compound proposition which meaning may be illustrated by the ingenious remark of the Abbè Sicard. "Ainsi, après l'énonciation d'une première proposition, trouvant un obstàcle, ou un empêchement à l'exécution de ce qu'on vient de dire, on semble avertir l'auditeur on le lecteur qu'il faut s'arzêter; on lui diroit, en Latin, sede (sed) arrêter: il ya ici une restriction, un changement

à faire; en grec, Αλλά; il y a, ici, une borne, un achoppement; en anglais, but; il y a un plus, un point majeur à examiner; enfin il y a en français, un Mars."*

the reply, (which infact included the whole of the Servile letters), said, I attend you regularly every day but never remember asking you any such question. The Shuckh replied, A'yuom tunsao, (i. e. to day you forget). No, said, the student, I do not forget. O blockhead! exclaimed the master, what, you are still in the dark! I heartily wish you were changed into an ass, for I have told you them twice. The scholar on hearing this was ashamed of his want of comprehension, and returned home, repeating, as he went along. Would that the Almighty, had granted me capacity.

A certain King of Persia had grown so excessively fat, that though naturally of a graceful form, he resembled in size more an elephant than a man. His Physicians in consequence tried various expedients to reduce his enormous size, but their efforts had no other effect than to encrease it: in this state, a certain eminent Physician waited upon him, and said, I will undertake to prescribe for your Majesty, provided you allow me three days to consult your horoscope, and determine on some medicines suitable to your case; perhaps through the aid of the Almighty I may effect your recovery. At the expiration of the time required, the Physician waited upon the King, and said, I have consulted the aspect of the stars, and observe that you have but four days more to live: when I saw this your approaching destiny, I was much troubled, would to God I had not seen it. If you doubt my words, let me be confined close to you and treated agreeably to the event of my prediction. Then the King gave orders for his confinement, and began to prepare for death, discarded all his former amusements, excluded himself from the eyes of mankind, and

And when the appointed day arrived, the King called the Physician before him, and spoke to him on the subject. The Physician replied, I made use of this stratagem, in order to reduce your corpulency, for I knew that until this occurred, no medicines would be of any avail, but now I may prescribe to you with effect. Then the King ordered him a dress of honor, and gave him a suitable reward.

CLASS THIRD.

The third class, contains two particles, which resemble the imperfect verb possessing like it a negative signification. They precede both TERMS

of a proposition, and govern the noun or subject in the NOMINATIVE, and the PREDICATE in the OBJECTIVE case.

Annotation.

CONDITIONS ATTENDING THE GOVERNMENT OF L.

1. In the sentence in which it is employed, the PREDICATE must not precede the SUBJECT in the order of construction, otherwise its government is cancelled.

EXAMPLE.

2. The subject must not be preceded by the particle of, as an expletive.

EXAMPLE.

3. The word or sentence immediately connected with the predicate, must not precede the aoun of Co, in the order of construction.

EKAMPLE.

If however the Jora be a Zurl, or a noun in regimine, the government will be preserved.

EXAMPLES.

المنت المنتاء عند المنتاء الم

^{*} To preserve the government, the natural order would be should be

Of these (is used indifferently with a definite or indefinite noun, & with an indefinite only.

EXAMPLES.

تَازَيْنَ قَارَبًا " Zued is not standing." لَا رَجُلُ ظَرِيْغًا " No man is ingenious."

Annotation.

4. The particle 31 must not precede the PHEDICATE, otherwise the government is destroyed.

EXAMPLE.

Jon XI X " MOOBUMMUD is not but a Prophet."

The word La as a relative, indicative, prohibitive, and interrogative particle, has a great variety of senses, attended with numerous grammatical distinctions, which cannot well be detailed here.

OF THE PARTICLE &.

The resemblance subsisting between & and the defective verb is, is considered by Innoce Hajir, in his Commentary on the Kapera, as inferior to that of is as it is not formed like it peculiarly to denote present negation; is seldom found with a definite noun; and cannot be used in a sentence the predicate of which is preceded by it as an explctive: for these reasons it possesses a much more limited government than is, and some grammarians go so far as to deny it any government but in poetry. As an Agent however it is guided in its application, by the same conditions already recorded of is, with the exception of that relating to is a redundant particle preceding the predicate, in which form of construction it can never be employed.

y preceding an indefinite noun has the force of a Universal Negative, as in the example مَعْ رَجْلَ فِي اللهُ الرِّ اللهُ الرِّ اللهُ الل

As grammarians however have observed a nice distinction between y in the character of is and y when synonymous with the verb I shall endeavour to state in as few words as possible, the grounds upon which they suppose this distinction is founded.

The term wish signifies literally negation of the genus, and as applicable to the particle χ in such a phrase as χ , conveys a total denial of every individual comprised in the general term χ , i. c. 'no man is in the house;" and is therefore properly distinguished from χ when resembling the imperfect verb χ it's office being simply to denote individual, or particular negation, of one or several from a general Class. Now as the negation in the above example is complete and universal, it is obvious that the proposition expressive of this negation, cannot be followed by a conjunction in or ler to restrict or qualify the general term; for example after the words χ χ "no man is in the house," we cannot add χ χ χ "no man is in the house," as this would in fact be a palpible absurdity; but the case is different with the same particle when Synonymous with χ which as has already been observed, is used to denote not universal but particular negation, and therefore we may say with propriety χ χ χ χ "no one man is in the house, but two or more are in it."

It must be observed in the above example, that the noun of N in the character of which is assumed over its final letter that indeclinable mark fut hu, whereas in its verbal capacity, it governs (under the conditions already specified) the subject in the nominative, and the predicate in the objective case; this the Arabian Grammarians account for in the first instance, by supposing an Ellipsis of the preposition of the comprehensive Min, in such a sentence as the following, termed with the formula of Grammar assumes fut hu, and this they allege as authority for ascribing to the particle & univers lity of negation, in all such sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the sentences, which they consider as responsive forms of expression to the question with the first particle.

The particle as a Universal Negative has the same government as of provided, first that the following noun, or noun affected by the negation, is connected with another word in the zorist case, i. e. in regimine, or has any connection of a similar nature to a noun in regimine.*

EXAMPLE.

In regimine. צׁ שׁוֹ בִי בִּנְ שׁנְבָּנ אֹנָ אַ No man of liberality is now existing,

is the common responsive negative and is directly opposed to as in the following elegant couplet.

1 saw a fawn upon a hillock, whose beauty eclipsed the full moon; I said, what is thy name? she answered Deer. What, my Dear? said I, but she replied, No, No!

It is impossible to preservo in a translation the delicate play on the words in the first means literally a pearl, the second a repetition of mine, or for me, and the last a reduplication of the negative no. This species of paronymous composition is very common in the writings of the Persians and Arabs, and seems to have been practiced occasionally by the ancients: Vossius in his rhetoric has given numerous examples of the paronomasia from the Greek and Latin poets, others will be found in Aulus Gellius, Plautus and Ennius &c. which the reader if inclined may consult with pleasure. In the mean time I shall content myself with offering a quibble of rather a different description, the effect depending entirely on the ambiguity of homonymous words.

^{*} Any word connected with another so as to render the sense complete is termed, عِلْلَقِمَا فِي مَا مِعَلَلْ فِمَا أَلِي عَالْمُوافِي وَ * Any word connected with another so as to render the sense complete is termed,

By the first (in the order of the original), is meant a cunuch or hermaphrodite, the second a but :*
the third the sambucus or elder-tree, + and the latter the pumice stone, about the nature and origin of which naturalists are not agreed.

OF THE PARTICLE ST.

The etymology of this particle has given rise to a variety of discordant opinions, which I shall briefly notice as a matter of curiosity, if not of instruction. The grammarian Uknpush, says it is nothing but y with the paragogical [j marked with the vowel point Fut, hu, in consequence of the junction of two quiescent letters, and the author of the Uozun, (a) ascribes to it the same government with hut but restricts its application to the word which some grammarians consider as comprehending all nouns of time, such as zelw, which some also the opinion of Iano Mullis in his laws.

One peculiarity attending it is, that in the sentence in which it is employed, either the subject, or predicate must be understood; the common practice of the language seems to authorise the rejection of the subject, as "This is not the time for flight." In which is understood, but on the other hand several grammarians contend, that it must be the predicate. The point is not worth discussing, and therefore we shall let it rest.

يَّ by some is derived from the infinitive آيُّ loss, damage, Synonymous with يَعُونَ, and is regularly declinable as يَلَيْتُ لاَتُ . This derivation is plausible enough and is attributed to

^{*} LOCKE says it was long seriously disputed whether a bat was a bird or not.

Others again refer it to wal in the past tense, the Ya being changed into Ulif, and we into

ווים על עומים עומ

mentary, indeed it is to be feared I have already explained more than is necessary, I shall therefore close this annotation, with one or two miscellaneous remarks.

The intensive or corroborativo negative which in Greek is effected by two or more negatives is provided for in Arahic, by a poculiar form of conjugation i. e. by the adjection of the prohibitive χ and Neon Sukeela subjoined, as with the following passage from Demos heres. But this it must be remembered is applicable only to prohibitive forms of expression. It is curious to observe the concourse of negatives in the following passage from Demos heres, Cubenote outly γένηται των δεύντων. Nothing that is necessary will ever (or never) be done, which however is not more remarkable than the following attributed to a cockney who had lost his hat—12 Did nobody see nothing of never a hat no where 277'

The particle is in almost all its various, and evens opposite relations, bears a striking resemblance to the Greek Me, as X and of do to ob: to illustrate the latter remark, I shall offer the f Howing little extract from Plutanch as quoted by the Messieurs De Port Royal, not indeed so much for the purpose of elucidating a point of comparatively no importance, as to introduce to the rader two very successful and spritted versions of the original into-Arabic, by Shuekh Unmed, a learned native of Yemen, at present attached to the College of

Fort William. The first is in prose, and will be found literal and elegant; the other is in verse, and in verse of a very sweet and harmonious texture, which aided by the solemn recitative of Arabian enunciation, has I confess on my ear, a very melodious effect.

A certain Chieftain of the tribe of Bunce Ajil, had two sons, one of whom was rich, the other poor. To the rich one he was kind and partial, to the other indifferent. The old man replied. He can be of no service to me-if he possess accomplishments they will be of service to him: as for my other son, I am partial to him from necessity, and he has no occasion for any thing of mine, as the poet has justly said.

CLASS FOURTH.

The fourth class, contains seven particles, which govern the noun in the OBJECTIVE case, viz.

L. The Particle 1, synonymous with Zo-

EXAMPLE.

The water was equal with the wood.

Annotation.

The Particle ,1, as synonymous with za is like other Particles a subject of controversy with Grammarians, some contending for its government, and others denying it, and both parties producing arguments and quotations to defend their respective opinions. The author of the 36 says the government usually assigned to , is properly owing to some preceding verb, either expressed or understood in the sentence, as in the example سرت وزيداً 'I travelled with Zued.'

It always in the above sense, denotes society or companionship, and is found to occur three different ways in a sentence.

1. It is preceded by a verb, as سرت وزيد I travelled with Zued? Or by a word resembling a ب verb in sense, as, مَالِكَ وَرِيْدَا i. e. مَالِكَ وَرِيْدا What are you doing with Zued?

I used in the sense of _ irst is or exception, in two ways. The first is termed or homogeneous, and signifies in its grammatical sense, that the or word following the Particle of exception, is of the same species, or homogeneous with the air (sitime or word preceding the Particle.

EXAMPLE.

The tribe came to me, except Zued.

The second is termed منقطع and signifies that the فيستثنى and signifies that the must be heterogeneous or dissimilar in their nature.

EXAMPLE.

The tribe came to me except the Ass.

Annotation.

- 2. By a Participle active, as, آناسيا دروالنيل I descended, or went down with the Nile.
- 3. By a Passive Participle, as, آلْدُ قَدُّ مَتْرُو كَيْرُ وَنُصِيلُهَا The Camel is let loose with her young one.

OF THE PARTICLE I.

The Particle & sis used in the sense of first or exception, and is considered synonymous with the following words:

Of the above synonyma is written in three other different ways, namely was is written in three other different ways, namely Particles, and and nowns.

The word six a Passive Participle, and means literally excepted or excluded. six a six and means literally excepted or excluded.

The following words, viz. اَلْهَ رَحَ الْعَدُو الْعَدُو الْعَانِ عَلَى اللَّهُ عَلَى اللَّهُ اللَّهُ اللَّهُ اللَّهُ are called or vocative particles, and are used in the following manner:

Whether the object addressed is distant or near.

When the object is distant. وَمَا عَمَا الْهَا وَالْهَا الْمَا الْهَا وَالْهَا الْمَا الْهَا وَالْمَا الْمَا لِمَا الْمَا الْمَا الْمَا الْمَا الْمَ

The above five Particles, when they precede a noun in regimine, govern the or Governing Noun, in the accusative or objective case.

EXAMPLES.

مَا عَبْدَا لَا الله {O slave of God, (or as a proper name) O Abdoolah!

Annotation.

That from which the exception is made. may be translated homogeneous: heterogeneous; the Grammatical distinction between these terms is obvious and useless, and requires no further explanation.

The المستثناء invariably requires, that its مستثناء should either be a plural noun, as أَدُنَى الرَّا اللَّهُ اللَّهُ وَاللَّهُ اللَّهُ اللّهُ اللَّهُ اللَّا اللَّهُ اللَّلَّا اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللّه

The Line is rendered Nusub, or governed in the objective case, after the following order:

1. When found in an assertive sentence, viz. in a sentence neither prohibitive, negative, nor interrogative.

EXAMPLE.

The tribe came except Zued.'

2. When the precedes the single summer

O Boy of Zued!

O Boy of Zued!

O thou who art noble in thy tribe!

O most excellent of the tribe!

O slave of God, or (O Abdoolah!)

But when the noun following them, is not in regimine, it receives the vowel mark is without the Tunween.

EXAMPLES.

O Zued! يَازِيْدُ O man! يَازِجُلُ

Annotation.

A man of learning went one day to the house of a Grammarian, who happened at the time to have a boy before him reading Syntax. The learned man stopped at at the door to hear the boy read, and heard him say to his master. 'O Sir, when I say," " all the people went out but Zued." and am asked-why did not Zued go out also? What answer should I give? Say, replied the master, that he was busy beating Amr. Very well, said the boy: but when I say, -" the tribe rose up all but the Ass," and am asked-why did not the Ass rise up too? What should I answer? Answer, said the pedant, that he was busy eating grass. Good, said the boy-and when I say-' the General came along with the army,' and am askedwhat brought the General along with the army? What should I say? Say, said the schoolmaster, they are come by order of this gentleman (at the door,) to flog me.— On hearing which the boy uttered a shrick—exclaiming—protect me, O followers of Monumen! O father! O brother! O people! hasten, hasten, to my assistance, for this man at the door, is certainly mad, and has given orders to have me beaten, and out he ran. The man laughed heartily at both of them, and went about his business.

CLASS FIFTH.

The fifth class contains four particles, which render the final letter of the Aorist Tense viz.

اِدَنْ كَيْ لَنْ أَنْ اللَّهِ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ

1. The Particle of prefixed to the Aorist, restricts it to ruture time.

EXAMPLE.

I hope you will rise.

Annotation.

OF THE PARTICLE

The Particle is with the Human Muftooh, and Noon Quiescent, as explained in the Text, occurs both as a Noun, and a Particle.

As a noun it is supposed by the author of the Moonner and other Grammarians, to be equivalent to til the first personal pronoun, as "isi" 'I did,' and in other cases to the second personal pronoun, in the words "iii" 'iii" where the termination is merely indicative of gender or number.

As a Particle it is used in four ways.

stance of its being prefixed either to the Aorist, or fast Tense, and sometimes even to the imperative, as الما أَعْمُ وَاللَّهُ عَلَى الْمُعْدُلُونَ اللَّهُ اللَّهُ

Its pronoun is generally rejected in composition, but sometimes expressed, as وَالْوَانَكُ فَهُو اللَّهُ عَاسَالُتَنَا فَالْمُو اللَّهُ عَاسَالُتَنَا فَيُ اللَّهُ عَالَمُ اللَّهُ اللَّهُ عَلَى اللَّهُ عَلَ

It is occasionally met with as an Explanatory Particle, synonymous with as in the following Example from the Quoran: (That is, make the Ark.)

But if prefixed to the Preterite it causes no alteration in the time, and is then called a limit of or the infinitive of.

EXAMPLE.

ا عَجَبَنِي اَن خَرَجْتَ Your going out surprised me, or it surprised me that you went out.

2. The Particle restricts the verb to FUTURE time, in a confirmed negative sense.

EXAMPLE.

You will certainly not see me.

Amnotation.

