### Measures Implemented to Secure Care for Individuals with Special Needs in Islamic Sharia'h

*S.Z. Al-Kilani\**

#### ABSTRACT

The subject of this research is the judicial procedures embodied in Islam whether in the imperative religious texts or in practical implemented measures so as to secure care for individuals with special needs in the Islamic society.

It has been shown that Islam's care for individuals with special needs encompasses all the aspects of their life, commensurate with their capabilities organized under the umbrella of the Islamic state and the Islamic society. All these are regulated by Islamic judicial texts in the holy Qur'an and Sunna and other sources of legislation. This demonstrates the great attention that Islam gives to individuals with special needs and proves how Islam has preceded other legislatures in providing and implementing legislations and measures that protect the individuals' rights and meet their everyday needs to enable them to do their duties in the best possible way without leaving any negative impact on their social status and on their active role in life.
