**A Bibliometric study of the works of Hamad
Al-Jassir
By Dr. Fouad Hamad Rizq Farsuni**

Abstract:

The study commences with an exposition of the character and prominent contributions of Hamad Al-Jassir, and explains its subject, chronological and form coverage, in addition to research methodology used, i.e. bibliometric analysis, and study goals, including the investigation of the bibliographical characteristics, particularly statistical, chronological (historical), form, lingual, and subject characteristics of Al-Jassir,s works, and revealing the factors having a significant impact on Al-Jassir,s intellectual productivity and publication of his works. Accordingly, the study classifies the sources of the bibliographical control of Al-Jassir,s works, and discusses the bibliographical characteristics of researched works. A source list of publications searched to identify researched works is introduced. The study reveals significant aspects of the bibliographical control of Al-Jassir,s works, and their various characteristics, illustrated by tables, and finally gives citations of important sources consulted.

Keywords

Bibliographical characteristics, bibliographic control, bibliometric analysis, bibliometric study, chronological (historical) characteristics, citations, form characteristics, intellectual output, intellectual productivity, lingual characteristics, publication, sources, source list, statistical characteristics, subject characteristics.