As a PLEONASTIC PARTICLE it occurs as follows:

- 1. After المَّانَ عَالَ وَالْمَانِيَّةُ وَالْمَانِيَّةُ وَالْمَانِيِّةُ الْمَانِيِّةُ الْمَانِيِّةُ الْمَانِيَةُ الْمَانِيَةُ الْمَانِيِّةُ الْمَانِيَّةُ الْمَانِيَّةُ الْمَانِيَّةُ الْمَانِيِّةُ الْمَانِيَّةُ الْمَانِيَّةُ الْمَانِيَّةُ الْمَانِيَّةُ الْمَانِيَّةُ الْمُعَالِّمُ الْمَانِيَّةُ الْمُعَالِمُ الْمَانِيَةُ الْمُعَالِمُ الْمَانِيَةُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعِلِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعَالِمُ الْمُعَلِمُ الْمُعِلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعَلِمُ الْمُعِلِمُ الْمُعِلِمُ
- 2. Between the Particle أَعْمَا عَلَمُ الْعَسَمِ عِلَالَهُ i. e. a verb of swearing: as الْوَانَى أَقْسَمُ عِاللَّهُ الْعَسَمِ عِلَالُهُ الْعَسَمُ عِلَالُهُ الْعَسَمُ اللَّهُ الْعَسَمُ اللَّهُ اللَّا اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللّه
- - 4. After اذَا اَنُ اَدُرُجْتُ , When you went out.

OF THE PARTICLE S.

is a negative Particle restricting the verb to future time. The Grammarian is says it was originally &, the Alif of which is changed into Noon; but this Etymology is rejected by the author of the Mooghnee who confirms the account given in the Commentary, in which opinion he is supported by and like.

This Particle, agreeably to the authority of the Grammarian Knulell is compounded of % and %. The Humza is rejected, for the sake of euphony, leaving %%, the Alif of which is also thrown out, because two quiescent letters occurring together cannot be pronounced, and thus we have %%.

3. The Particle is used in the sense of Jalai and or cause and motive, indicating that that which precedes it, is the cause of that which follows it.

EXAMPLE.

المَا اللهُ اللهُ

Annotation.

OF THE PARTICLE ST.

The author of the Mooghnee says, that is a noun abbreviated from in the following verse:*

How can you incline to peace,
Your slaughtered friends being yet unrevenged,
And the slame of war still raging?

It occurs as a particle in the sense of المُعَدِّرِيَّةُ and عَلَى الْمَعْدَرِيَّةُ and in this sense precedes the المُعَدِّدُ Example, مَا الْمُوصُولَةُ that is, الْمَوْسُولَةُ Why did you strike.'

It precedes also the يَرْجِي الْغَنِّي كَيْمَا يُضْرُّونِينْغَع , Example, يُرْجِي الْغَنِّي كَيْمَا يُضْرُّونِينْغَع ' A man may expect to receive the good or evil he does.'

Also in the sense of المَنْ اللَّهُ مَا اللَّهُ اللّلَّا اللَّهُ اللَّا اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّهُ اللَّاللَّا اللَّهُ ا

As a proof of this it may be observed that the is retained in which would have been rejected had been here a governing Particle.

4. The Particle is used in the sense of and and on answer, and consequence, and restricts the verb to Future time.

EXAMPLE

اَذَىٰ تَدُخُلُ ٱلْجَنَّةُ swer to him who said اَذَىٰ تَدُخُلُ ٱلْجَنَّةُ الْجَنَّةُ the Mohummudan faith.

Annotation.

OF THE PARTICLE (1)

Some Grammarians maintain that 0.33 is a noun, but the general opinion is that it is a Particle.

As a Particle some derive it from 0.33 and 0.33 and others again allow it no Etymology, but consider it a simple uncompounded Particle.

The Grammarian (sale), says it is always used in the sense of and sale as explained in the Text; but if merely admits its general application in this sense, and gives the following example, to prove that it is sometimes met with as the alone;—as in answer to the assertion, if I love you, if it is it is sometimes of then I think you speak truth! where the Grammarian observes that truth cannot be considered as a consequence of the preceding assertion.—I love you, and must therefore be looked upon merely as the answer. This is one of the many trifles that exercise the ingenuity of Arabian Grammarians.

The government of is guided by certain conditions.

The Particles in the Fifth Class are included in the following Story.

STORY.

I called one day, said a learned man, upon a friend of mine, who was an excellent Singer, and said to him, Fam come to you, that you may enliven me with a song, for I have been annoyed this morning, and know no remedy so effectual in dispelling care. I beg therefore that you will oblige me with a couple of good verses. He answered, with great pleasure, and sung the following.

Thy flight the knots of patience hath unwound, *
Yet in my soul thy form is firmly bound:
What were thy wrong, love's bitter to allay,
With sweets from me withheld; on others cast away.

I was delighted, says the narrator, with his harmony, and found myself relieved from the affliction that weighed upon my heart, and asked him, do you think any other person in this city can be found a match for you in singing. No said he, I do not think there is, nor will you ever find in it any such. I then took my leave of him, saying;—I will call upon you tomorrow, please God, between the

noon and evening prayers.—Then, said he, I will sing you something that will please you. One of my friends called upon me in the evening, and informed me that the King had ordered the Songster to be put to death.—On what account I asked? Because replied he, the King's Daughter heard him singing to-day and was so enchanted with his voice, that she was nearly throwing herself down from the top of the palace in ecstasy;—the King ran and drew her in from the window, and having locked the door, ordered the Musician to be put to death. On hearing this said the learned man, I made my escape, as soon as the people left me, fearing I might experience the same fate myself, I being in fact the cause of his singing.

CLASS SIXTH.

The sixth class contains five particles which being prefixed to the aorist, render the final letter or quiescent, viz.

1. The Particle of converts the Aorist into a NEGATIVE PRETERITE.

EXAMPLE

المُ يَضْرِبُ In the sense of مَاضَو بَ He did not strike.

Annotation.

OF THE PARTICLE .j.

The Particle is synonymous with (. Its effect upon the Aorist is to change into , rendering the final letter quiescent, and seems in this respect to correspond with the Apocope of European Grammarians. In conversation however this rule is not always observed by the Arabs, who use it like is and without causing any difference of inflexion in the verb; the same license is sometimes indulged in Poetry, and what is still more extraordinary the Grammarian in Luhyanee says, it occasionally renders the Aorist in and in this way he reads the first sentence of the 94th Chapter of the Qooran:

الْمُ وَشَرْحَ اللَّهِ صَدْرَكَ " Have we not opened thy breast."

2. The Particle is used like j but is peculiarly applied in the sense of it is it to denote universality of past time, and indicates, that the action conveyed by the verb was never performed at any past period.

EXAMPLE.

آ بَضُوبُ زَيْكُ اللهُ اللهُ

Zued did not strike (him), at any past period.

Annotation,

OF THE PARTICLE W.

The distinction observed by the Arabian Grammarians in point of sense between is and it seems to be this, that is as a Negative relates to a portion of time past, whereas it in a more comprehensive and absolute sense, embraces the whole period; we can say therefore is in it was not then, but was afterwards; but we could not substitute in the sentence, and say is in it which would in fact amount to this.—"It never was and then was." This is the general opinion of Grammarians, but there are some who consider these Particles as synonymous in every respect.

Yet Marracci knew that is was occasionally used as a negative Particle, though he has not in his Note given any rule for it.—"Particula if, si, habet apud Arabes, sicut etiam apud Hebreos, vim juramenti Negativi in affirmatione, et affirmitivi in Negatione ut hoc loco, in quo ita explicanda est sententia, and the learned Schultens in his Notes on the Hamasa, thinks its real meaning on all such eccasions as the above is if." 5. The Particle (is used before two sentences, the first of which must be a verbal one, (וֹבֹבּבׁבׁבׁוֹבׁ וֹבׁבּבׁבׁבׁוֹבׁ); the second may be either verbal or nominal, (בֹבּבׁבׁבׁבׁוֹב). The first branch of the proposition contains a condition, and is termed, (בֹבֹבׁבׁבׁוֹב) the second the consequence, and is called, (בֹבֹבׁבׁוֹב). If a verb in the Aorist be found in both sentences, or in the conditional sentence alone, it must necessarily be marked בֹבׁב as:

آن تَضْرِبُ فَرَيْدٌ ضَارِبِ [If you strike, then Zued will strike, or lit. Zued is a striker.

in delusione. Vid. Schult. ad Exc. Ham. p. 389. But the fact I believe is that is always taken in a Negative sense when followed by a Particle of exception: the above reading is sanctioned by Asin; Exc. Humuza; Ibno Amir and others.

OF THE PARTICLE CALLED IN OR IMPERATIVE , S.

The کُسُو or letter وَ وَ of command may be always marked with the vowel مُسُونَة but the Grammarian مُسُونَة makes it مَسُونَة. When it follows either the Conjunction or is it is generally rendered Quiescent, and also occasionally after مُسُونَة عَلَيْهِ وَ الْمُعَالِقُونَا لَهُ اللّٰهُ عَلَيْهُ اللّٰهُ الل

It is generally omitted in the 2d Person of the Imperative Active, and also in the 1st Person, and is sometimes understood in Poetry, though its government remains, as sometimes understood in Poetry, though its government remains, as And let your generosity or munificence reserve for me a portion. The Grammarian however does not subscribe to this rule even in Poetry, unless it is found preceded in the Sentence by the preposition & as

But if the Aorist be merely in the latter sentence, or in that containing the consequence, it may, or may not be marked عَرْم at discretion, as إِنْ ضَرَبْت أَضْرِبُ at discretion, as If you beat, I will beat.

Annotation.

Say (O Mohummud) to my faithful servants; let them observe the stated hours of prayer.

The Prohibitive Particle & is seldom found with the 1st Person, but is equally applicable to the 2d and 3d. Its origin and character are disputed. Some Grammarians derive it from the X LAM of command, by adding to it Alif- says it is not a prohibitive but a Negative Particle, and that the government ascribed to it, is to be attributed to the Imperative Lam understood: but both these opinions are overruled by the author of the Mooghnez who confirms the doctrine recorded in the Commentary.

OF THE PARTICLE

There is nothing to be remarked of except that it is used as a Negative as well as a conditional Particle, and that it is frequently found as a mere expletive. Schultens says it is used rhetorically as an animated Aposiopesis in swearing, a use that has not been discovered by any of the Arabian Grammarians, and which I shall not therefore transcribe. The Particles in Class the Sixth are illustrated in the following Story.

STORY.

It is related that a woman was troubled with a tingling* in her ear, and went to a Physician for his advice on the subject. The Physician said, if you apply (to your ear) the yolk of an egg, and a little pulverized Love-Apple you will be well. The woman went to an Apothecary, who had a handsome Apprentice, and said, I will thank you to desire your boy to weigh me out two Dirhums worth of Love's-Apple!† The Apothecary not knowing, that she meant the plant of that

^{*} The word is derived from which corresponds both in sound and sense with tinkle in English, and tinnio in Latin. It is here used technically for the Tinnitus Aurium of Physicians.

⁺ I have endeavoured to imitate the quibble in the original on the words المورَّفِ Huowa-Juwwa, and مورَّا المعرورة Huowu-Juowa. The first is the name of an herb or plant: the second means

name, on the contrary believing she wished for that which no plant or herb can cure, ‡ said to his Apprentice, give the lady my boy, what she wishes of you. The woman was enraged at the insinuation, and said, I never thought of the strange idea, which has entered your mind; I merely wished for a little of the medicine called Love's-Apple. The Apothecary felt embarrassed, and said, O my good daughter do not annoy yourself, but say if you please, Love-Apple. He then gave an order to his boy to weigh her out three Drams of it, and not to stint her in the weight.

CLASS SEVENTH.

The seventh class contains nine words, which give is or the QUIESCENT mark to the AORIST. They possess a conditional or hypothetical signification like the

literally, the desire or ardour of love. I am aware that the Love-Arrie, as a genus of the Monogynia order, is not exactly applicable to the Arabian plant, but it serves to convey some idea of the Pun, and this is all I intended.

‡ The original means simply, "that which the heart pants after from the bitterness, or violence of love." We may suppose that the Arabian Apothecary from the Lady's mistake imagined her in search of the Agnus Castus, or some other love antidote, but having no idea that so much virtue could be found in an herb:—He mihi quod nullis amor est medicabilis herbis! Unwittingly recommended her to his Apprentice.

§ Or two miskals which are supposed equal to three Drams.

Annotation.

The word has various other uses besides those mentioned in the Commentary; the following are of common occurrence and may be worth inserting:

It is used, 1st Interrogatively, as نَى عَثْنَا مِن مُرْقَدُهُ نَا who has aroused us from our place of rest (i. e. the Grave)?

Particle of and are placed in construction before two verbs, the first of which is the cause of the second. The first is termed on: the other on the other of and expresses the consequence. If the verb in both cases be in the aorist, or in the conditional sentence alone, it must in either way receive the mark

They are as follows:

1. Of these the first is مَنْ and is never applied but to persons or RATIONAL BEINGS, (نَدُو الْعَقُول)

EXAMPLE.

المن اكر من الكرمني اكرمند He who honors me, I will honor him,

اَنْ يَكُرْمَنْ فَيْ زَيْدٌ اكْرَمْهُ If Zued honors me, I will honor him, and الما كُوْنُ يُكُرُمُنْ عَبْرُواكُرُمْهُ If Amr honors me, I will honor him.

Annotation.

2. Relatively, in the sense of مُنَّىٰ مِع مَا اللهُ يَسْجُولُهُ مُن فِي اللهِ وَاتْ وَمَى فِي الأَرْضِ

Do not you see, that whatever is in the Heavens, or in the Earth prostrates or humbles itselfe before Gop?'

3. As an Indifinite Noun qualified by an Adjective, as in the following Verse of the celebrated Poet Hussan;

كُفَىٰ بِنَا فَضَلَا عَلَى مَىٰ غَيْرِنَا وهِ تَ وَيَ اللَّهِ عَلَى مَىٰ غَيْرِنَا حَبِ النَّهِ فِي مُحَهِدٍ لِيَّانَا

"This excellence is all we require to establish our pre-eminence over others, namely the love of the Prophet Mohummud towards us."

2. She second is (and is more generally applicable to THINGS, or IRRATIONAL BEINGS, (عَيْرُ فَي الْعَقْول)

EXAMPLE.

بَشْرُ الْشَرْدُ What you purchase, I will purchase,

رُدُ That is,

If you purchase the Horse, I will purchase the Horse, I will purchase the Horse, and If you purchase the Cloth, I will purchase it.

3. The third is and is applicable to TIME.

EXAMPLE.

بَهْ عَالَمُ اللهِ When you go, I will go;

يْز That is,

اَنْ تَذْ هَبِ الْيَوْمَ اَلْهُ هَبِ الْيَوْمَ الْيُومَ الْيَوْمَ الْيُومَ الْيُعْلِيمُ الْيُومَ الْيُعْمِي الْيُومَ الْيُعْمِي الْيُومَ الْيُعْمِي الْيُومَ الْيُعْمِي الْيُعْمِ

Annotation.

This Poet was contemporary with Mohummud, from whom tradition says he received the name of Hussan, in consequence of having delighted the Prophet by some Verses in his praise, and upon hearing which he is said to have called out Most beautiful!

OFL

The author of the Mooghnee says that (as a governing Noun, is sometimes significant of time, as مَا مُو اللَّهِ وَاللَّهِ وَاللَّهُ وَلَّهُ وَاللَّهُ وَاللّلَّا لَا اللَّهُ وَاللَّهُ وَاللَّهُ وَاللَّهُ وَاللَّهُ وَاللَّالِمُ وَاللَّهُ وَاللّهُ وَاللَّهُ وَاللَّهُ

4. The fourth is (and as also applicable to TIME,

EXAMPLE.

سَمَا تَذَهُبُ Whenever you go, I will go,

رُحُ That is,

اِنْ تَذْهُبِ الْيَوْمَ اَنْ هُبِ الْيَوْمَ الْيُومَ الْيَوْمَ الْيَوْمَ الْيُومَ الْيُومَ الْيَوْمَ الْيُومَ الْيُومَ الْيُعْلِيقُومَ الْيُعْلِيقُومَ الْيُعْرِقِي الْيُومَ الْيُعْلِيقُومَ الْيُعْلِيقُومُ الْيُعْلِيقُومَ الْيُعْلِيقُومَ الْيُعْلِيقُومُ الْيُعْلِيقُومُ الْيُعْلِيقُومُ الْيُعْلِيقُومُ الْيُعْلِيقُومُ الْيُعْلِيقُومُ الْيُعْلِيقُومِ الْيُعْلِيقُومُ الْيُعْلِيقُومُ الْيُعْلِيقُومُ الْيُعْلِي الْيُعْلِيقُومُ الْعِلْ

5. The fifth is and is applicable to persons or things; in other words to rational or irrational beings, and is always connected with another word in the relation of the Aorist or oblique Case.

EXAMPLE.

اَیّهٔ یَضْرِبْنِی اَضْرِبْد Whosoever strikes me, I will strike him,

ان يَضْرِبُني زَيْلُ أَضْرِبُهُ If Zued strikes me, I will strike him, and

If Amr strikes me, I will strike him.

Annotation,

OF São

The word إِنَّ is also used Interrogatively, as مَتَى نُصِرُ اللَّه when will Gop assist us?

It is also Synonymous with غ as على على المحافظة 'I placed it in his cuff.' But this is an application of it peculiar I believe to the المُذَيْلُ tribe, who also use it in the sense of عند من المحافظة 'I took it out from his cuff.

The sixth is List applicable to PLACE.

EXAMPLE.

Wherever you walk, I will walk,

GÍ That is,

Annotation.

