

Thesis Summary

Thesis Title: "Kalwati's Footnote on Al Eqna'a" for Moahmmed Bin Ahmed Bahwati who is known by "Al Kalwati" (Date: ١٠٨٨ AH) A research and investigation.

Theme of the book: A worthy and useful (Islamic) jurisprudential book. This book is considered important as its author is one of the Hanbali scholars known by auditing and verification. Also, it is an accredited and reliable book to contemporary Hanbali scholars in judgment and Fatwa issues. One of the quality measures of this book is the usage of many original and verified sources. In addition, the author was very accurate in referring to his resources, linking these references, analyzing them and mentioning the differences among them.

Three different copies of the book were used in my research. This thesis includes an introduction and two parts. In the introduction, I mentioned the reasons of choosing this subject and my thesis plan. The first part was a brief study about the book "Al Eqna'a" and his author Al Hajaawi and also, I focused on the footnote of Al Kalwati in this part as a whole. In the second part, I mainly focused on the verified book text itself which includes the most aspects of the Islamic jurisprudence. Classified tables of contents were added for easy access to information.

Allah to be Praised.
