Reason of similarities in the Arabic Conjugation

Dr. Hussein Al-Rafay'ah

Abstract

This research reveals the reason of similarities that many exist in Arabic Conjugation issues. As stop by people who work on it and put it in the Sultan logic which aims to draw similarities force in linking the measured and measured it, even if they were far apart in two pronunciation out of context. This search simplifies images of reason of similarities in selected issues without fully extrapolate in such a small search. The possible knowledge transfers between the nouns themselves or between verbs themselves or between nouns and verbs. This problem has appeared in the issues that deviated from the measurement which appeared clearly in the units of gerund and plural.

Keywords: (Conjugation, Reason, Similarities, Internal Transformation).