OF CAN

The Commentator considers a merely as a Noun, but the Grammarian and makes it also s Particle, as in the following Verse in which it is supposed Synonymous with

'If a man possess a certain disposition, and is desirous to conceal it from mankind (it will not avail) it will be discovered.'

It is also supposed to be used Interrogatively, as in the following Verse.

7. The seventh is also applicable to PLACE,

EXAMPLE.

اَنَىٰ تَكُنُ اَكُنُ Wherever you reside, I will reside,

CI That is,

إِنْ تَكُنْ فِي الْبَلْدَةِ اَكُنْ فِي الْبَلْدَةِ اَكُنْ فِي الْبَلْدَةِ وَ الْبَلْدَةِ وَ الْبَلْدَةِ وَ الْبَادِيَةِ الْكُنْ فِي الْبَادِيَةِ الْكُنْ فَي الْبَادِيَة

الْبَلْدُةِ وَ If you remain in the City, I will remain in the City, and

اَنْ تَكُنْ فِي الْبَا دِيَةَ اكُنْ the desert. I will remain in the desert.

Annotation.

I confess I cannot discover the exact meaning of this Verse and know not how to can be rendered Interrogatively:—perhaps it may be translated thus,

What a night, what a night for poor Paddy Whack, Not a shoe to my foot, nor a shirt to my back!

Is used Interrogatively, as. Jido What thing is that?

And as a Relative Pronoun, as اَنْنَزْعَى مِي كُلْشِيمَةُ لَيْهِم اشْدَعَلَى الرَّحِينِ عِنْما وَ Certainly I will seperate from every tribe or nation, he who was most perverse against his God.

It sometimes follows an Midefinite Noun for the purpose of distinguishing it either by praise or censure, as عروت Zued is a mau; what a man! or after a proper name, as عروت I passed by Abdoollan, what a man!

STORY.

A certain city lounger was standing one day in the street, and happened to see a woman of elegant appearance pass by with a child in her arms. He said to the people about him, 'if any one will bring me that child in order that I may kiss his feet, I will give him ten Dirhums,' but no body answered him. He addressed them again, and said, 'I will give fifteen Dirhums to any one that will bring me the child,' but they continued silent as before. I had better said he to himself leave these blockheads alone, and watch the motions of the woman. and wherever she goes, go there also, and at whatever house she enters, stop there (and wait her coming out,) upon which he began to follow her. The woman (turned round) and said, 'what is your object Sir, in pursuing me thus? I wish replied he for permission to kiss the feet of that child, and if you allow me, I will do whatever you command. Why do you wish this said the woman? because I love you replied he, and you love the child, and the beloved of the beloved, is also beloved. The woman laughed at his answer, and said if you are determined on this, you had better wait for his father, who is about to proceed to the bath,* and when he takes off his shoes you can go and kiss his feet, for my love to him is greater than to this child. The fellow was abashed at her reply and retreated.

^{*} I have omitted a sentence here to avoid repetition.

CLASS EIGHTH.

The cighth Class contains four words which give زيم to an Indefinite Noun (السرنكرة) or govern it in the Accusative or Objective case, as the تربين or Noun of Specification.

1. Of these the first is عَشَدُ Ten, when compounded with الله One; النَّانِ One; آلَنُكُ Two; عَشَلُمُ Three; عَشَدُ Five; عَشَدُ Five; عَشَدُ Seven; عَمَا لَهُ اللَّهُ Eight and عَدُسُة Nine.

The same government is applicable to the Numbers, تَارُتُونَ Twenty; تَارُبُونَ Forty; تَسْعُونَ Seventy; كَيْسُونَ Seventy; تَسْعُونَ Eighty; تَسْعُونَ Ninety, whether compounded or not, but these are properly comprised among the Analogous governors, under the head of اَلْسَمُ النَّامُ وَالنَّامُ النَّامُ النَّامُ وَالْمُعَامِّلُونَ النَّامُ النَّامُ النَّامُ النَّامُ النَّامُ وَالْمُعَامِّلُونَ النَّامُ النَّام

If the join be a Masculine Noun, the grammatical arrangement of the units and will in construction with join will be as follows, with both members of the compound number in the Masculine Gender:

EXAMPLES.

Annotation.

The words contained in the eighth Class are nouns of number either determinate or indeterminate, which generally give and sometimes to an indefinite neun, or govern it in the Objective, and Aorist or Oblique Cases; and as Numbers in their applicate sense refer to particulars, in opposition to those in the abstract, the word expressive of that particularity is always termed or or contained the noun of specification or Particularity; or the Specification, and significantly of the noun Numbered. It must however be remembered that the

The other cardinal numbers from three (i) to nine (in inclusive, in construction with inclusive, are applied as below; the first member of the compound being Feminine the second Masculine, and this always happens when the is a Masculine Noun:

EXAMPLES.

آرُبَعَةُ عَشَرَاجُالًا Fourteen men, and so on to ارْبَعَةُ عَشَرَاجُالًا Nineteen men.

The word in the text expresses the number ten abstractedly and differs perpaps from in the same way as δεκὰς from δέκα in Greek, or Decas from Decam in Latin. It always governs the in the Aorist or Oblique Case, in other words its is is in the Aorist or Oblique Case, in other words its is in the accordant numbers from three to nine inclusively: in these cases the is applicable to the cardinal numbers from three to nine inclusively: in these cases the is a noun plural either in form or meaning as like is and is in the compounded numerals from ten to ninety-nine, give Nusub, or govern the is a hundred, and if a thousand must be in the singular number. The is of the words is a hundred, and if a thousand must be in the singular number and Acrist case, as if it is a hundred men, if is a Commentary.

But if the join be a Feminine Noun, the order is reversed, and the first member of the compound will be Masculine, and the second Feminine.

OF 3

The word مُنْ is derived by some from the preposition في and the interrogative له by the rejection of the Alif; but the general opinion I believe is, that it is simple and uncompounded. It admits a preposition before it and is therefore considered a noun, as مَنْ الْمُ عَالَى مُنْ الْمُ وَالْمُ لَا اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ عَلَى اللَّهُ ا

The تَهُمُّنُ of مُحَدِّ is sometimes rejected if the sense of the sentence can be made out from the context, as مَهُمُّ for مَهُمُّ أُمُ مُوْتُ how many days have you fasted?

But if the first member of the compound will be Feminine also:

EXAMPLES.

Of the other digits from three to nine inclusive the order will be as follows:—the being a MASCULINE Noun, the first word in the compound will be Feminine:

But if the in be Feminine, the reverse must take place, and the first word of the compound will be Masculine.

Annotation.

When مَا is used interrogatively with a preposition prefixed to it, it renders the بَعْرَةُ اللهُ الل

When في is used to denote assertion, it is supposed to be Synonymeus with بَعْمَرُةُ , and its is sometimes a Noun in the Plural number, like the عَشْرَةُ of عَشْرَةُ as عَشْرَةُ أَنْ اللهُ عَلَيْهِ مِنْ الْمُعْمَالُ وَاللّٰهُ عَلَيْهُ مِنْ اللّٰهُ عَلَيْهُ مِنْ اللّٰهُ اللّٰهُ عَلَيْهُ مِنْ اللّٰهُ اللّٰهُ عَلَيْهُ مِنْ اللّٰهُ الللّٰهُ اللّٰهُ اللّٰهُ اللّٰهُ اللّٰهُ اللّٰهُ اللّٰهُ ا

Whoever said a certain Physician will eat the Mad-Apple* for forty days successively will lose his senses. A person present said, how much of it must be eaten every day for that purpose? The Physician answered, so much, and made a motion with his hand three times towards him, to denote fifteen of them. The man went away and continued eating the Mad-Apple and in the forty first night, he put on his sword and went to the Physician and said—did you not say O stupid and ignorant Doctor, that whoever would eat fifteen of the fruit of the Mad-Apple for forty days successively would lose his senses? And howmany have I caten beyond that number and yet am not mad? and now I swear by God I will put you to death with this sword. The Doctor alarmed ran off and shut the door against him, and said O pardon me my friend!—I repent of my misconduct, and promise you never to prescribe the Mad-Apple to another as long as I live.

CLASS NINTH.

The ninth Class contains nine words termed [or VERBAL Nouns, because they are considered equivalent in signification to verbs. Of these, six are used as the second person of the Imperative and give job a Noun, or govern it in the Objective Case as its Object.

1. The first of these is in the sense of ign and is used in the beginning of a sentence.

EXAMPLE.

Put off Zued, or [رُوَيْلُ زَيْدًا Let Zued alone.

Annotation.

The author of the Grammatical Treatise called the Jaio Moorussur, divides Verbal Nouns into two Classes, the first having the sense of verbs in the 2d Person of the Imperative mood, the second of verbs in the past time, which are termed have a received or Nouns of Predication. The first Class, or those equivalent to the Imperative of verbs, are either transitive as exemplified in the Commentary, or intransitive, as he silent as go on (with your discourse), like Agedum in Latin; or and have haste which occurs under four various foms, as India in the following distich:

For the night is dark, so hasten, hasten!

Also Is alight or descend; is and is enough for you; is return, come back.

The Verbal Nouns termed السَّمَاء الاَّحْدَا are generally found in the past time as وَاحْدَا الاَحْدَا اللهُ الْحَدَا اللهُ اللهُ

2. The second is all in the sense of $\hat{\epsilon}$ 5.

STORY.

An old man* complained to a Doctor of bad digestion. O let bad digestion alone said the Doctor, for it is one of the concomitants of old age. He then stated his weakness of sight. Don't meddle with weakness of sight replied the Doctor, for that also is one of the concomitants of old age. He complained to him of a difficulty of hearing. Alas how distant is hearing said the Doctor from old men! difficulty of hearing is a steady concomitant of old age. He complained to him of want of sleep. How widely separated said the Doctor, are sleep and old men, for want of sleep is certainly a concomitant of old age. He complained to him of a decrease of bodily vigour. † This is an evil replied the Doctor that soon hastens on old men, for want of vigour is a necessary concomitant of old age. The old man (unable to keep his patience any longer) called out to his companions—seize upon the booby, lay hold of the blockhead, drag along the ignorant idiot, that dolt of a Doctor, who understands nothing, and who has nothing to distinguish him from a Parrot, but the human figure, with his 'concomitants of old age,' for sooth! the only words he seems capable of uttering. The Doctor smiled, and said, come on my old boy, get into a passion, for this also is a concomitant of old age.

CLASS TENTH.

The tenth Class contains thirteen Verbs termed and full first or Imperfect Verbs, and are so called because they cannot with an Agent alone, form a complete or perfect Sentence. They precede in construction a Nominal Sentence, or a Sentence consisting of a Subject and Predicate, to the first of which they give and to the second in the first Term is called the first of the Substantive Noun, the second the the Attribute or Predicate.

1. Of these the first is & which is used in two senses. 1st Imperfect.

2d Perfect.

As an Impersect Verb it is used in two ways. First, as affirming the existence of its Attribute in its Substantive Noun or Subject, in time past, either in a sense capable of cessation, (مَرَكُنُ الْالْقُطَاعِ) as اللهُ عَلَيْكُ الْمُعَلِّمُ اللهُ عَلَيْكُ اللهُ عَلْمُ اللهُ عَلَيْكُ عَلَيْكُ اللهُ عَلَيْكُ عَلَيْكُ عَلَيْكُ اللهُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ عَلَيْكُ اللهُ عَلَيْكُ عَلَيْكُ

Second, in the sense of , in, as,

لَّانَ الْغَقِيرُ غَنِيًّا وَ الْعَارِ خَالِيًّا وَ الْعَارِ فَاللَّهِ وَاللَّهِ وَاللَّهُ وَاللَّالَّا لَا اللَّهُ وَاللَّهُ وَاللَّهُ وَاللَّهُ وَاللَّهُ وَاللّلَّهُ وَاللَّهُ وَاللّلَّالِي وَاللَّهُ وَاللَّهُ وَاللَّهُ وَاللَّهُ وَاللَّهُ وَاللّلَّ وَاللَّالِي وَاللَّالَّ وَاللَّهُ وَاللَّالَّا لَا اللَّهُ وَاللَّالِي وَاللَّالِي وَاللَّالَّ اللَّلَّاللَّالِي وَاللَّالِي

Annetation.

The Arabian Grammarians consider Verbs as either Perfect or Imperfect, and as their account of them seems to agree in almost every respect with that of the Stoics as given by Harris in his Hermes, I shall present the extract to the reader by way of illustration.

"The Stoics in their logical view of Verbs, as making part in Propositions, consider them under the four following sorts:

When a Verb Co-inciding with the Nominative of some Noun, made without further help a Perfect Assertive Sentence, as Σωμρατης περιπατεί Socrates walketh; then as the Verb in such Caso implied the power of a Perfect Predicate, they called it for that reason Κατηγόρημα a Predicable;

2d. As a Perfect Verb, forming with its Nominative or Agent alone a complete or perfect Sentence, and consequently does not require to be connected with any other Predicate. In this sense it denotes existence (absolutely), as

2. The second is which is used to denote a change in the Subject of the Proposition either, from one nature or substance into another, as,

Or, from one quality into another, as,

It is semetimes used as a perfect Verb, to denote change from one place to another, and is then applied transitively with the Preposition (i), as

cr else from its readiness συμθάνειν, to co-incide with its Noun in completing the Sentence, they called it Σύμθαμα a Co-incider.

When a Verb was able with a Noun to from a Perfect Assertive Sentence, yet could not associate with such Noun, but under some Oblique Case, a Σωνεάτει μεταμέλει, Sociatem pænitet: such a Verb from its near approach to just Co-incidence and Predication, they called Παρασύμθαμα or Παρακατηγόρημα.

When a Verb, though regularly Co-inciding with a Noun in its Nominative, still required to complete the sentiment some other Noun under an Oblique Case, as Πλάτων Φιλεῖ Δίωννα, Plato loveth Dio (where without Dio or some other, the Verb loveth would rest indefinite:) such a Verb,

3. The third, fourth and fifth, are whole of which are used to unite or conjoin the sense of the Sentence with their respective times, namely, morning, evening, and noon, as

كَانَكُونَ الْمُعْنَاءُ وَ الْمُعْنَاءُ وَالْمُعْنَاءُ وَالْمُعُلِقُوالُمُ وَالْمُعُلِقُونَاءُ وَالْمُعُلِعُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَلَّاءُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِمُ والْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِمُ وَالْمُعُلِ

from this defect they called holos is outland, or in nathyogypu some thing less than a Co-incider, or less than a Predicable.

Lastly, when a Verb required two Nouns in Oblique Cases, to render the sentiment complete, as when we say Σωμφάτει Αλμιδιάδες μέλει, Tædet me vitæ, or the like, such Verb they called η Κου, or έλατίου η παρασύμθαμα, or η παραματηγορημα, something less than an Imperfect Co-incider, or an Imperfect Predicable."

Here by the way it may be worth remarking, that almost the whole of the above extract seems copied from Stanley's History of Philosophy, which Harris appears to me to have made frequent use of in his Hermes and Philosophical Arrangements without any sort of acknowledgment. The following may serve as a specimen:—"Whatseever is Predicated of another is Predicated of the name of the Case, and both these are either Perfect, as that which is predicated, and together with the subject sufficient to make an Axiom. Or they are Defective, and require some addition to make thereof a Perfect Predicate."

The above three Verbs are sometimes used in the sense of as, as,

They are sometimes used in the sense of Perfect Verbs, as,

Annotation.

If that which is predicated of a name, make an Axiom, it is a Categorem, or σύμβαμα, a Congruity, as walketh, for example, Socrates walketh.

But if it be predicated of the Case (whereby Transitions are made from one person to another, wherein it is necessary that some Oblique Case be likewise pronounced with the right,) they are called II αρασυμβαμαία, as an addition to the σύμβαμα (or as Priscian renders it, less than Congruities) as Givero saved his country.

Again, if that which is predicated of some Noun, require a Case of some other Noun to be added to make up the Axiom, so as the construction be made of two Oblique Cases, they are accurage and according to the Axiom.

4. The Sixth and Seventh, are is and is which are used to unite the sense of the sentence with their respective times, namely day and night: is therefore unites the sense of the Sentence with the day, and is with the night, as,

كَالْبَا وَالْمَارِيُ كُوا تِبِهَا اللّهَارِ اللّهَالِيلَا اللّهَارِ اللّهَارِ اللّهَارِ اللّهَارِ اللّهَارِ اللّهَاللّهَا اللّهَارِ اللّهَارِ اللّهَارِ اللّهَارِ اللّهَارِ اللّهَالِيلَا اللّهَارِ اللّهَارِ اللّهَارِ اللّهَارِ اللّهَالِيلَا الللّهَالِيلَا اللّهَالِيلَا اللّهَالِيلُولِ اللّهَالِيلَا اللّهُ اللّهُ اللّهَارِ اللّهَالِيلَا اللّهُ اللّهَالِيلَا اللّهُ اللّهِ اللللّهُ اللّهُ الللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ الللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ اللّهُ الللللّهُ الللللّهُ اللّهُ الل

incongruities, or according to Ammonius, less than, σύμθαματα, as it pleases me to come to thee; whether the Nouns only or the words require it. See Stanley's History of Philosophy. Folio Ed. 1701, in the life of Zeno, p. 310.

In answer to certain of the Arabian Grammarians who contend that Imperfect Verbs, are merely used to denote time without reference to the sense of their Infinitives, the Grammarian Ruzee in his celebrated Commentary upon the Kafeea makes the following reply, which I offer as a short specimen of his style and manner.

وَمَا قَالُبُعْضُهُمْ مِنْ انْهَا سَبِيْتُ ذَا قَصَةً لا نَهَا تَدُولُا عَلَى الزَّمَا فِ دُونَ الْمَصْدَرِ الْيَسَ بِشَيْعٍ لاَنْ كَانَ وَيُعْتَمُهُمْ مِنْ انْهَا سَبِيْتُ فَا قَصَةً لاَ نَهَا تَدُولُا عَلَى النَّمْ اللَّهُ وَخَبَرُ الْمُعْلَقُ وَخَبَرُ الْمُعْلَقُ وَخَبَرُ الْمُعْلَقُ وَخَبَرُ الْمُعْلَقُ وَخَبَرَ الْمُعْلَقُ وَخَبَرُ الْمُعْلَقُ وَخَبَرُ الْمُعْلَقُ وَخَبَرُ الْمُعْلَقُ الْمُعْلِقُ الْمُعْلِقُ الْمُعْلِقُ الْمُعْلِقُ اللَّهُ الللَّهُ اللَّهُ الللَّهُ اللَّلَّ اللَّهُ اللَّهُ اللَّهُ اللَّهُ الللَّهُ اللّهُ الللّهُ ا

The above two Verbs are sometimes used in the sense of , as,

The boy became adult.

The youth became an old man.

5. The eighth and ninth are is and is sometimes written the tenth, is and eleventh is and eleventh and eleventh is used to indicate the uninterrupted duration or permanence of the Attribute in its Substantive Nounas,

كَا يَرْحَ زَيْلُ عَالِمًا Zued was always wise.

Zued was always standing.

Zued was always excellent.

Zued was always excellent.

Bukr was always intelligent.

Annotation.

"The opinions of those Grammarians who maintain that Imperfect Verbs are so called, because they are merely indicative of time, without reference to the sense of the Infinitive, are nugatory, for the word in the Proposition, the sense of the Infinitive, are nugatory, for the word in the Proposition, the sense of the Infinitive, are nugatory, for the word, and its Predicate denotes the mode or manner of that being, that is, being abstractedly considered, and its Predicate denotes the mode or manner of that being, which is here being standing, or the existence of that accident. Introducing the Sentence therefore with a word indicative of absolute existence, and afterwards qualifying it by the attribute, is, as if we were to say, a thing existed or was, and afterwards add—it existed standing. The word therefore denotes the existence of an event absolutely, which is qualified by subjoining its Attribute, and the Attribute is significant of a particular event, as occurring in time absolute, which is restricted to a particular time, by the word the word time, by the word time, the word time, by the word time, the

Harris uses almost the same words upon the same subject. "Now all Existence is either Absolute or qualified.—Absolute, as when we say B is; Qualified, as when we say, B is an Animal, B is Black, is Round, &c. With respect to this difference, the Verb (15) can by itself.

6. The twelfth is and is used for the purpose of indicating a temporary relation between two events, the time or duration of the first of which it limits or restricts to the duration of the second. It must therefore necessarily be preceded by either a Verbal or a Nominal Sentence, as

Sit while Zued is sitting. اجْلَسْ مَا دَامَ زَيْنٌ جَالِسًا Zued is standing as long as Amr is standing.

Annotation.

the forms of existence being in number infinite, if the particular form be not expressed, we cannot know which is intended." He then goes on to remark, "that when (is) only serves to subjoin some such form, it has little more force than that of a merc assertion," and further on.—" As to Existence in general, it is either Mutable, (a lightly) or Immutable (a lightly); Mutable, as in the Objects of Sensation; Immutable, as in the Objects of Intellection and Science. Now Mutable Objects exist all in Time, and admit the several distinctions of Present, Past, and Future: But Immutable Objects know no such distinctions, but rather stand opposed to all things temporary.

And hence two different significations of the Substantive Verb (18), according as it denotes.

Mutable or Immutable being.

For example, if we say, this orange is ripe, (18) meaneth, that it existeth so now at this Present, in Opposition to Past Time, when it was green, and to Future Time when it will be rotten.

But if we say, the Diameter of the square is commensurable with its side, we do not intend by (1s) that it is commensurable now, having been formerly commensurable or being to become so hereafter; on the contrary we intend that perfection of existence, to which time and its distinctions are uttered unknown. It is under the same meaning we employ this Verb, when we say, TRUTH is, or God is. The opposition is not of time present to other times, but of necessary existence to all temporary existence whatever."

Hermes p. 92.

As my object in producing these extracts is merely to explain and illustrate the doctrine of the Arabian Grammarians on the subject of *Imperfect* or *Defective* Verbs, I avoid as usual all discussion on the question of its merits or demerits.

The thirteenth is and is used for the purpose of giving a negative signification to the Sentence in present time, though some Grammarians are of opinion that it is applicable to time in general, whether past, present or future, as,

Zued is not standing.

Annotation.

Imperfect Verbs with respect to their government may be divided into two Classes, First, such as govern of themselves without any restriction or limitation, as اَصَنِي اَتُ خَلَقُ مَا اَ عَلَى اَتُ خَلَقُ مَا اَعْمَالُهُ اللّٰهُ اللّٰهُ

EXPRESSED.

is elegantly used as an Expletive, as

Fatima the daughter of Khoorshoob brought forth (four) accomplished sons, the like of whom were never found.' Alluding to the four companions of Nooman king of Hyra in Arabia, who were called قَيْسُ الْحَفَاظ ; Anoos-ool-Fuwaris بَنُسُ الْفَو أرس ; Oommarut-ool-wuhnan عَمَّا رَقَالُوهَاب KYS-OOL-HIFAZ, and Ja Kil RUBEE-OOL-KAMIL.

2. It is used in a sense equivalent to the Pronoun termed by the Arabs فَمَيْرُ الشَّالِي or the Pronoun of distinction, as فَانَ زَيْدُ مُنْطَلَقُ آيَ كَانَ هُو Zued was going. The Verb in both instances possesses no government.

The following seven Verbs are considered Synonymous with مار namely مار مار مار المعادية الم اَلْهُ عَالَ الْسَيْحَالُ وَ اللَّهُ لَا لَهُ اللَّهُ اللّ قَعَمَ اللهُ الله as in the following Sentence يَّنَ عَدَتُ كَانَهَا حَرِيةٌ until it became as sharp as a spear. The last two Verbs, however very rarely occur in the sense of أَنْ and should not therefore be used as such.

OF مَنْ الْمُسَاءُ الْمُعَاءُ الْمُعَامُ الْمُعَامِ الْمُعَمِ الْمُعَامِ ا

Of these Verbs there is nothing particular to be remarked, we may however encrease their number by adding jel' he arrived at noon,' and if he arrived in the first watch of the night.'

Grammarians extend the privilege to the whole class of Imperfect Verbs, with the exception of قَارِّهَا كَانَ زَيْكُ as قَارِّهَا كَانَ زَيْكُ Zued was standing.

But these Verbs, cannot be preceded by their Substantive Nouns, the Nouns being the Agent, which can never take precedence of the Verb.

The government of the above Verbs in all their derivative forms is the same.

Annotation.

These four Verbs are nearly or altogether Synonymous in signification, and as two Negatives in Arabic as well as in English and Latin make an Assirmitive, they are always found in an Assirmative sense.

STORY.

Aboos Shimuqmuq was a humorist, but falling poor his wife was compelled to pass a whole night without any thing to eat. He went out therefore with the hope of procuring for her a little sustenance, but not succeeding he continued traversing the streets till he arrived at the great Mosque, which he entered and concealing himself in one of its angles, continued standing there till the whole congregation had retired, with the exception of the public Crier, who when night came on, began to pray, saying.- O God at whose mighty will non-existence sprung into life, and by whose merciful kindness the poor and sorrowful are made happy.'-I am here my servant, 'cried Aboos Shimuqmuq,' ask of me what thou requirest!' the astonished Crier believing he had been honored with the holy conference formerly granted to Moses, replied; - O Gop! thou certainly knowest that this thy servant hath always been obedient to thy will, and hath never ceased to confide to thee his wishes: he hath passed the day in such extreme hunger that his very bowels yearn again for food, bestow upon him then from thy infinite bounty one thousand Dirhums, which will supply his wants and provide sustenance for his family.'-O my servant! cried Aboos Shimuqmuq, petition for something else, for I swear by my mighty power and dignity that my wife hath passed the whole night fasting, and although I searched every where to find a little bit of supper for her, I have not succeeded in procuring a mouthful, nor have I in my possession sufficient to keep her soul and body together!-The poor Crier ashamed of the trick played upon him, left the Mosque to Aboos Shimuqmuq and went off.

CLASS ELEVENTH.

The eleventh Class contains four Verbs, termed Verbs of Propinquity (اَفْعَالُ الْمُعَالُ الْمُعَالِينَ الْمُعِلَّيْنِ الْمُعَالِينَ الْمُعِلِينَ الْمُعِلِينَ الْمُعَالِينَ الْمُعَالِينَ الْمُعَالِينَا لِينَا لِينَا عَلَيْكِ الْمُعِلِينَ الْمُعَالِينَا عَلَيْكِ الْمُعِلِينَ الْمُعَالِينَ الْمُعَالِينَا عَلَيْكِينَا لِينَا عَلَيْكِينَا عَلَيْكِينَا لِينَا عَلَيْكِينَا عَلَيْكُونَا لِينَا عَلَيْكُونِ الْمُعَالِينَ عَلَيْكُونِ الْمُعَالِينَا عَلَيْكُونِ الْمُعَلِّينَ عَلَيْكُونِ الْمُعَالِينَا عَلَيْكُونِ الْمُعَالِينَا عَلَيْكُونِ الْمُعَالِينِ عَلَيْكُونِ الْمُعَالِينَا عَلَيْكُونِ الْمُعَلِينِ عَلَيْكُونِ الْمُعَالِينَا عَلَيْكُونِ الْمُعَالِينَا عَلَيْكُونِ الْمُعَلِينِ عَلَيْكُونِ الْمُعِلَّيْكِينِ الْمُعِلَّيْكِينِ الْمُعَلِينِ عَلَيْكُونِ الْمُعَلِينِ عَلَيْكُونِ الْمُعَلِينِ عَلَيْكِينِ الْمُعِلَّيْكِينِ عَلَيْكُونِ الْمُعِلَّيْكِينِ عَلَيْكِي عَلَيْكِينِ عَلَيْكِي عَلِينَا عَلَيْكُونِ عِلَيْكِي عَلَيْكِي عَلَيْكُونِ عَلَيْكُونِ الْمُعِلِينِ عَلَيْك

1. The first is which admits of the quiescent if or Ta of the femining gender, but is not otherwise (regularly) conjugated, neither is any Derivative formed from it. Its government is twofold.

rirst. It gives وَعُنَى or the sign of the Nominative Case to the Noun as its Agent, and مَا مَنْ or the sign of the Objective Case to the Predicate, which Predicate is a Verb in the Aorist Tense in construction with مَا مَا مَا اللهُ الله

EXAMPLE.

يَدُنُ أَنْ يَخْرُجَ Zucd hastened to come out.

Annotation.

To the Verbs of this Class generally termed from their signification, Verbs of Propinquity, Grammarians have added several others, which though nearly synonymous in point of sense, are yet sufficiently distinct in application to warrant their arrangement into the following classes or divisions.

1. Verbs of Propinquity properly so called, viz.

2. Verbs denoting hope or expectation, or implying confidence in some future event, viz.

3. Verbs denoting the commencement of an action, or Inceptives, viz.

In which example ن is put in the Nominative, as the Noun or Agent of and and is substituted for the Accusative or Objective Case, as its Predicate. The sense of the Sentence will therefore be.

Zucd accelerated his egress.

The Predicate of agrees with its Noun or Agent in Gender and number.

EXAMPLE.

The two Zueds hastened to stand.

أَنُ يَعُوْمُوا اللّهِ النَّابُدُونَ اَنْ يَغُوْمُوا (All) the Zueds, &c. to stand,

Hinda hastened to &c.

The two Hindas hastened to &c.

(All) the Hindas hastened to &c.

Annotation.

By this classification as laid down in the Commentary upon the Alfera, the Verb was appears is excluded from the Verbs of Propinquity, contrary to the doctrine in the Text; the grounds upon which this exclusion is founded are the following:

It is supposed by the Grammarian Ass., Zamed to be a Particle Synonymous with Jes. Ruzee thinks its proper signification is hope or expectation, to which Seebuwen adds pity and fear, as

And agreeably to the authority of the Siman it denotes certainty, as in the following example from the Qooran:

كُتبَ عَلَيْكُم الْعَتَا لُ وَهُو كُر لا لَكُم وَعَسَلَ اَنَ تَكُرَ هُوا شَيْاً وَهُو خَيْرَلَكُم وَعَسَلَ اَنْ تُحَبُّوا شَكْرَ هُوا شَيْاً وَهُو خَيْرَلَكُم وَعَسَلَ اَنْ تُحَبُّوا شَيْاً وَهُو شَرِلُكُم وَاللَّهُ يَعْلَم وَانْتَمِلاً تَعْلَمُونَ عِ Second. The Verb in its second application gives or the sign of the Nominative Case; to a Verb in the Aorist Tense in construction with is substituted for, or put in the place of the Nominative, as the Noun of and is then Synonymous with is.

EXAMPLE.

The coming out of Zued was near, or عَسَىٰ أَنْ يَخْرِجَ زَيْدُ اللهِ The coming out of Zued was near, or مُعْرِبُ خُرُوجِهُ الْكِي قَرْبُ خُرُوجِهُ اللهِ اللهِ اللهِ اللهِ اللهُ عَالَى قَرْبُ خُرُوجِهُ اللهِ اللهُ اللهُ

Annotation.

Maracci however renders it here fortusse which is copied by Sale. "War is enjoined you against the infidels, but this is hateful unto you: yet perchance you hate a thing which is better for you, and perchance you love a thing which is worse for you, but God knoweth and you know not." Sale.

The Predicate of the is restricted in the Text to a Verb in the Aorist Tense with the Particle but although this appears to be the general practice of the Language, there are some instances noticed by Grammarians in which the Predicate is a Noun, as the consumer me for I am about to practice abstinence. See Buwen is of opinion that the Aorist of the should never be accompanied by as that Particle is known to bestow on the Verb the sense of the Infinitive, which becoming then an abstract term, cannot with propriety be predicated of its Substantive Noun. This doctrine seems conformable to that of Locke, who says that, "all our affirmations are only inconcrete, which is the affirming not one abstract idea to be another, but one abstract idea to be joined to another"— we can say a man is white, but we cannot say a man is whiteness, unless in a figure of speech. But some believe, that when it does occur in this form it is always by an ellipsis of some governing word, such as Ji or it and other Grammarians account for it by supposing it to be then redundant.

sons is occasionally marked kusra, as, which is used in the Aorist, but I am aware of no example and shall not therefore insert the opinions of Grammarians on the subject.

In which case there is no necessity for the introduction of a Predicate, in opposition to its first application where the sense would otherwise remain imperfect.

In its first combination it is therefore termed Imperfect, and in its second PERFECT.

The second is of which governs the Noun or Agent in the Nominative, and the PREDICATE in the Accusative or OBJECTIVE Case, which Predicate is generally a Verb in the Aorist Tense without it sometimes admits of if

EXAMPLE.

أَكُو زَيْدُ يَجِبَى {Zued hastened his coming, or advanced it to the last point.

Annotation,

OFSE.

و کاد. آف In its original signification is Synonymous with قرنب though it cannot be used alone as such, as عَادَ يَكَا وَ اللهُ عَلَيْ اللهُ وَ اللهُ اللهُ عَلَيْ اللهُ Grammarians in general seem inclined to think it the former. The following example from the Hureeree will illustrate its general force.

He exhaled a storm of passion fiery as the summer blast, And was almost bursting with very rage!

With its medial radical marked Futha, and sometimes Kusruh, is also Synonymous with as in the following examples:

The fire was near being extinguished. ا کُرَبَت الشَّهُ The sun was nearly set.

In which example is put in the Nominative Case, as the Noun of is and is substituted for, or put in the place of the Objective as its Predicate; The sense of the Sentence is therefore.

The same rules that are applicable to a f are equally applicable to its Deriva-

EXAMPLE:

Grammarians differ considerably among themselves, with regard to the sense of when preceded by a Negative Particle, some maintaining and with propriety, that it bestows on the Verb a Negative signification, and others asserting that it has no such force, the sense of the Verb remaining unaffected as before; while others believe that the Particle is redundant before in the Past Tense, but preserves its signification in the Future.

Amotation.

الْهُ الْهُ فَالَانَ Was originally Synonymous with المُونَّ and is still to used in this sense, as المُرَّ المَّهُ السَّمُ (such a person hastened his march; agreeably to the authority of the Commentator on the Alfeel it is used like عَسَى either as a Perfect or Imperfect Verb. It is conjugated like في المسمود but the Grammarian عَسَى says, it never occurs in the Past Tense as given in the Text, but in the Aorist, which however is rejected in the Alfeea on the authority of Khuleel.

Under the general head of Verbs of Profinquity, (besides those enumerated in the Commentary above,) may be mentioned the following, namely,

3. The third is is which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is invariably the Aorist Tense of a Verb without () as:

Zued was near coming out.

The fourth is which governs the Noun in the Nominative, and the Predicate in the Objective Case, which Predicate is a Verb in the Aorist Tense with or without wil

EXAMPLE.

اُوشَک زَیْدٌ اَنْ يُحِییً Zued expedited his coming.

Some Grammarians make out seven Verbs of Propinquity, adding to the four abovementioned the following three, namely حَعَلَ طَغَتَ جَعَلَ which are altogether Synonymous with in sense and application.

Annotation.

The Commentator on the Alfeca makes 5 Synonymous with Line in the sense of hope or expectation, but its predicate must always be an Aorist with the Particle وَا عَدُونَ مِنْ اللَّهُ عَلَى اللَّ Perhaps or it is to be hoped that Zued will rise.

The above rules are precisely applicable to اخْدُوْلَةَ as, الْحُدُوْلَةَ as الْحُدُولَةَ The Heavens were about to descend in rain-

اَ وَلَىٰ زَيْدُ أَنْ يَزِيدً عَلَى ثَلَاث as, تَا مَعْ as, اللهِ Zued was on the point of encreasing his gift of three (Rupees!) Its predicate must be accompanied with is j.

Jalo Is used in the sense of Je, as,

The Aorist of this Verb does not require to be accompanied with . The Verbs of this Class are included in the following little story.

حكاية

أُبْتُلِيَ بَعْضُ العُبْهَا هِ بِحُبِّ فَتَا قَ مِنْ بَنَا صِ أَلُمُوْكِ حَتَّى كُرَبَ أَنْ يَهْلِكَ فَعَالَ لَهُ خَلِيعَ نَعْمَ لَكَ جَسَدُ كَ مَنْ اللَّهُ اللْفُولُولُ اللَّهُ اللَّهُ الْمُنْ اللْمُعُلِمُ اللْمُعُلِمُ اللْمُؤْمِ اللَّهُ اللَّهُ اللَّه

STORY.

A certain religious man was so deeply affected with the love of a King's daughter, that he was brought to the very point of death. His disciple said to him one day, what has the Almighty done with the king of your understanding and patience, for your body seems almost reduced to a mere shadow? Ah my child said the devotee, I subdued my feelings till my very heart was nearly breaking, and practiced patience to the utmost stretch of my power, but when the army of love invaded me, the king of my understanding was put to flight, and I could hold out no longer: he then wept and repeated the following lines:

The jeerer was keen with his joke,

And eager to mock my despair;

But he saw my heart almost was broke,

And he sought but to soften my care.

Then may heaven my mistress defend,

Though still she my vows should disdain;

Though her cruelty hasten my end,

And my heart break indeed with its pain.*

CLASS TWELFTH.

The twelfth CLASS contains four Verbs termed The conficient or Verbs of Praise and Censure.

1. Of these the first is is originally with the first letter marked Futha, and the second Kusra: the Futha is changed into Kusra to coincide with

Annotation.

As and assume Tu or the mark of the Feminine Gender, they are generally considered as Verbs, but certain Grammarians of the schools of Koofuh will have them Nouns because they are occasionally found in construction with a Preposition, as

A good girth (perhaps a bridle is necessary) on a bad ass. أَنْ مُ السَّيْرِ عَلَى بِمُس الْعَيْدِ السَّيْرِ عَلَى بِمُس الْعَيْدِ السَّيْرِ عَلَى بِمُس الْعَيْدِ السَّيْرِ عَلَى بِمُس الْعَيْدِ السَّادِ عَلَى بِمُس الْعَيْدِ اللَّهِ الْعَيْدِ اللَّهِ الْعَيْدِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ الْعَيْدِ الْعَيْدِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ الْعَيْدِ اللَّهِ اللَّهِ الْعَيْدِ اللَّهِ الْعَالِي الْعَيْدِ اللَّهِ اللَّهِ اللَّهِ الْعَلَى الْعَلَى الْعَلْعِلْمِ اللَّهِ الْعَلَى الْعَلَامِ الْعَلَامِ الْعَلْمِ الْعَلْعِلْمِ اللَّهِ الْعَلْمِ الْعَلْمِ اللَّهِ الْعَلْمِ اللَّهِ الْعَلِي الْعَلْمِ الْعَلْمِ الْعَلْمِ الْعَلْمِ الْعَلْمِ الْعِلْمِ الْعَلْمِ الْعِ

The censurers were eager to censure mer

But when my heart from excess of love was ready to break;

My very censurers kastened to console me;

Then preserve O God the life of my beloved?

There is something pretty if not elegant in the original of this verse, but its spirit I fear is too subtle for transfusion into our idiom. In a literal translation the repetition of the word censurers appears harsh and unpleasing, and the strange unconnected wish at the close not very suitable to the complaint expressed in the three first lines, though dilated into a quatrain. As a curious example whosver of the four Verbs under discussion it deserves to be remembered.

^{*} Or literally,

the Vowel mark of the second letter, which is then rendered quiescent to lighten or facilitate the pronunciation leaving (2) which is a Verb of Praise.

The Agent (قاعل) of the Verb الإشرائية is sometimes a general term (الإشرائية) made definite by the Article

EXAMPLE.

تعمَّ الرَّجُلُ زَيْدٌ Zued was a good man.

The word الرَّجْلُ is here مَرْوُوع or in the Nominative Case, as the Agent of Zued (زَيْدُ is the Noun Particularised by Praise (رُمُخُصُونُ بِالْمُرِيُّ) and being the Subject of the Proposition is also in the Nominative Case; and the Predicate, preceding it in the order of construction.

Or Zued may be in the Nominative Case as the Predicate, the Subject of the Proposition being a Pronoun understood; the order will then be.

He was a good man namely Zued.

The Proposition by the first analysis consisting of one, and by the second of two Sentences.

The Agent of is sometimes a Noun connected in the relation of the Aorist Case with another Noun made definite by the Article of.

EXAMPLE.

يَعْمَ صَاحِبُ الْغُرَسِ زَيْدُ Zued the owner of the horse is a good man.

Amnotation.

They both occur under the following forms, namely is is is and is and but the first is the original one. The two first forms are used by the tribe of Bunoo Tumeem, and the second more frequently than the rest when employed to denote praise or censure. This distinction agreeably to the authority of Mooburrud and Seebuwch is observed by the Arabs in general.

And sometimes a Pronoun concealed rendered jage by an indefinite Noun in the Objective Case,

EXAMPLE.

How good was (he) the man Zued,

The concealed Pronoun in such instances refers simply to an object in the mind termed, (مَعْهُونُ نَهُنَى).

The Noun Particularized by Praise (المُخْرُونُ) is sometimes omitted in the Sentence if the defect can be supplied by the context.

EXAMPLE.

الْعَبْدُ أَيْ اللَّهِ How good a servant was he, namely Job!

The verse of the Qooran from which the example is taken being in praise of Job.

The Noun Particularized by Praise and the Agent must agree in gender and number

EXAMPLES.

نَعْمَ الرَّجُلُ زَيْدُ Zued was a good man.

The two Zueds were good men.

نَعْمَ الرَّجَالُ زَيْدُونَ

All the Zueds were good men.

Annotation.

The Nouns Particularized by Praise or Censure sometimes though rarely precede their Verbs, as المناه المنا

النَّهُ الْمَاءُ الْ

2. The second is in a Verb of Censure; originally like (on the third conjugation of triliteral radicals.) The Futha of the first letter is changed into Kusra to coincide with the vowel point of the second, which is afterwards rendered quiescent in order to lighten or facilitate the articulation. The various rules applicable to the Agent of this Verb in construction, as well as to its or Noun Particularized by Censure, are precisely the same as those already recorded of the Agent and of the Agent and of the same as those already recorded of the Agent and of the second which is

These Verbs assume occasionally the Particlo (as an affix, as (xi; which Particle sometimes coalesces with (as in the following examples from the Qooran.

The fourth is with saffixed, the first letter being marked either Futha or Zumma; originally with the second letter Muzmoom, which being afterwards rendered quiescent the two homogeneous letters coalesce under the sign Idgham. This rule is applicable to with its first letter Muftooh, but if Muzmoom, the Vowel point Zumma is transferred to the second letter, and the two homogeneous letters coalesce as before,

Thavenothing particular to offer regarding these words. It is supposed by some to be derived from originally is the Wao being changed into Alif by a common rule of permutation. It is precisely synonymous with is as observed in the Commentary. Is is sometimes preceded by the Vocative Particle is denoting surprize or admiration, as in the following example from the 3d Muqam of Hurcerce in praise of a gold coin.

O how admirable is its metal, how fascinating its splendor! How delightfully it entiches, how potently it assists us! The Verb نعض is never separated in practice from is and is therefore written it is Synonymous with عَدُمُونَ and its Agent is الله followed by its مَدُمُونَ بِالْمُحَ or Noun Particularized by Praise.

The Construction (اعراب) of the of this Verb is the same as that of in both of the cases already detailed, but its Agent and Noun Particularity by Praise, do not necessarily agree in gender and number.

EXAMPLES,

Sing. mas. O excellent Zued!

ال حَبْدَازَیْدَانِ

Dual mas.

Plural mas.

Sing. fem.

ال حُبْدَاهِنْدَانِ

Dual fem.

Plur, fem.

Annotation.

The concealed Pronoun mentioned in the Toxt as the Agent of the three first Verbs of Praise and censure answers in all such cases to the Pronoun it in English, and is therefore rendered in Arabic by a Noun in the Objective Cass. The phrase in Arabic therefore resolves itself thus, if it was good. What was good?—'The man (A) Zued.' As opposed to a Pronoun expressed, it is called concealed or implied, and its reference being to some object presented merely to the intellect for the first time, in opposition to the other Pronouns, which verbally refer to an object perceived before, its relation is properly termed by the Arabs is a which seems to agree with the remark of Apollonias as quoted by Harris, "That some indications are o ceular, and some are mental." What an excellent horseman is Zued!

Annotation.

The Verbs of this Class are included in the following little Story.

STORY,

The wife of a niggardly attorney happened to be seized with a longing after fish, and expressed her desire one day to her husband. O what execrable food said the attorney is fish, and how vile a thing is fish for food! for its F is fatality; its I insipidity; its S sickness, and its II horror! The good woman however was determined to satisfy her longing, and accordingly having pawned her earring unknown to him, purchased some fish, but in the very act of enjoying it, who pops in upon her but old Pinchpenny, who seeing her eating cried outwhat is that you are eating my dear! Nothing but a little fish replied the wife, which a neighbour woman has sent me! Oh ho! cried Muckworm, then allow me to join your mess immediately, for most excellent food is fish, and fish is truly excellent for food, for its F is fatness; its I impletion; its S salubrity and its H hilarity.* What a vile describer of fish you are said his wife, for yesterday you abused it and now again you are praising it. Nay my dear said the attorney I am an admirable definer of fish, for I divide it into two classes. One that is purchased with money, and this I hold to be the bad class: the other that is got gratuitously and this I consider the good class. His wife laughed at his answer and was surprised at the readiness of his reply.

^{*} Or agreeably to the original word its first letter is poison, its second sickness, and its third affliction; and again, its 1st is falness, its 2d enjoyment and its 3d competency.

CLASS THIRTEENTH.

The thirteenth class contains seven Verbs termed, if if or Verbs of the mind, and are so called because they have their source in the mind and come not under the cognizance of the senses. They are also called Verbs of doubt and certainty, some of them denoting doubt and some certainty, and precede a Sentence consisting of a subject and predicate to both of which they give if or govern them in the Objective Case as double Objects.

Annotation.

It must be obvious that under the head of القال القال (which signify literally Acrions of the Soul with reference to the understanding, and grammatically Verses denoting the operations of the mind or intellect) may be included a variety of other kindred Verbs besides those recorded in the Commentary; for Action which is here meant spiritual action, being a Genus, necessarily embraces all the various operations of the mind, and as these operations of the mind or modes of thinking, are but different kinds or species of the same genus, the verbs expressive of these actions must partake of one common character as to sense, and might therefore be expected to fall under one common rule of government. This has not escaped the notice of the Arabian Grammarians who, in some of their larger works, have discussed the subject with great ingenuity and have enumerated a variety of Verbs possessing a similar government to those recorded in the text; but as their arguments are very diffuse and scattered through many parts of their works, I shall save myself the trouble of collecting and translating them, and endeavour to supply the defect by presenting the reader with a short extract from the celebrated Essay of Bishop Wilkins towards a real character, and Philosophical Language, which containing a very precise view of the different Actions of the Understanding (رَفْعَالُوالْقَالُونِ) may not be deemed inapplicable to the Class of Verbs now under discussion.

Action as a Predicament he divides into four kinds.

I. SPIRITUAL. II. CORPOREAL. III. MOTION. IV. OPERATION.

The genus of Spiritual Actions he divides into two Classes, those that belong to God by which are meant only his transient actions which are terminated in the creatures, such as creation,

Three of them denote doubt,

Three certainty,

And One sometimes doubt and sometimes certainty.

The three first or those denoting doubt, are,

The Section is continued with an enumeration of the Acrions of the understanding and judgment PRACTICAL, and the Actions of the WILL, with these also of the sensitive part or the Funcy, which are properly styled Passions, but the whole would require too much space and the above extract may be deemed sufficient to illustrate the nature and division of words significant of the distinct operations of the mind, or of spiritual or intellectual Ideas.

The other three Verbs or those denoting certainty, are

EXAMBLES.

I perceived that Amr was generous, وَأَيْتُ عَبْرَ الرَيْبَا المِيْبَا I knew that Zued was faithful.

I found the house mortgaged.

Annotation.

That there are many Verbs of this Class besides those recorded in the Commentary, the following will demonstrate.

1. دَرِيْتُ بِكُرُلُمَا حِبِكَ He knew, as, دَرِيْتُ بِكُرُلُمَا حِبِكَ I knew that Bukr was your companion.

2. Know for certain, as,

Know that the preservation of the soul, is by subduing the passions.

3. Lis He found, as,

Verily they found their fathers who were lost.

Ruzze however remarks that the Verbs when synonymous with and it is the Imperative synonymous with a solution of the Imperative synonymous with a solution synonymous with a s

The Verb is sometimes used to denote perception with the eye, as in the following sentence from the Qooran.

أَنْ is sometimes used synonymously with عُرُنَتُ as,

ا عَلَيْتُ زَيْلَ ا أَيْ عَرَفْتُهُ I knew or recognized Zued.

They thought that the Angels who are the attendants of God were his daughters.

7. And some occur in this form as Neuter Verbs, as,

28. Or merely transitive to one Object, as,

There are many other Verbs besides the above which govern two Objects in the Accusative, but which for the sake of brevity I omit recording: the following however from their affinity to those under discussion may merit insertion:

- 1. مَيْرَ تُ الطَّيْنَ خَزَفًا as, I converted the clay into a pot.
- 2. عَجْرَامِي عَبَالِ مَا عَبَارُامِي عَبَالِ مَا عَبَارُامِي عَبَالِ مَا عَبَارُامِي عَبَالِ مَعْدَ وَكُولُوم We will come unto the work, which they shall have done, and make it as dust scattered abroad.

And in the sense of in as,

ا أَوْجَالُ الصَّالَّةُ آيُ اصْبَتْهَا وَجُلاتُ الصَّالَّةُ آيُ اصْبَتْهَا وَالصَّالَّةُ آيُ اصْبَتْهَا

These three Verbs when used as above are transitive only to one Object or Accusative.

The Verb وَعُدُنُ is sometimes used to denote doubt and sometimes certainty, as,

- 1. الْهُ غَفُورًا رَحِيبًا I believed that God was merciful and forgiving.
- 2. اَزَعَبْتُ الشَّيْطَانَ شَكُورًا I doubted whether the devil was a thanksgiver!

The above seven Verbs are termed Jis or Verbs of conversion.

Of the Verbs of doubt and certainty as recorded in the Text.

The Verbs and though generally used to denote doubt or uncertainty of mind, are supposed by the Author of the Commentary upon the Alfrea to be used in the Sense of certainty also: Examples.

The Verbs of this Class do not admit of the retrenchment of one of the two Objects in composition being but as one word, and the sense of both collectively forming as it were the منعول به or Object of a transitive Verb, that is the radical sense of the second Object or its Infinitive, may be considered as connected with the first in the relation of the aorist case, as the sense of the sentence عَلَيْتُ نَيْلُونَا لَا اللهُ الله

ا عَطُونا اللَّهُ اللَّاللَّ اللَّهُ

They well knew that the only place of refuge was ظَنُوا إِنَ لاَ مَلْحَا مِنَ اللَّهِ اللَّهُ اللَّهُ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهِ اللَّهُ اللَّهُ اللَّهُ اللَّهِ اللّ

Or in the following Jeu d'esprit attributed to

ON A VERY LITTLE MAN CALLED DAVID, WITH A VERY LARGE BEARD,

مَا شَيْتُ دَأُودَ فَاسْتَضْحَكْتُ مِنْ عَجَيِهِ كَانَهُ وَالْدِيهِ شَيْ بِهُولُودٍ مَا ظُولُ دَأُودَ الْآطُرُ لَ الْحَيْمَةِ وَظَيْ دَاُودَ فَيْهَا غَيْرَ مَوْجُود

These lines are very ingentously versified by Dr. Carlyle in his Seecimens of Arabian Poetry, for the learned Professor has not only preserved the sense but the very spirit of the Epigram, by lengthening out his version to an extent as disproportionate to the original as little David's beard.

When these Verbs happen to intervene between their Objects, or when they follow them, their government may be optionally omitted.

EXAMPLES.

زَيْنُ ظَنَنْتُ قَابِمٌ زَيْنٌ قَابِمٌ طَنَنْتُ زَيْنٌ قَابِمٌ طَنَنْتُ زَيْنٌ قَابِمٌ طَنَنْتُ

And be thyself a laughing stock?

2.

When I behold thy little feet,
After thy beard obsequious run,
I always fancy that I meet,
Some father followed by his son,

3,

A man like thee scarce e'er appear'd,

A beard like thine—Where shall we find it?

Surely thou cherishest thy beard,

In hopes to hide thyself behind it.'

The Verb ; is supposed to be used in the sense of doubt or uncertainty in the following example from the Qooran, as,

They suppose (the day of judgment) is distant.

It is used in a sense termed by the Arabian Grammarians to denote vision in a dream and bealist to denote vision in a dream and requires after it two Objects in the Accusative, as in the following Sentence from the Quoran:

It seemed unto me in my dream, that I pressed out wind الذي أَوَا نِي أَعُمْرِ خُهُولًا (from grapes.)

Their government therefore or non-government is equally proper, though some Grammarians are of opinion that when they intervene between their Objects, their government had better be preserved, but when they follow them, it had better be cancelled.

If to the Verbs أَرُيْتُ and وَأَرِيْتُ a Humza be prefixed, they become transitive to three Objects or Accusatives.

EXAMPLES.

اَ عَالَمْتُ زَبْدًا عَبُرًا فَاضِالًا I made Zued know that Amr was excellent.

لَا اللَّهُ اللَّ

Annotation.

Verbs of sense in Greek generally govern a genitive, but the Verb oxlower like of in Arabic, requires an Accusative which Mr. Jones has endeavoured to account for philosophically in his Greek Grammar. See p. 275.

The example produced by the Commentator to prove that the Verb si, is sometimes used to express ocular in opposition to mental vision, appears to me very singularly inapplicable. The entire passage from the Qooran is as follows;

He (Abraham) said, O my dear son, verily I saw in a dream, that I should slay thee as a sacrifice, consider therefore what thou thinkest I should do. He replied, O my Father do what thou art ordered to do.' A word cannot surely be placed in a more unequivocal light than in the above Sentence: perhaps the Commentator intended to quote the preceding example,

Another Object is therefore added to these Verbs by this Humza of increase, which possesses the property termed أَنُونَ (and is that by which the Agent or Nominative to a Verb puts the Object in possession of the sense of the radical.)

The meaning therefore of the first example is المُعَالَّذُ عَالَى الْمَا عَالِمَا عَالَى الْمَا عَلَى الْمُعَلِّمِ الْمَا عَلَى الْمَا عَلَى الْمُعَلِّمُ عَلَى الْمَا عَلَى الْمُعَلِّمُ عَلَى الْمَا عَلَى الْمُعَلِّمُ عَلَى الْمُعَلِمُ عَلَى الْمُعْلِمُ عَلَى عَلَى الْمُعْلِمُ عَلَى

Annotation.

The Grammarian Ruzee, makes Le synonymous with in every respect, and says the phrases have a says the phrases have a says the says the phrases have does not govern two Objects in the Accusative like Le. Husham however thinks there is no difference between them either in sense or construction.

The government of these Verbs is suspended but not destroyed, first, by the introduction of the Particle termed المنت ا

ا کسیت ازید قا درجند کی معدد ا doubted whether Zued was standing with you or Amr.

This suspension of government being caused by the immediate Agency of some word is termed by the Arabian grammarians but that the government of the Verbs is not altogether destroyed by the construction they alledge the following argument as a proof; namely that if another Sentence follow the one to which the Particle is prefixed, the government will be preserved, as

ad a

I thought that Zued was standing and Amr going.

The following Verbs namely أَنْبَا انْبَا وَ and عَدْ are also transitive to three Objects.

Note, that it is not allowable to reject in composition the 1st Object or Accusative, nor either of the last two separately, but they may both be rejected together as already described.

Annotation.

The following Story will illustrate the use of the different verbs of this Class.

مِنْيُ مَرْتَبَةً * STORY.

A Merchant was going through a slave-market one day and happened to see a Broker holding a boy by the ear for sale, and calling out, who will purchase a youth accomplished, sensible, learned, and faithful, for one hundred Dirhums? Why my good Sir said the Merchant, I suspect you must be crazy, for if your boy possess the qualities you mention, he is worth a thousand Dirhums. O said the Broker you see him shining and take him for silver, but if you were acquainted with his failing you would probably find him copper. Pray what is his failing said the Merchant, and what do you think the cause of it? He tells every year said the Merchant a great lie and a little lie, and each of these I consider as a very serious evil. Pooh

pooh! said the Merchant, I look upon this as a mere trifle. He accordingly purchased the boy and took him into his service, and finding him expert and skilful in duty. placed him at the head of all his servants. But it happened sometime after, that the Merchant accompanied by some of his friends went out to his garden, and sent the boy home about sunset to bring him his ass, but the boy as soon as he approached his master's house rent his clothes, and threw dust upon his head, and exclaimed, O alas, alas, my master! the lord of my bounty!-the Merchant's wife concluded from his appearance that some misfortune had happened to him, and said, alas, boy, what is the meaning of this outcry? Ah! replied he, the roof of the house has fallen in upon my master and crushed him to pieces with all the other Merchants. The wives of the Merchants who happened to be invited there by the lady of the house, as soon as they heard the report of the slave beat their faces in despair, and began to run towards the garden, but the boy got before them and entered it tearing his clothes like a frantic person and throwing dust on his head, in the same manner as he had done before the women. The Merchants surprised at his appearance asked the cause of his distress. Ah! I believe he replied, a spark of fire escaped from the hands of one of the maid-servants and has set fire to your house, and I do not think there is a single child that has not been burned to death, may not one even of the maid-servants nor one of your wives. The Merchants hearing this ran out all distracted, one weeping for his sister and wife, the other for the daughter of his relation, but when they got about half way home, both parties met on the road and every one saw his friend safe, and discovered that the whole was a trick played upon them by the lying valet. What has tempted you said his master to this act? Do you not know replied the boy that I was bound to tell you every year a great lie and a little. one? Well said the Merchant and under what class must I place the present? Is this the large lie or the little one? O this is the little lie, replied the boy, the large one you shall have bye and bye! This little lie said the Merchant will answer my purpose.-I now give you your liberty, so set out, and find some other person of more consequence to practice your large lie upon.

OF THE GOVERNMENT TERMED EN ANALOGOUS.

The Class termed وياسى or Analogous contains seven Governing Powers.

FIRST ANALOGOUS GOVERNOR.

الفعل المطلق

Of the Analogous Governors the first is a Verb Universally, whether neuter or transitive, and in any tense past or agrist; for every Verb governs an Agent in the Nominative, as مَرْبَازِيْك 'Zued stood.' تَامِ زَيْد 'Zued struck;' but if the Verb be transitive it governs an object in the accusative also, as مَرْبَازِيْكَ عُهْرًا . 'Zued struck Amr.'

The Agent can never precede the Verb in the order of construction but the Object may, as زَيْمَاضَرَبُ ; nor can the Agent be omitted in composition, which is not the case with the Object which may be optionally omitted.

SECOND ANALOGOUS GOVERNOR.

المُصْدَرُ

The second is the Infinitive () which is defined to be the Name of a Mode, () and is termed if or the Source, being the source from which the Verb is conceived to flow.

Annotation.

The true Grammatical sense of the term as as employed in the Definition of an Arabic Infinitive, is not easily conveyed by any one word in the English Language. Mr. Lumsden who well knew its true nature and force has rendered it event, and to his opinions on every important question of Arabic Science and general Grammar, the profoundest respect is justly due; but the word as

The Grammarians of Busrah call the without reference to a Verb; and the distance absolute signification in itself, without reference to a Verb; and the the Branch or STEM, because it is not independent in itself, but has reference to some Noun. On the other hand the Grammarians of Koofuh call the root, and the the branch or derivative, because the rules of permutation to which the latter may be subjected, depend entirely on the permutations of the

Annotation.

I shall endeavour to make appear, is a much more comprehensive term than event: it embraces all attributes when considered separately from the beings to which they are attributable; all essential and inward properties as well as outward respects and relations, and reaches to actions themselves as well as manners of actions.* On the contrary the word event means little more strictly speaking, than the end, conclusion or termination of an affair, and this also is the precise Definition of it as given by Cicero; "Eventus est alicujus exitus negotii." May it not therefore be concluded that the word event, even in its most comprehensive acceptation, signifies rather the effect of action, than action itself, and that consequently it cannot be considered as a legitimate representative of in the definition of an Arabic Infinitive?

This however is a question of too much importance to be hastily decided upon. It involves a very minute inquiry into the true nature and definition of the parts of speech, and if fully and satisfactorily conducted, into the general principles of universal Grammar. An analysis of this nature will not indeed be expected in the limited space allotted to a note, but a short view of the subject may be interesting, and this I purpose to submit.

My own opinion is that the most unexceptionable name for an Arabic Infinitive is a Mode or manner of being; I mean a mode in its philosophical acceptation as explained by Locke, and since adopted I believe by every writer on ontology. "Modes I call such complex ideas, which, however compounded contain not in them the supposition of subsisting by themselves, but are considered as dependences on, or affections of Substancies; such as are ideas signified by the words triangle, gratitude murder, &c." But in order to justify the application of this term to an Arabic Infinitive, it may be necessary to enter into some detail.

^{*} See Watt's Def. of Mode.

⁺ De Inv. 51, C.

former when it happens to be a Verb of the INFIRM Class (مُعَنَّهُ) and if of the sound or Healthy (مُعَنَّهُ) it continues sound also: example, لَهُ اللهُ اللهُ

Annotation.

The word in Arabic is precisely equivalent to the Hebrew will and means literally, to become new, and transitively as an augmented triliteral to make new or produce, in which sense its prototype is frequently found in the Bible prototype is

We mean by the word at thing existing in or by some other thing, whether extrinsical as beating and going; or intrinsical as extension and contraction." If the reader will take the trouble to compare this with the definition of a mode as given above by Locke, and of its various divisions as recorded by Watts in his Logic, he will find I think the term in and mode in every respect reciprocal.

Let us compare them in a few places. "The very being of a Mode depends on some substance for its subject, in which it is, or to which it belongs; so motion, shape, quantity, weight, are modes of

^{*} The party opposed each other standing.

Now it is certain that the arguments of the Busrah Grammarians in support of the John as the Root, are absolute and of general application, while those of the Grammarians of Koofah for the if are confined to the rules of permutation alone, from which no general principle can be inferred. But if no other proof were necessary to establish the original of a word, then it would follow that if originally if and if originally if were the roots, and the different persons of these Verbs, such as is it is and if the branches, which no one will assert.

the body; knowledge, wit, folly, love, doubting, judging, are modes of the mind; for the one cannot subsist without body, and the other cannot subsist without mind."*— "We mean by the word says 'Ruzee,' a thing existing in or by some other thing, as beating, going, extension and contraction, &c." So far the terms are clearly identified.

Further. "Modes are either esssential or accidental. An essential Mode or Attribute, is that which belongs to the very Nature or Essence of the Subject wherein it is; and the Subject can never have the same Nature without it, such as Roundness in a Bowl, Hardness in a Stone, Softness in Water, Vital Motion in an Animal, Solidity in Matter, Thinking in a Spirit:" All these Modes are comprehended in the Definition and are all Arabic Infinitives and the Sources of Derivation."

Again. "An Accidental Mode, or an Accident, is such a Mode, as is not necessary to the being of a thing, for the Subject may be without it, and yet remain of the same Nature that it was before; or it is that Mode, which may be separated or abolished from its Subject: So Smoothness or Rough-

The Infinitive (مصدر) has the same government as its own verb; if therefore the verb be neuter it governs the Agent in the Nominative.

EXAMPLE.

And if transitive it governs both a Nominative and an Accusative.

In both these examples the word Zued is grammatically in the Aorist Case, from its relation to the Infinitive, but virtually in the Nominative, as its Agent.

ness, Bluckness or Whiteness, Motion or Rest, are the accidents of a Bowl; for these may be all changed, and yet the body remain a Bowl still: Learning, Justice, Folly, Sickness, Health, are the accidents of a Man: Motion, Squareness, or any particular Shape or Size, are the accidents of Body:

—So Hope, Fear, Wishing, Assenting and Doubting, are accidents of the Mind, though Thinking in general seems to be essential to it." These are all Arabic Infinitives.

"Modes belong either to Body or to Spirit, or to both. Modes of Body belong only to matter, or to corporeal Beings; Modes of Spirit belong only to minds; such as Knowledge, Assent, Dissent, Doubting, Reasoning, &c. Modes which belong to both have been sometimes called mixed Modes or human Modes, for these are only found in human nature, which is compounded both of body and spirit; such are Sensation, Imagination, Passion," &c. See Watts's Logic.

as above detailed will hardly I think be disputed, and that this precise word is peculiarly applicable to the Musdur or Infinitive we have the Grammarian's own words as authority size of the Musdur is meant mode." This mode he adds is necessarily dependant on some Subject for its existence as well as for other subordinate distinctions of

The Infinitive is constructed in five different ways.

- 1. It is connected as the in a Governing word in the relation of the aorist case with an Agent, the Object being at the same time expressed, as in the last example.
- 2. It is connected as the in the relation of the aorist case with an Agent, the Object not being expressed.

The result of this comparison may perhaps convince us that the Arabians have borrowed their general notions of Science from the Greeks, and that their nouns and infinitives, or their names of modes, comprise the two great philosophical divisions of subject and accident, from which the celebrated categories of Aristotle have been formed. This is indeed a fact that will hardly be disputed. Every system of Arabic logic sets out with this twofold arrangement, and although their modern Grammarians have not adverted to this circumstance in their enquiries into the true nature and definition of the parts of speech, I think it is evident that this must have been the original cause of the present grammatical classification. "The multitude of ideas 'says Harris,' treasured up in the human mind and which, bearing reference to things, are expressed by words, may be arranged and circumscribed under the following characters. They all denote either substance or attribute."

This Division of words and things into two general Classes is taken from the Soriusta of Plato, and is thus given by Sanctius in his Minerva. "Quicquid countiatur, aut est permanens, ut Arbor, Darum; aut fluens, ut Currit, Dormit. Res permanentes sive constantes vocamus, quarum natura diu

Annotation.

perstut: harum notam nomen dixere. Fluentes dicimus, quarum natura est, esse tamdiu quamdia fiunt. Harum nota veneum est? Sanct. Minerv. Lib. II, p. 14.

And hence I draw the following conclusions, that all modes in their absolute and Indefinite capacities are general terms or arbitrary names, affixed to certain combinations of simple ideas which have their existence only in the mind. That every mode denotes an attribute, and that every attribute is capable of sunday modifications as to means, object, end, instrument, time, place, and other circumstances, including in fact the nine sub-divisions or Post-Predicaments into which this comprehensive genus has been distributed.

Note. The above rules of construction are only applicable to the Infinitive of a transitive Verb: when it happens to be neuter, it is constructed only in one way, namely in the relation of the agrist case with an Agent.

The Agent of the Infinitive can never be concealed, nor can the Infinitive itself be preceded in composition by its or governed word.

Amotation.

This is absolutely capable of demonstration, for if we compare the nine subdivisions of ATTRIBUTE, with the common derivative forms or modifications of an Arabic Musdur; which are produced by the mere change of vowel points, or by the addition or elision of certain letters to and from the mode in its radical form, we shall find them agree in almost every particulars. For example, quality abstractedly considered will be represented by the particulars for example, quality abstractedly considered will be represented by the particulars for example, quality abstractedly considered will be represented by the particulars for example, quality abstractedly considered will be represented by the particulars for example, quality abstractedly considered will be represented by the particulars for example, quality abstractedly considered will be represented by the particulars for independent of the particular forms the entire series of predicaments or specific relations into which the attribute or mode has been divided by Philosophers, and this I think I have effected. Aristotle has enumerated but four divisions of the Attribute namely, Action, Passion, Habit and Position, which he also comprises in the attacky party or Infinitive.

Here then we discover the true origin and sense of the Infinitive Mood or Mode, a term familiar to every Schoolboy, yet strangely misunderstood by the most learned Grammarians. Sanctius, Scioppins, Perizonius and the Messieurs De Port Royal deny the propriety of the expression altogether, and Scaliger says the Infinitive is not a mood in act but in power, to which Vossius agrees.† "Assentior autem Jul. Scaligero, qui actu monum esse negat, contra quant vulgus non modo semidoctum putat, &c."

[•] I have omitted the Eyj or Noun of Instrument.

[†] Vid. Voss. De Art. Grammat Lib. V. p. 286.

THIRD ANALOGOUS GOVERNOR.

The third is an active participle, () which possesses like the Infinitive the same regimen as its verb, that is, if derived from a neuter Verb it governs an agent in the Nominative as " "The Father of Zued is standing;" and if from a transitive verb it governs both a Nominative and an Accusative.

EXAMPLE

Its government is guided by certain conditions.

The sentence in which the Active Participle is employed must include either present or future time, with one of which it must necessarily be accompanied in order to complete its affinity to the Aorist tense of a Verb; for as it already resembles the Aorist in the number of its letters and vowel points, it acquires by this addition of present or future time a similitude in signification also.

Annotation.

"The Infinitive says Dr. Beattie, if you please may be called a form, but a mood it certainly is not!" Now what is a mode but a form or manner of being abstractedly considered, a term synonymous with quality or accident, the noisting of the ancient Philosophers as opposed to ovide or substance, of which the Noun and Infinitive were used as the verbal Representatives? The whole source of the error proceeded from not attending to this original distinction, and by taking the word mode in its relative instead of its absolute signification, and to this perhaps we may trace the partial and consequently erroneous definition of it by Gaza in his Grammar L. IV; which Harris has unwittingly commended—france, in To nation of the Soul, signified through some voice, or sound articulate. See Hermes, p. 140.

The quality of Verbs says the Roman Grammarian Consentius is either finite, or infinite.

Finite as denoting a certain person, a certain number, or a certain time, as I read, I write. INFINITE,

in which these are altogether promiscuous, as, to read. "QUALITAS, Verborum aut finita est, aut infinita: finita est, quæ notat certam personam, certum numerum, certum tempus, ut, lego, scribo. Infinita est in qua hæc universa confusa, ut, legere." Vid. p. Consent. De Duabus Orationis part. Nomine et Verbo.

And hence the Verb in this form or mode was called Impersonal, Infinite, and by the Greeks επαζέμφατον or Indefinite.* "Adeo, says Macrobius, autem hic modes absolutum nomen rerum est, ut in significationibus rerum, quas Aristoteles numero decem ματηγοςίας vocat, quatuor per ἀπαζέμφατον properantur, μεῖσθαι, ἔχειν, ποιειν, πάσχειν. Græco vocabulo propterea dicitur ἀπαζέμφατον, quod nullum mentis indicat affectum." Vid. Macrob. De Differ. Græc. Lat. Verbi. p. 325.

This then is the result of our Analysis. An Arabic stripped of the learned language of definition in which it has been cloathed by Eastern Grammarians, turns out to be literally and strictly

the Infinitive Moon of a Verb, that is an indefinite or absolute Mone or manner of being, as opposed to Nouns denoting Substances, and this no doubt being a very important discovery I may perhaps claim the privilege of inserting a Q. E. I!

The Revd. Alexander Crombie, Author of the Etymology and Syntax of the English Language (a work in my opinion of very considerable merit) has adopted without consideration the vulgar error respecting the Infinitive mood, and says—" I concur decidedly with these Grammarians, who are so far from considering the Infinitive as a distinct Moon, that they entirely exclude it from the appellation of verb." Had Mr. Crombie taken the trouble to judge for himself he would have decided differently, for he could not be ignorant that all such words as running, leaping, flying, &c. &c. were Modes,-Modes of Action, but indefinite as to time, place, and other circumstances, and consequently Infinitive Modes. This is surely a very plain and simple matter of fact, and yet Horne Tooke himself that Hermes of critical sagacity has misunderstood the term mode and says, "The Infinitive appears plainly to be what the Stoics called it, the very Verb itself, pure and uncompounded with the various accidents of Mood, of number, of gender, of person, &c. &c." and Bishop Wilkins proposes to alter the name. "That which is called the Infinitive Mode should according to the true analogy of speech, be styled a Participle Substantive. There hath been formerly much dispute among some learned men, whither the notion called the Infinitive Mode ought to be reduced according to the Philosophy of speech. Some would have it to be the prime and principal Verb, as

signifying more directly the notion of Action: and then the other varieties of the Verb should be but the inflexions of this. Others question whether the infinitive mode be a Verb or no, because in the Greek it receives articles as a Noun. Scaliger concludes it to be a Verb but will not admit it to be a Mode. Vossius adds, that though it be not Modus in Actu, yet it is Modus in Potentia, All which difficulties, (mighty difficulties indeed!) will be most clearly stated by asserting it to be a Substantive Participle,

But in the name of common sense, where lies the difficulty or impropriety of the term? Are not the chief objects of our thoughts things or Substances and their Manners of being? Are not the words walking, flying, learning, dancing, sailing, sitting, &c. &c. certain Modes or manners of being, applicable to certain objects? Are not these manners of being, general words representing general ideas, and therefore applicable to many particular things? May we not talk of the walking of a Man; the walking of a Horse, the walking of a Dog, and so on ad infinitum? Is not walking then a mere mode or manner of being, applicable to an indefinite number of ebjects and consequently particular to none? Is it not therefore indefinite? It expresses no time, no person, no place, in fact nothing but a certain manner of motion; is it not therefore a Mode expressing a general idea, and therefore an Indefinite an Infinitive Mode?

And now having the Mode termed walking for instance, a word expressive of a manner of being, applicable to a great variety of objects, if we wish to limit its general application we apply it to

some particular object, and say the Walking of Barclay, by which combination the general idea becomes limited to a certain individual, but nothing more. If however we find it necessary to define the time in which the agent performed this Mode, this manner of action, we say Barclay walks—did walk, or will walk. Here we have the Mode modified, so as to express time and this we call the Mode indicative. If we desire the performance of the action, we say Walk, which is the Mode imperative and so on through all the other grammatical Modes or variations which we generally call Derivatives. Now these observations are equally applicable to every such word in the language, and consequently the term Mode is applicable to them also.

And so much for the Infinitive Mood, a term perfectly applicable to an Arabic Musdur. That the word Mode is the best representative of in its technical and Grammatical sense, I have endeavoured to prove, as well from the authority of the Arabian Grammarians themselves, as from the character of language in general, which being conversant about things or the manner of things, in other words about Substances and Modes, (the chief objects of our ideas,) would necessarily have two characteristic verbal Classes to represent them, and these appear to me to be Nouns and Infinitive Modes.

It now only remains to be observed that besides the Infinitive as above described, there is another species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some measure resembling it, which the Arabian Grammarians term species of Noun in some species of Noun in spe

FOURTH ANALOGOUS GOVERNOR.

السم المَعْدُول

The fourth Analogous Governor is a Passive Participle () and has the same regimen as a Verb in the passive voice, governing a Noun in the Nominative as the substitute of the Agent.

The conditions attending its government require that it be used in a sentence, including either present or future time, and be constructed with a subject in the same manner as the Active Participle.

EXAMPLE.

Zued's boy is beaten now, or will be beaten to-morrow.

Annotation.

"Bacchus ever fair and ever young,

Drinking joys did first ordain;

Bacchus' blessings are a treasure,

Drinking is the soldier's pleasure."

In which lines the word drink might be substituted for drinking without much detriment to the sense, for drinking joys mean the joys of drinking or drink, and the same may be observed of all other words of the same classes as grief, grieving; kiss, kissing; love, loving; &c. How then shall we ascertain the true character of these words? What for instance is love as opposed to the general term loving? It is certain that they are both general terms descriptive of certain sensations of delight or Mones of pleasure in the mind, and as such may become either the subject or predicate of a Proposition, but this explains nothing, and if we ask the Arabian Grammarians for an explanation they answer us by pointing out a mere distinction in their application. The say they, has no other government than that of any common Substantive Noun, but this again is controverted by the Grammarians of Koofah and Bagdad, who bestow upon it the very same regimen as that of the

the Infinitive of a Neuter Verb. The essential distinction then, for some essential distinction there certainly is, between the Infinitive and the Infinitive's Noun or Ismo Musdur, is not in my judgment simple abstraction, that is, making the one an abstract Noun in opposition to the other; for as I have observed before they are both general* or abstract terms, but rather in the idea of action or energy conveyed by the Infinitive, which action, Locko observes, however various, and the effects almost infinite, is all included in the two ideas of thinking and motion. These are his words, "For action, being the great business of mankind and the whole matter about which all laws are conversant, it is no wonder, that the several Modes of thinking and motion should be taken notice of, the ideas of them observed, and laid up in the memory and have names assigned to them; without which, laws could be but ill made, or vice and disorder repressed. Nor could any communication be well had amongst men, without such complex ideas, with names to them: and therefore men have settled names and supposed settled ideas in their minds of Modes of Action, distinguished by their causes, means, objects, ends, instruments, time, place and other circumstances, &c."

The real distinction then between the Muspur and Ismo Muspur seems to be this. The Ismo Muspur signifies simply the name of a Mode without any reference to action or energy; the Muspur denotes a more complex idea and indicates indefinitely the action, energy or being of that Mode. Love for example is a name assigned to a certain feeling of delight, but Loving is something

more, being another name by which we indicate the action or efficacy of that feeling called Love; and hence we perceive the real cause of its possessing an active or transitive government, in contradistinction to the Ismo Musdun, which having no reference to action, has no other regiment than that of any common Substantive Noun.

Action indeed is applicable to every Infinitive, and this the Arabian Grammarians acknowledge by dividing all the verbs in the Language into two general Classes, which they term and and that is, verbs denoting Actions transitively, (the actio transiens of Logicians;) and verbs denoting actions inherent or inseparable, (actio immanens) which we are accustomed to call neuter; and hence we perceive the propriety of the Rule laid down in the Commentary, namely, that the laid is saying in other words that every action supposes an agent.

This idea of action is conveyed in other languages by terminations, as beat-ing: verber-ens: $\tau v \pi^2 - x v^*$ &c. but in Arabic with a few particular exceptions, there is no distinguishing mark

by which we can discriminate the Infinitive from the Infinitive's Noun, so that we

must trust entirely to the context for the sense of either. Every Participle however in our

language when used as a general term, is the just representative of an Arabic

I'mean every Active Participle formed by adding the termination ing to the Imperative of a Verb, which seems in this case to possess a similar power to the characteristic to, and therefore it may perhaps be said that we have two Infinitives,* as,

The real office of the Verb is supposed also by Plato to indicate action τό μὲν επὶ ταῖ; πράξεσιν ὸν δέλωμα, εξημά πουλεγομεν, declarationem qua actiones significantur verbum dicimus, ‡ which is nothing but the res fluentes already quoted, but however this may be, it will scarcely I think be denied that action, energy or being is the essential characteristic of every Arabic Infinitive.

This has indeed been remarked before by Mr. Elphinston in his "Principles of the Enclin Language,"—" The Infinitive Moods are two, the Infinitive Mood, and the Participles." See the work Vol. 1, p. 250.

Annotation.

It must however be remembered that the proper subject of discussion in this work is the Musnua, and not the Ismo Musbur. It is this that the Arabian Grammarians include among the Analogous governors, ascribing to it the same regimen as its own Verb, which they say must in every case denote either transitive or intransitive Action. In this contracted sense it must be acknowledged that Mode cannot be considered as a strictly correlative term, for although it may be truly affirmed that every Arabic Muspur is a Mone, yet we cannot add conversely that every Mone is a Muspur; as the word Mode embraces every manner of being without exception, and a Grammatical Musbur includes only Modes of action, energy or being. These considerations led me to remark at the commencement of this note, that the true grammatical sense of an Arabic Infinitive was not easily conveyed by any one word in our Language, and as my object in this enquiry is truth and nothing but truth, I deem it my duty candidly to state and examine every objection that occurs to mo on the subject. But the word Mone, although far more comprehensive in signification than a grammatical Muspur, is yet clearly the term that the Arabian Grammarians had in view in the Definition and as it embraces, also the Ismo Musbur, which is only distinguished from the other by its want of verbal government, (being generally represented by the same word) I conceive it to be upon the whole the least exceptionable, if not the only just representative of an Arabic Infinitive.

But the word Event which is usually explained an incident, the consequence of an action, the conclusion or upshot of any thing, I confess I cannot but consider as inapplicable to any Arabic Infig.

The Attribute or Adjective (Leasing Line) is derived from a neuter Verb, and is formed to denote the uninterrupted or perpetual existence of the sense of its infinitive in an Agent or Substantive Noun. It possesses also the same regimen as its own Verb without any restriction as to time, but is subject to the conditions already described as applicable to the Active and Passive Participles, with the exception of that relating to Antecedent, as the Article of to which the Adjective is annexed is not considered the

Annotation.

POVERTY, &c. are called events, but these are not Nouns of Action, nor have they any verbal government, and cannot therefore be properly considered as Infinitives, in the true sense of the term Infinitive as laid down by the Arabian Grammarians.

Having given a short view of what appears to me to be the true character of an Arabic as well as an social to both of which the term mode is generally applicable, I shall close this Note with a few observations on the delians and and arabic two attributive Nouns derived from the Infinitive, which seem to require some explanation.

It has already been shewn that every Arabic Infinitive in the general sense of the term Infinitive, has a twofold signification: one under the character of an by which is simply indicated a mode, the other under that of a properly so called, by which is denoted the energy or being of that mode in a state of action. Now as every Object represented by a Substantive Noun, may be described by its active and passive qualities, i. e. by the actions which it performs, or by the qualities with which it is modified or distinguished, so would language naturally be provided with distinct words to express them, and hence the two Derivative Adjectives, in Arabic termed

The word governed by the Adjective (مُعَرُول) is sometimes in the Accusative Case, either from its resemblance to the proper object of a transitive Verb when definite; or as the مُعَرُثُ when indefinite; and sometimes in the Adjective Case from its relation to the Adjective. and zamil size of which the former, as its name imports, is properly the Noun of the Acent, but used as a Verb Adjective, for the purpose of describing the Action in which the Agent is employed, as "Solve Zued is beating; and the latter a simple Attribute or quality supposed to exist in the Object to which it is imputed, as "Zued is beautiful, and to this observance of active and passive qualities as signified by these derivitive words, and to this alone, we are perhaps to trace the distinction drawn by the Arabian Grammarians between them, namely, that the one, meaning the Jelical denotes the temporary existence of a Mode in an agent, and the other i. e.the zero its permanent or uninterrupted continuance.

This general rule however regarding permanent Attributes is certainly erroneous, for to prove it true, we must prove that every Mode or Quality as expressed by the Attribute or Equal must be necessarily permanent in the object to which it refers, which if granted would confound accidental and essential Modes altogether, and produce as many strange phenomena in nature as in language. A poor man for instance would necessarily live and die a pauper, and if sick and gouty into the bargain, so much the worse, for no hope could be reasonably entertained of his cure. A Pregnant Woman (Line) might in vain look for an accouchement, for the quality being permanent, she could not consistently with the grammatical canon (or more properly speaking the grammatical Bull) expect the slightest change in her condition! yet seriously, the Arabian Grammarians maintain, that the Adjective or Attribute denotes properly its own perpetual existence in the Substantive Noun to which it is imputed, and the phrase if Anacreon* is beautiful, must accordingly denote that Anacreon

MOORE.

To this mode of objection I can easily conceive the answer of an Arabian Grammarian. He will remark that certain objects are characterized by certain qualities, and consequently that although a female is not always pregnant, yet pregnancy is a quality habitual, or at all times attributable to her, in other words that the power of conception is co-existent with female nature. This is good, but it will not prove the point in question, for pregnancy can neither exist before, nor after certain periods, so that after all it is but a temporary, a transitory, in fact a

mere nine month's quality, and like the attribute supposed to be conveyed by the Active Participle or de is can only become permanent by the repetition of the action!

This distinction of permanent and transient qualities is commented upon by the Greek Philosophers. Aristotle has many passages of a similar nature to that under discussion, one of which Harris thus paraphrases in his Arrangements.

one thing to be observed, that some degree of permanence is always requisite; else they are not so properly Qualities, as incidental affections (Hádu.) Thus we call not a man passionate because he has occasionally been angered, but because he is prone to frequent anger; nor do we say a man is of a palid or a ruddy complexion, because he is red by immediate exercise, or pale by sudden fear, but when the paleness or redness may he called constitutional."

But first let us consider the true nature and use of an which may enable us to judge of the propriety or impropriety of the distinction supposed to exist between it and the simple Adjective.

The Participle Active or Je is used in two ways. First as a Verb Adjective, and secondly as a Substantive Noun. As a Verb Adjective alone it is properly the subject of Grammar, and in this character it describes the state or action in which any object exists or is employed, as " Zued is standing;" or " Zued is beating Amr," and has therefore the precise force of the Aorist Tense of a Verb, governing in the one case the agent in the nominative, and in the other,

These remarks are in a great measure applicable to the zamilization which is also viewed in the double capacity of a Substantive Noun and a simple Adjective or Attribute, and having also a near resemblance to the delia it is termed by the Arabian Grammarians and for Attribute resembling un Active Participle.

What then may be asked is the difference between the Leisland and the zanal in their grammatical characters as governing powers? The difference in my judgment is very obvious and very simple, and consists merely in this, that in construction the first or judgment is very obvious and very simple, and consists merely in this, that in construction the first or judgment is very obvious and very simple, and consists merely in this, that in construction the first or judgment is very obvious and very simple, and consists merely in this, that in construction the first opposed to exist in, or belong to accidentally, a given object or Substantive Noun. In other words, one denotes Action; the other denotes Quality, as judgit is beating; zued is beating; zued is beating judgment is very obvious and very inference in my judgment is very obvious an

THE SEVENTH ANALOGOUS GOVERNOR.

الأشم التّام

The seventh is a Perfect or Integral Noun (that is a Noun rendered perfect in itself, and independent of the relation of the Aorist Case.

Annotation.

The simple ATTRIBUTE or ADJECTIVE as expressing a passive quality, may perhaps have given rise to the idea of permanence, and the Active Participle as expressing an active quality, may also have led Grammarians to consider it as somewhat transitory, but in point of fact there is no such distinction between them, and the idea of duration whatever it may be, will in every possible case I imagine depend upon the nature of the Vena, as well as our own previous knowledge of the Subject. For instance, the phrase אורים איי ' The Earth is moving,' conveys to every one acquainted with our astronomical System, an idea of permanence, as the quality of mobility predicated of the Earth, is known to be continual,* but if we say الرقائد المانة الم stood to infer merely that the Ball is in Motion temporarily, and will again be at rest. Yet the Active Participle is the same in both examples and cannot be said to convey any idea of duration either temporary or permanent. It simply describes the action in which the Agent is employed with an indefinite relation as to Time. The very same may be observed of the ATTRIBUTE, for if we say, THE Inon is mann," we shall be understood to speak of a quality co-existent and essential to the Substance Iron, and therefore permanent, but let us substitute another Adjective, and say the Inox is nor, and the permanence of the quality immediately vanishes, for we all know that heat is accidental and not essential to Iron, and from this very idea of its transitory existence arose the common adage, Strike while the Iron is nor.

With the Active Participles and Attributes, considered as Substantive Nouns, Arabic Syntax has properly no concern. They assume then a different character in composition, and have the same government as common Substantive Nouns. For instance the words at a Sentinel; is a Flier or Bird, and is an Asker or Beggar, are all active Participles in the character of Substantive Nouns, though they may be literally translated and used as Verbal Adjectives, for disk means Tyrannising; which they may be literally translated and used as

both qualities and subjects, and are therefore assumed as Subjects in a Proposition, not however with any reference to the transitory nature of those qualities, as the Arabian Grammarians would fain make us believe: on the contrary they denote the habitual posssesion of the attributes or Modes referred to, and signify that the objects are acustomed to do so and so; for what is a Tyrant but a man who is known to practice tyranny? Or a Sentinel, but a man whose duty it is to keep watch? Or a Beggar but he who subsists by, or whose trade is begging? In truth the Active Participle as a Substantive Noun invariably denotes in Arabic the habitual Doer of an action, though in its Verbal capacity it may perhaps be considered as temporary, as

I have already remarked that the remarked that the remarked that the remarked flow is used like the Active Participle in the double capacity of a Substantive Noun, and a simple Attribute, resembling in application an Active Participle, as its name imports. In the first capacity it is used as a concrete or complex Term, to express both a subject and quality conjoined, as Laring (Medicus.) a Miser or avaritious man (Miserus) and a foreign Country. (Peregrinus) &c. (where it may be observed the Latin adjectives have precisely the same force as the Arabic;) but these are all strictly speaking, simple Adjective Nouns, which indicate by their prescribed form, that they are meant to be added to other Nouns, "so that both together may answer the purpose of complex terms," and in this character as simple modificatives, they are the proper subject of grammar. Now between an Active Participle and a simple Adjective considered as Verbal and Analagous Governors, we have already pointed out the distinction, (a distinction that comprises the two grand divisions of Modes or manners of being, that is, the modes of action, and the modes of being without action; as the first attributes Action to a subject, and the second Quality, but neither with any adsignification of time,) and it now only remains to cosider in what it is that they differ when used as Complex Terms.

Annotation.

With regard then to the transitory or permanent nature of the attributes expressed by either, there is not in my judgment any distinction whatever. They are both concrete Terms that differ only in the nature of the qualities they express. The Active Participle being the abbreviated sign of a complex idea, i. e. of a Subject and an Active Quality, as a Sentinel, or man who keeps watch; and the Adjective Noun, the sign of another complex idea, i. e. of a Subject and a Passive Quality as, a Miser, or man in whom the passion of avarice is supposed to exist. Compare all the Participles and Adjective Nouns in the Arabic Language (as complex Terms) and this distinction and no other I think will be found to characterize them; and indeed the reason appears obvious, for the Participles are derived from Active Verbs, the Adjective Nouns from Neuter, or from those that merely express corporeal or mental qualities in a passive state.

If we have occasion to mention an Object habitually employed in any given action, or whose profession is agency or business of any sort, we use the Active Participle as a Substantive Noun, and say Jole an Agent; a Story-Teller: a Husbandman: a Servant, &c. and on the contrary, if we intend merely to describe an Object as possessing some particular Quality, we make use of the Adjective Noun, and say a Virgin, (which is also an Adjective) Virgo Inlacta.

But I repeat again that Arabic Syntax has nothing to do with Active Participles, and Adjective Nouns, as Complex Terms. They are employed in Grammar as Verb adjectives, and simple Attributes or Qualities, and are used descriptiveley, to define either the action in which a given Agent is employed, or the Quality with which a given Object is invested. As such they are necessarily adjected to Nouns, and although their grammatical office is to describe the Active or Passive state of a Substantive, they come afterwards like the Participles and Adjectives of other Languages, to stand for the Substances themselves.

In this manner are Passive Participles employed, for which means literally beloved, is used as a Substantive Noun to denote a Mistress. Worshipped, or God. Worshipped, or God. Written, a Book. Possessed, a Slave or Servant. John sent, a Prophet. Hidden, an Enigma Imprisoned, a Prisoner. &c. &c. upon which principle of Analysis, Horne Tooke has explained above 2,000 abstract terms in the English Language, a process that may be adduced as a very powerful argument in favor of Etymology, as it enables us to trace the true and legitimate character of Words.

between the Active Participle, or de (a) and the Simple Attribute, or and misconception, and that the source of this error proceeds from confounding the different offices of these words together, that is, by comparing the Attribute or Adjective when used as a complex term or Substantive Noun, with the Active Participle as a Vern Adjective, which being then considered as equivalent to the Active Participle as a Vern Adjective, which being then considered as equivalent to the Active Participle as a Vern Adjective, which being then considered as equivalent to the Active Participle as a Vern Adjective, which being then considered as equivalent to the Active Participle as a Vern Adjective, which being then considered as equivalent to the Active, signifying properly fumiliar, but like our own Adjective it is used in the sense of a Complex Terms to denote an intimate or companion, a Familiar. If however we use the Active Participle, and say the Participle is equal to the Active and say the Participle is equal to the Active Active

that would be ridiculous, but merely a companion with whom we are accustomed to sit, and corresponds precisely with the Latin Sodalis, "qu. sedales quod und sederent et essent."

I have extended this Note so far beyond the limits of the Text, that I cannot with propriety persevere in the discussion, yet I relinquish it with reluctance, for I consider it as one of very considerable importance, and one by no means satisfactorily explained by the Arabian Grammarians. The few remarks here offered may however enable the reader to carry on the enquiry himself. I have pointed out what appears to me the source of the error in the distinction drawn between the Active Participle and the simple Attribute, (which should properly be called the Verb Adjective and the Adjective Noun.) This if correct, will be found of importance, but much imformation is still wanting to elucidate the true nature of Arabic Adjectives, and this I may possibly attempt in a future work. I shall therefore close this enquiry with a few promiscuous remarks (extracted from Ruzee and the Waffel) on the Active Participle and Attribute.

The Participle Active and Simple Attribute or Adjective, agree in denoting a mode or manner of being; they assimilate also in form as to number and gender, and follow the same rule of construction with the single exception alluded to in the Commentary.

The word governed in the Objective Case by the Adjective, is never allowed to precede it in construction: that of the Active Participle may. We can therefore say زيد آانا فاريد 'I am beating Zued,' but we could not say زيد وجهد من Zued has an ingenious countenance.'

There are other distinctions between them which I omit to record as unimportant.

^{*} Witty, Beautiful.

[†] Evident. Delicate or slender.

The Adjective may or may not be constructed with the definite article $\Im f$, and in either case its governed word is to another; or made definite by the Article; or neither one or other: hence we have six peculiarities of construction; but besides these the governed word is itself constructed in three different forms, namely in the Nominative, Adrist, or Objective Cases, which multiplied by six as given above, leave eighteen varieties of construction, as may be seen in the following:

Of the examples however given in the above table, two are rejected by Grammarians as improper, namely the 13th in which the Adjective Noun is made definite by the Article \int_{1}^{∞} and connected in the relation of the Aorist Case with its own $\int_{-\infty}^{0.9} e^{-x}$ which is itself constructed with a Pronoun in the aorist case; and the 15th in which the Adjective Noun is made definite by the Article, and connected in the aorist case with an Indefinite Noun.

The propriety of the 16th example is also disputed by some and defended by others, but I willingly resign the office of umpire to any other Commentator.

Of the fifteen remaining examples the 1st, 4th, 8th, 9th, 11th, 12th, 14th, 15th and 16th, are termed by the Arabian Grammarians i. e. elegant or perfectly correct. The 7th and 10th or unobjectionable, and the 2d, 3d, 5th and 6th,

I shall close this long grammatical narcotic on Infinitives, Verb Adjectives and Noun Adjectives, (which the generality of readers may probably feel inclined to class among the *Insolubilia de Aliaco*) with a few extracts from Arabic Authors by way of illustration. In the following poetical panegyric on a departed Hero, extracted from the 20th Muqam of the Muqamat-ool-Hureeree will be found a variety of Adjective. Nouns, employed both as simple Attributes and complex Terms.

O People I have a surprising story to unfold,
From which the wise and ingenious may derive advantage!
I was acquainted in my youthful days with a potent Hero,
Whose warrior-blade was sharp and piercing,
Who entered the lists of combat in crested pride,
Confident of success and fearless of dauger.

^{*} The word the Plural of is means both brilliant swords and beautiful women. I have tried to preserve the quibble but I fear not very successfully.

At the vigour of his onset the most impervious holds gave way, And he made himself an easy passage through the narrowest defiles. He never encountered an adversary in single combat, Without returning from the tilt with a blood stain'd spear: Nor assaulted a fortress however fenc'd and barricado'd, Without being hailed on the erection of his standard, with the auspicious cry, · Assistance from above and a speedy victory !'* Thus he lived triumphant: - arrayed every night in the stately garb of youth. Giving rapture to the young and beautiful and receiving it in return, Nay caressed by all as an idol of perfection. But time which continu'd to extract his vigour and diminish his strength, At length succeeded in effecting his fall, And reduced him to so mean and shriveled a plight, That his very friends beheld him with contempt. The exorcists and cunning men in vain attempted his recovery, And the most skilful Physicians were baffled in their attempts: Then indeed he abandoned arms, for arms had abandoned him, After giving and receiving many a hostile salute. He is now dejected, drooping and crest fallen, † And such is the fate of man who is born to misery. Behold to-day the warrior stranger on his funeral couch, And who will bestow a trifle to have him decently intered?

The reader will perhaps smile when he hears, that this 'sable warrior,' this Arabian Achilles, so feelingly and pathetically eulogized by Aboo Zued, is no other than the celebrated Bonus Deus or Hellespontiacus of the Ancients! Of this un-

⁺ The original of this line is strangely translated by Sir William Jones. "Nunc autem jacet tanquam for a in latibulo!" means lit. inverted.

fortunately Sir William Jones was not aware, when he gave it a place in his Poeseos Asiatice Commentarii, for taking the whole as a serious funeral oration over some departed Chieftain, he has inserted it in his chapter De Poesi Funebri, and has actually drawn a grave comparison between it and David's Lamentation on the death of Saul and Jonathon!*† "Hæc Elegia, 'says he,' non admodum dissimilis esse videtur pulcherrimi illius carminis de Sauli et Jonathani, obitu; atque adeò versus iste.

Had Sir William read one page farther in the Muqua he would have discovered the true Hero. Take another example of permanent attributes, simple adjectives and descriptive Epithets as included in the following Story.

STORY.

I resided at Busrah,* said a certain Arabian Yorick, as a parson and professor of humanity, and was one day a good deal amused by a strange fellow, squint-eyed, straddle-footed, lame of both legs, with rotten teeth, stammering-tongue, staggering in his gate like a man intoxicated, puffing and blowing like a thirsty dog, and foaming at the mouth like an angry camel, who came up and seated himself before me. Whence come you, said I, O father of gladness? From home please your worship said he. And pray where is your home I rejoined, and what is the cause of your journey? My home he replied, is near the great mosque, adjoining the poor house, and I am come for the purpose of being married, and to beg you will perform the ceremony. The object of my choice is this long-tongued, importunate hump-backed, scarlet-skined, one-eyed, no-nosed, stinking, deaf, wide-mouthed, daughter of my uncle. OF THE GOVERNMENT TERMED OR ABSOLUTE.

By Absolute Government (الْعَامِلُ الْعَامِلُ) is meant a government perceived by the mind, and in which a word as an agent has no concern. It is distinguished in two ways. First, as governing the Subject and Attribute in the Nominative Case, which is the primary form of a word in construction, or the state of a Noun uninfluenced by any Verbal governor, as

Annotation.

The Government termed as opposed to bid or Verbal, may be properly denominated Absolute or Independent, and like the Absolute Case in Greek, it comprehends the Participle or Verbal Adjective with its substantive Noun, or the and and which are termed also the Subject and Predicate, and which seem to correspond with the Quon Loquinur and De Quo Loquinur of European Grammarians. This therefore may account for the mark of Case assigned by the Arabs to the Aorist Tense of a Verb, for the Aorist as well as the Participle forms the simple, the Quon Loquinur or Predicate, to the analysis or thing spoken of, and both terms connected together in discourse by means of this Absolute Government, produce the connexion termed is which constitute a perfect or complete Proposition.

Zued is going. Secondly, as governing the Aorist tense of a Verb, which arises from its aptitude to supply the place of a Noun, as كَالُو كَا كَالُو لَا كُولُو لِلْ كُولُو لَا كُولُو لِلْ كُولُو لَا كُولُو لِ

Annotation.

The Nominative Absolute in Greek, which may be considered equivalent to the AMIL MANUMEE in Arabic, is accounted for by Grammarians by supposing a verbal ellipsis, as they contend that there can be no Nominative without a Verb either expressed or understood. This doctrine may perhaps be applied to the Case in question, though the ancient* Arabian Grammarians endeavour to account for the construction in a different manner, alledging that the Subject governs the Predicate, while others again pretend that they mutually govern each other.

With regard to the government assumed by the Aorist, it is the opinion of Kissaee that it should be considered Verbal, and not Aesolute as laid down in the Commentary, and this Verbal regimen he ascribes to one of the four formative letters of the Aorist, namely and and which which he thinks must give the Tense of the Aorist, namely and the strength which he thinks must give the Tense of the Aorist, namely of the A

The Nominative Case, to or that Case in Arabic which expresses the subject of a proposition without the means of any Verbal Governor, may be illustrated by the following extract from Hermes. "It has been said already in the preceding chapter, that the great Objects of natural union are Substance and Attribute. Now from this Natural Concord arises the Logical Concord

^{*} OONDOOLOOSEE records this opinion of SEEBUWUH, It is also noticed by Boo Alee, Abool Futuh, &c.

Eléméns De Grammaire Générale, Par,

The Grammarians of Koosuh-in general, ascribe the government of the Aorist, to the simple circumstance of its being unaccompanied with any of those particles which occasion it to terminate in ion of Ibno Malik.*

Annotation.

These Concords in Speech produce Propositions and Sentences, as that previous Concord in Nature produces Natural Beings! this being admitted"— "What?—Why that Nouns and Adjectives like natural Beings coalesce and bring forth Sentences!" we proceed by oberving, that when a Sentence is regular and orderly, Nature's Substance, the Logician's Subject, and the Grammarian's Substantive are all denoted by that Case, which we call the Nominative." He then goes on to explain how the Attribute in imitation of its Substantive would appear in the Nominative Case also.—"Every Attributive would as far as possible conform itself to its Substantive, so for this reason, when it has Cases, it imitates its Substantive, and appears as a Nominative also. When it has no Cases, it is forced to content itself with such assimilations as it has!" Surely this is not the language of the 'EPMHE AOFIOE;—the mighty oracle of winged words and philosophical arrangements! See Hermes, B. the second, p. 280.

FINIS.

^{*} A celebrated Grammarian author of the Alfeeah.

[†] Harris classes Verbs, Participles, and Adjectives under the general head of ATTABUTIVES, and for this, the poor man has not escaped the lash of the Wimbleden Aristarchus. "Harris should have called them either Attributes or Attributables; but having terminated the names of his three other Classes (Substantive, Definitive, Connective) in Ive, he judged it more regular to terminate the title of this Class also in Ive: having no notion whatever, that all common terminations have a meaning and probably supposing them to be, (as the Etymologists ignorantly term them) mere protractiones vocum; as if words were wire-drawn, and that it was a mere matter of taste in the writer to use indifferently either one termination or another at his pleasure."
